U.S. policy in Central America inconsistent

By KIRS REHER

Abolishing leftist governments is the bottom line of the U.S. policy in Central America, a former New York Times reporter told a crowd of about 400 people Thursday night in Chumash Auditorium.

Raymond Bonner, one of the first American journalists to report from behind the guerrilla lines in El Salvador, feels the United States' involvement in El Salvador is based on political ideologies.

"Forget about commercials economic interest or national security," Bonner said. "We have no national reasons to go into El Salvador. The whole thing is based on ideology." Bonner's book, "Weakness and Deceit - U.S. Policy in El Salvador," recently on the Robert F. Kennedy Book Award. Documenting the evolution of U.S. policy toward El Salvador, Bonner said the U.S. response to Nicaragua is to go through the Sandinistas, or have them 'cry uncle'." Bonner said, quoting President Reagan in a recent press conference.

"Reagan called the Contras freedom fighters, but Bonner said he had not seen those equating the Contras with America's founding fathers. They don't recall the Contras selling off refugees raping and pillaging villages. Selling people's homes to the government to hire criminals to assassinate people," Bonner said.

President Reagan called the Contras freedom fighters, but Bonner said he had not seen those equating the Contras with America's founding fathers. They don't recall the Contras selling off refugees raping and pillaging villages. Selling people's homes to the government to hire criminals to assassinate people," Bonner said.

'Our policy in Central America is illegal, inconsistent and ill-advised. In Central America we stand naked and ashamed before the nations of the world.'

ASI presidential candidates assess the Foundation

By GREGG SCHROEDER

Greater student understanding of the Cal Poly Foundation and a stronger student voice in the distribution of its surplus funds are among the goals of the three ASI presidential candidates.

Candidate John Carroll, a speech communication major, said that students don't understand enough about the Foundation.

Carroll, 21, cited studying the Foundation's profit and loss statements as his first priority in regard to the corporation.

"It's necessary to find out how the Foundation makes money," Carroll said. "That's a basic step. We have to know how the Foundation makes money, then we can influence how the surplus goes elsewhere." Carroll has been publishing a "booklet" that explains the Foundation and its operations.

Candidate Steve Dunton, a 22-year-old electronic engineering major and currently a student senator, said that despite the fact that students deal with the Foundation daily through such operations as food services and EL Central Bookstore, there is little student understanding of the workings of the non-profit corporation. That, in addition, he said, leaves funds for the university through donations and investments. Students have little control over the Foundation, Dunton said, because there is only one student member on the nine-member board of directors.

"One voice in nine isn't a whole lot," Dunton said.

The student representative, currently a business administration major Lori Demattei, is nominated by the dean of the different schools and then selected by President Warren Baker. Dunton said President Baker says he would like to see the student body have a voice in the allocation of the monies the Foundation takes in. He testified that third of these three funds are generated from students who patronize the Foundation-run campus services.

"It's our money," Dunton said. "I think we should have some say as to where that money goes." Currentley, Baker makes recommendations as to how the surplus funds will be spent. Dunton said. At San Jose State University, the surplus goes into an "unallocated reserve, and candidates have no requests as to how the money will be spent," Dunton said. At Cal Poly, the final decision at the ballot box.

Dunton said students voted for their recreation facility at San Jose State, he said, and at California State University, Chico, "students have control of the whole operation."

Dunton said he would like the Foundation to be more accountable to students.

"The Foundation does a lot of good things, but that doesn't mean we have to overlook other things or ask questions," Dunton said. Please see CANDIDATES, page 3.

Assistance from the Foundation reporter in El Salvador, spoke to a crowd of 400 at Cal Poly about his feelings on the U.S. involvement in Central America.

Attack imminent, say men in Reservoir Canyon case

By THOMAS WILLIAMS

Police reports released to the public revealed that the four men indicted on murder charges in Reservoir Canyon believed that the killing of the previous F 'oly student currently a Viet­ nam War veteran described by the police as a transient.

Mariano Francisco Rey, a Viet­ nam War veteran described by the police as a transient.

Dorian Hawkins was sharing a room in the dormitory that he awoke before the shooting started and heard the five .22-caliber gunshots that killed the student.

"I saw five shots," Hawkins told police.

He believed to be the only witness to the shooting.

The four men told police they had a .22 rifle and Ryan had a 44-caliber pistol. The four men told police they thought they were under attack.

