Washington (AP) — A Republican senator is calling for Attorney General Edwin Meese III to resign while another questions "whether the U.S. Department of Justice can function" with Meese in charge.

Sen. Alan Specter, R-Pa., planned to turn Thursday's Senate Judiciary subcommittee hearing on antitrust matters into a discussion of why two top aides to Meese and four of their assistants rocked the Justice Department's antitrust unit by handing in their resignations amid Meese's mounting legal difficulties.

Meese is the target of a broadening criminal investigation that shows no signs of ending anytime soon. Department sources say top officials quit because Meese's legal problems were "poisoning" the Justice Department.

On Wednesday, Sen. Bob Packwood, R-Ore., said flatly that Meese should resign.

Senators call for Meese to resign post

WASHINGTON (AP) — A Republican senator is calling for Attorney General Edwin Meese III to resign while another questions "whether the U.S. Department of Justice can function" with Meese in charge.

Sen. Alan Specter, R-Pa., planned to turn Thursday's Senate Judiciary subcommittee hearing on antitrust matters into a discussion of why two top aides to Meese and four of their assistants rocked the Justice Department's antitrust unit by handing in their resignations amid Meese's mounting legal difficulties.

Meese is the target of a broadening criminal investigation that shows no signs of ending anytime soon. Department sources say top officials quit because Meese's legal problems were "poisoning" the Justice Department.

On Wednesday, Sen. Bob Packwood, R-Ore., said flatly that Meese should resign.

Grad study seekers should apply now

By Kathy Campbell

Nearly 300 students have already submitted applications to Cal Poly's 15 master's degree programs for the fall 1988 quarter, and they are right on schedule, according to the graduate admissions evaluator.

"If you plan to do post-baccalaureate study at Cal Poly, you need to file an application right away," Princte Bowls said. "That way you can be sure of your options, so that if you are not accepted you can petition for further consideration or start looking at other campuses."

Cal Poly offers master's degrees in architecture, business, engineering and regional planning, agriculture, computer science. See ADMISSIONS, back page

S. Senate eye possibility of easing major-changing woes

By Alison Skratt

A business senator introduced a resolution Wednesday which might make it easier for students to change majors.

The idea was redirected, however, to the Senate's academic commission and the Academic Senate for further research.

Business Senator Nelson Chen, who authored the resolution, explained the idea behind it stemmed from the problem of students having to continue taking courses in the major they want to leave while also having to take courses in the major they want to get into.

"Some departments at Cal Poly require students to concurrently take one major class per quarter even though students want to leave their present major," according to the resolution. "This practice not only wastes class openings, which can satisfy the needs of other students, but also creates extra burden to the students that want to change majors because they tend to be incompatible with their present major."

The resolution calls for a written agreement between students and their prospective department that would allow the student at least two quarters to try to get into the major without any form of penalty. Also, no major or support classes from a student's present major would be required while pursuing a new one.

Academic Senate Chair Charlie Crabb tried to clarify the reasoning behind the present system. He explained that there are two factors that influence the department's decision to require concurrent class loads. Each department has a quota, or a limited number of students it can enroll, he said. And the budgets are ad

Poly police end book count, seek checked-out borrower

By Neil Farrell

Cal Poly police should finish identification this week of the nearly 10,000 books discovered in a San Luis Obispo storage shed, some of which were taken from libraries.

The storage shed was rented to a former Morro Bay resident, writer Jerry Gustav Hasford, whose novel "The Short Timers" was made into a movie, "Full Metal Jacket." Hasford has been nominated for an Academy Award along with director Stanley Kubrick and Michael Herr.

University Investigator Ray Berrett said some of the books have been identified as missing from libraries around the world.

"It's not your average case," Berrett said. "There are 9,816 books in the storage shed, 90 percent of them from libraries. There are 20 to 24 libraries involved." Berrett said that some of the books were taken from private collections. He said that he'd received a phone call from an individual that Hasford had stayed with in 1984 requesting help in finding 30 to 40 books that disappeared when Hasford left for London with Kubrick.