They fired several shots before walking out of the canyon to let people know they were coming out. Rund told police.

"It's our money," Dunton said. "I think we should have some say as to where that money goes." Currentley, Baker makes recommendations as to how the surplus funds will be spent. Dunton said. VIEWPOINT

From Page 2

Revision and has not resorted to publishing speculation in place of fact.

Curry's Sixth Amendment rights have not been compromis-
ed but have been carefully pro-
ected. The judicial process is proceeding at a reasonably speedy pace with any delays occurring at the behest of the defense. The trial will be public and every effort has been made to assure that Curry is tried by an impartial jury in the district where the crime was committed. It is Curry's right not to have to seek a change of venue but to be tried locally. A]

Curry is not being denied the right to present any evidence in his behalf; he can and will present his evidence in the proper forum, by trial. By making this statement, Altieri essentially confirms the argument presented by the District Attorney when he requested that the records be sealed, that if the evidence was released to the public, this case would be tried in the press rather than in the courtroom.

There are additional state-
ments in Altieri's article which cannot be demonstrated to be in error, just as they cannot be considered fair. They are speculation and it is proper that they be labeled as such, lest a reader be misled. Altieri wrote that there is an "abundance of confused and vague ballistics informa-
tion" developed by testing the weapons taken from Curry. The results of the ballistics tests were included in the investigatory reports which were sealed; there is at this time no way of knowing the nature and content of those reports and cer-
tainly no way of knowing if they are confused and vague.

Altieri also wrote that, in order that the records of the case be sealed, the suspect is placed on no evidence that might pre-
judice the public regarding the suspect's possible guilt, but rather on what might prove his potential innocencc. This is pure speculation, for none except the parties directly involved have knowledge of what is included in those reports and what they will or will not prove.

The conflicts between the public's right to know and a defendant's right to a fair trial or a victim's right to privacy are inherent in our system of gov-
ernment. They are conflicts which will not be resolved easily or quickly, although they seem always to be under consideration by our courts and legislatures. To express one's opinion about such matters, as Altieri has done and as I am doing now, is healthy, but only when that which is presented as fact is in-
deed factual. In the physical sciences it is true that discovery and progress is built on specula-
tion; in matters of the social sciences, however, we are neither so burdened nor so blessed with absolutes and can speculate, especially about things which are not known but simply have not been revealed to us in their fullness.

FREE SPINAL EXAMINATION

Johnston Chiropractic Clinic, Inc. is sponsoring a spinal check-
up and free screening program at CCP's service time. This service will include consultation, physical examination and a
report of findings.

WARNING SIGNS OF SPINAL MISALIGNMENTS

- Recurring Headaches
- Dizziness, Vertigo, Nausea
- Neck, Shoulder and Arm Pain
- Low Back and Leg Pain
- Pain Between Shoulders
- Numbness in Hands & Arms
- Loss of Stoop
- Difficult Breathing
- Numbness in Legs & Feet

If you suffer from any of these warning signs call immediately to prevent possible advancing complications. This free spinal public service is for a limited time only, by appointment please.

Even five-time winner impressed
Golf amateurs perform well early in Masters

BY HAL BOOK
AP Sports Writer

AUGUSTA, Ga. (AP) — Jack Nicklaus had reached the 15th green in the first round of the Masters golf tournament when he casually glanced up at the leader board.

There, staring back at him from a line of red digits that transcended into sub-par holes, were a couple of new names — Inman and Randolph.

John Inman and Sam Randolph are amateurs, rookies who played the prestigious Augusta National layout Thursday as if it were some ordinary public course.

Forget the history and tradition. Forget the lightning fast greens and the foreboding three-hole cluster called Amen Corner. Forget the legions of veterans who have been devoured by this challenging course.

Here were two kids, one barely out of college the other still an undergraduate, shooting 2-under par 70s that left them two shots off the opening round lead.

And Jack Nicklaus, five-time winner of the Masters who finished the first round one stroke behind them, loved it.

"I thought, ‘If this isn’t a shot in the arm for amateur golf,’ " he said. "I’m tickled for them. Maybe this will put some life back into amateur golf.’"

Randolph’s ambitions are somewhat more modest.

"I came in with the goal of making the cut, playing well. If I do that, I’ll gun for the top 24," Randolph said.

"I wasn’t very nervous playing the finals of the U.S. Amateur," Randolph said. "I had left belonged there. Here, you’re playing with guys you watch on television, you’re trying. That’s a little more pressure.

"I was scared," Inman admitted, "but I figured I could do it."

Our dedication to technology has made Sundstrand a leader in virtually all of the markets our products serve.

We are a Fortune 500, billion dollar company which designs, manufactures and sells a variety of proprietary, technology-based components and subsystems for aerospace and industrial markets.

It is our aggressive engineering and manufacturing that enables us to be on the leading edge of that technology. We don’t just react to a customer’s need—we anticipate it.

Sundstrand Aviation Operations, Brea, California, is a sophisticated manufacturer of highly efficient electro-magnetic aerospace AC/DC motors, generators, solenoids, and environmental control units. Our Overhaul and Repair Department provides original equipment quality repair on all Sundstrand aircraft products with attention to timely turnaround.

Sundstrand has operating units located in nine countries and employs more than 14,000 people worldwide. We offer employees solid benefits, liberal holidays and opportunities for growth and development in all phases of our manufacturing environment.

An Equal Opportunity Employer
Senator Cranston calls for tax reforms

By GREGG SCHROEDER

Simplification of the federal tax structure and a freeze on government spending were two of the topics discussed by Sen. Alan Cranston and a panel of 12 city residents at City Hall Friday morning.

Cranston, the Democratic senator from California, spoke with the panel before a group of more than 60 residents seated in the Council Chambers. He described the present tax system as "unfair," suggesting that it be replaced by a modified flat tax that would get rid of the "unfair loopholes" that exist in the present system.

"In 1983...150 Americans earned $50 million and paid no taxes," Cranston said. "Sixty-five U.S. corporations earned $85 billion and paid no federal income taxes.

With a modified flat tax structure, the government would be able to collect more money in taxes without raising them. Individuals and companies presently not paying their fair share would be more easily tracked down by the Internal Revenue Service under a simpler system, Cranston said. Cranston said that although changes to the tax system were needed, "we cannot live beyond our means forever." He cited military spending and cost-of-living increases for Social Security recipients as the main areas that are subject to cuts to reduce the deficit.

Cranston said he is in favor of a freeze in the military budget as a means to curb spending rather than cuts in student loans, child nutrition programs or eliminating the cost-of-living increase for the nation's elderly, a concern of those in his audience.

Cranston said that although most deductions and loopholes would be eliminated, those in the interest of the general public such as charitable giving would be left intact.

Panelist Suzanne Yost, local real estate agent, questioned the senator on the implications of a flat tax. She said if deductions on investment property were cut, there would be little incentive for more building. In cities where housing is at a premium, such as Los Angeles, shortages would drive rents up, she said.

Cranston replied that the proposed reforms would leave people with more money at their disposal for buying and renting, and thus would actually stimulate the economy.

Jeff Colombini, a Cal Poly agricultural management student on the panel, said he was concerned about investors who buy up land as a tax shelter, consequently driving up property prices for serious farmers.

"I oppose that particular loophole," Cranston said. "It must be closed.

"In regard to the deficit, which the senator said is now averaging $200 billion per year, Cranston said "we cannot live beyond our means forever." He cited military spending and cost-of-living increases for Social Security recipients as the main areas that are subject to cuts to reduce the deficit.

Cranston said he is in favor of a freeze in the military budget as a means to curb spending rather than cuts in student loans, child nutrition programs or eliminating the cost-of-living increase for the nation's elderly, a concern of those in his audience.

"The senate is a way of expressing formal faculty opinions on certain issues," said Academic Senate Chairman Reginald Gooden.

"The senate is a way of expressing formal faculty opinions on certain issues," said Academic Senate Chairman Reginald Gooden.

While all academic schools are represented on the senate, the exact number of representatives is determined by the number of full-time faculty per school.

The main body of the senate includes 56 faculty members, three representatives of the Administration and two representatives from the ASI.

Arraignment continues in rape case

Two Cal Poly students charged with rape underwent further arraignment Wednesday and dates of future proceedings were set.

James G. Blevins, 23, and Manuel Perez, 43, appeared before Judge Donald Umblohr for a second arraignment and both were later released on their own recognizance.

While Blevins had been released on his own recognizance following the first arraignment, Perez had his $7,500 bail exonerated following a motion filed by his attorney.

Perez is scheduled to appear for further arraignment April 17 and Blevins will have a preliminary hearing May 2.

Cranston, the Democratic senator from California, spoke with the panel before a group of more than 60 residents seated in the Council Chambers. He described the present tax system as "unfair," suggesting that it be replaced by a modified flat tax that would get rid of the "unfair loopholes" that exist in the present system.

Agricultural business management major Mike Mendes, the third candidate, said he feels there is not enough ASI input in Foundation decisions and suggested this be remedied by adding more students to the board.

"It's the ASI's responsibility to the student body to monitor the workings of the Foundation," the 22-year-old Mendes said. He feels some of the profits accrued by the Foundation should be used to subsidize the cost of items students can only buy from El Corral Bookstore, particularly textbooks.

"There is a 21 to 22 percent markup on textbooks," Mendes said, adding that bookstore operating expenses are 22 to 23 percent. The margin of profit on textbooks isn't great, Mendes said, but lower prices could be achieved by subsidizing them with the sale of the other bookstore items.

Mendes cautioned that lowering prices of some Foundation services outright might mean sacrificing other services, including donation generation and athletics.

"We don't want to lose services," Mendes said. "It's like paying taxes. If you want those services, you're going to have to pay for your part...but the ASI needs to act as a check and balance for the Foundation.

By GREGG SCHROEDER

A Cal Poly engineering instructor recently received a $5,000 grant from Chevron Corp. to study ways to make machines understand speech, thereby completing his doctorate.

Terry Stanhope, Electronic and Electrical Engineering Department associate professor, will use the grant to help him finish work on his doctoral degree in signal processing at University of California, Santa Barbara, where he is presently studying. His specialty, speech research, includes the study of high-speed processing of speech information by machines.

Jim Harris, Electronic and Electrical Engineering Department head, called the the grant "unusual" because it was given to someone who is currently a teacher, rather than a potential instructor.

Stanhope "is (already) doing very well as a faculty member," Harris said, adding that with the grant, Stanhope can continue working with his research unimpeded. Harris said Stanhope expects to complete his doctorate by fall.

A spokesman for Chevron Corp. said the company felt the grant proposal showed promise in 1979, Stanhope has been involved primarily with electronics firms. Stanhope "is (already) doing very well as a faculty member," Harris said, adding that with the grant, Stanhope can continue working with his research unimpeded. Harris said Stanhope expects to complete his doctorate by fall.

Since he joined the Cal Poly faculty in 1979, Stanhope has been involved primarily with junior-level curriculum. During his second year here, Stanhope was voted outstanding teacher and outstanding advisor in his department.

Stanhope earned a bachelor's degree in mathematics and electrical engineering from Cal Poly in 1968 and a master's degree in electrical engineering from the University of Southern California in 1973.

From 1968 to 1979 he worked for Texas Instruments Inc. and other electronics firms. Stanhope earned a bachelor's degree in mathematics and electrical engineering from Cal Poly in 1968 and a master's degree in electrical engineering from the University of Southern California in 1973.

If you have any applications, programs, or service questions, call us Monday thru Friday 8am and 4pm CST, and we'll be glad to help.

If your calculator needs repairing, we'll direct you to the nearest service center for an immediate exchange. Under warranty, it's free. If there's no center near you, we'll do it all by mail.

Of course, there's just one catch. It has to be a Texas Instruments calculator. But then, if you're as smart as we think you are, why wouldn't it be?
Braves down San Diego
Murphy fourth player with four homers in four games

ATLANTA (AP) — Dale Murphy ripped a two-run homer, his fourth in four games, and Bruce Sutter pitched out of a jam Sunday to lead the Atlanta Braves to a 3-1 victory over the San Diego Padres.

Murphy’s drive over the left-field fence came after Brad Komminsk opened the 10th with a single off reliever Tim Stoddard, 0-1. The homer was Murphy’s third of the season and gave him eight RBIs in four games.

Five Giant pitchers used, Dodger rally shot

Five runners reached base in the ninth inning Saturday to give the Atlanta Braves a 5-2 lead. But Murphy drew a leadoff walk off Mike Witt, 0-2. The homer was Murphy’s third of the season and gave him eight RBIs in four games.

Glenn Hubbard tied a major league record for second baseman with 12 assists. The feat has been accomplished four times, the last by Chicago’s Ryne Sandberg in June 1983.

The Braves led 1-0 in the first when Claudell Washington doubled and scored on Komminsk’s single.

The Padres tied it in the fifth when Tim Flannery singled and Garry Templeton doubled him home.

Red-hot Dale Murphy hit a two-run homer in the 10th inning Saturday to give the Atlanta Braves a 7-5 victory over the San Diego Padres after Bob Horner’s first home run since last May 23.

Glenallen Hill tied a major league record for second baseman with 12 assists. The feat has been accomplished four times, the last by Chicago’s Ryne Sandberg in June 1983.

The Braves led 1-0 in the first when Claudell Washington doubled and scored on Komminsk’s single.

Strange’s watery disasters

School’s senate expected to drop program

NEW ORLEANS (AP) — Two players and two other men accused of conspiring to shave points in Tulane University basketball games were expected to plead innocent Monday, the same day the school’s student senate will vote on dropping the sport.

The senate is expected to support President Eamon Kelly’s recommendation to abolish men’s basketball because of the scandal that has rocked the 150-year-old school the past month.

Two students implicated in the case, Mark Olesky, 21, of Fair Lawn, N.J., and David Krantz, 21, of New Rochelle, N.Y., pleaded innocent to similar charges last week. Krantz also pleaded innocent to one count of cocaine possession and nine counts of selling the drug to three players.

Coach Bobby Thompson, 21, and student David Rothenberg, 22, of Wilton, Conn., pleaded guilty to charges as part of a plea bargain. They are to be sentenced July 9.

Conspiracy carries a maximum penalty of 20 years in prison and a $2,500 fine; the maximum penalty on the drug charge is five years in prison and a $5,000 fine.

Tulane players expected to plead innocent today

Water sinks Strange, German wins

AUGUSTA, Ga. (AP) — West German Bernhard Langer, taking full advantage of Curtis Strange’s watery disasters Sunday, fired a 4-under-par 68 in the closing round and became only the third foreign player to win the prestigious Masters golf tournament.

Langer, the first German to win any of golf’s four major championships, acquired his first Masters triumph by a two-stroke margin with a 282 total, 6-under-par on the Augusta National Golf Club course that was redone by an occasional drizzle.

On the 15th, Strange looked up in disbelief when his second shot found the pond in front of the green.

It sent the leading money winner for the year on the PGA tour reeling back into the pack and paved the way for the curly-haired Langer, 27, to join South African Gary Player and the curly-haired Jack Nicklaus, once Strange’s nemesis, as the keys to his triumph.

Langer birdied both, reaching the putting surface in two and 2-putting on each.

Strange, who hadn’t even expected to play here, opened the tournament with an 80 and bogeyed both those holes. He hit into Rae’s Creek on the 13th and took two shots to get out of the little stream trickling along in a rocky ravine.

On the 16th, Strange looked up in the distance when his second shot found the pond in front of the green.

It sent the leading money winner for the year on the PGA tour reeling back into the pack and paved the way for the curly-haired Langer, 27, to join South African Gary Player and the curly-haired Jack Nicklaus, once Strange’s nemesis, as the keys to his triumph.

Tonight it is put up and shut up for fighters

HAS ANGELS AND HAGLER BATTLE

Controversy in Boston Marathon

Today's race had qualification problems last week

LAS VEGAS. Nev. (AP) - Marvelous Marvin Hagler and Thomas "Hit Man" Hearns get the chance to back up their boasts Monday night in this town where talk has always been cheap.

They will collide in a scheduled 12-round bout in a sold out, 15,088-seat outdoor arena, just a shout from the gaming tables at Caesars Palace.

At stake is the undisputed middleweight championship held for 10 years by Hagler.

"There's no question that these two millionaires are boxing power brokers. Hagler has scored 50 knockouts in compiling a 60-2-2 record in a pro career, dating back to 1972. Hearns has a 40-1 record with 34 knockouts, since turning pro in 1977."

Hearns, 26, the world boxing council super welterweight champion and former World Boxing Association welterweight champion. "I feel I can do it in three rounds."

"There is no doubt in my mind that I'll knock out Tommy Hearns. When I get into the ring, I'm a giant."

"What's going to happen after this fight is my popularity is going to grow so much that my privacy is going to be limited," said Hagler.

"There is no doubt in my mind that I'll knock out Tommy Hearns."

"I feel I can do it in three rounds,"

"You're just a freak. When I get into the ring I'm a giant."

Hearns has a 40-1 record with 34 knockouts, since turning pro in 1977.