The cache also includes 70 books from a London library. Berrett said that the list of books taken from London was priceless, and showed a rare civil war era book with a damaged cover. See BOOKS, back page

My brother the sucker salesman

W ell, here we go, another quarter, and wouldn'tcha know it — I'm actually pleased and excited to be back here. School is good.

During quarter break I got the unique opportunity to watch my brother, Cameron, in action on his new job. The whole family was terribly excited that Cam finally got off his butt and entered the working world — three months after graduating from college. Certainly took long enough. Thrifty is snapping up scoops in price-winning ice cream faster than you can say "an-idiotsblistennnemmmnn." I found out the truth the first Friday night after finals. My parents and I were invited to a demonstration of Cam's new job in the comfort of our own home. Demonstration. A sales job. After all, I really felt the end was near, but still clung to the faint hope that it would be respectable. Then Cam hauled out the machine. It was a vacuum cleaner. My brother sells Kirby vacuum cleaners.

Oh sure, I should have guessed. Now I was in for the count — I had agreed to sit through the whole thing, while I could have been somewhere committing crimes against science. Oh well.

It began, his training manager, Scott, at our side the whole time.

"Ok, Cam, what now?"

"Glad you asked that, Scott, because now we're going to do you a favor of how your own vacuum doesn't even begin to suck out the real crud off your floor."

The machine, the invention of one Mr. Kirby (inventor extraordinairer), will clean your carpets, shampoo your carpets and scrub your floor. It will adjust into a sander, massage unit, paint gun or sexually explicit device and at the twist and turn of a few nuts 'n' screws, American craftsmanship beaing the Japanese again. Who said superpower-dummy! I've got a vacuum that can whip up one hell of a disaipr.

The sales pitch soon turned ugly, as I watched Cam sprinkle salt into our red, 15-year-old shag carpet, the last of his kind. And kept getting questioned.

"You're, say, you understand how the_barker works, Spt?"

Yes, yes. Go baxter yourself.

Scott began questioning my brother, as if to make sure he had sold on the product. A definite

LETTERS TO THE EDITOR

500-word essay not a true test of ability

Editor — First off, I do not presuppose myself to be a good writer. I do not even consider my ability to communicate through the grammatical or English language adequate. This brings me to what I consider to be an unfair testing method of discriminating between those students who possess a minimum knowledge and ability to write and those who do not. If you have ever had one of your other wise calm Saturdays mornings at the beginning of a quarter turned into a terrifying experience to test your proficiency, or your rate of failure to include, in cramping a 500-plus word essay in an hour-and-a-half relatively error free, you question what I am referring to. Yes, of course, the infamous Junior Writing Test, better known as the JWT.

Of course I am writing this letter because I am upset, but let's be real. Anyone who has taken the JWT knows what it is, and has told each time he cannot write for beans, especially when he considers himself competent, would naturally be pissed off. This does not mean I have a vendetta against the system. I do, however, recognize a fundamental flaw in the system. I agree there must be a method of weeding out the undesirables, but I find it hard to believe that one-third of the students who take the JWT each quarter cannot write adequately.

I recently had to write an hourlong, in-class essay in my English 240 class, and although my instructor had reservations about my knowledge of the subject, he related to me during an office visit, "Your writing is fine." Having heard this, I left his office with my grade in jeopardy but a firm belief in hav ing finally passed the JWT, and to my surprise another score of 6 appeared at the bottom of the page, which means you cannot write for beans. I immediately called the writing-skill director and made an appointment to review my essay and then began writing this complaint. It is not only a shame we are subjected to such an unfair ex-

anne, but it is a real shame it comes to me to have to write a complaint about it.

If change does come it has to come from within. I put it to the students of Cal Poly to put forth the effort to change the method of testing. We should make sure nobody graduates without the ability to write at least 500 im maculate words on an unfamiliar topic during the allotted time without so much as a dictionary to help. Who do they think we are? I do not profess to have all the answers, but I am sure if I put my mind to it I could come up with a better method of discrimination than the JWT. So how about it, do we remain docile or do we exercise our right to expect fairness?

State
Drug patients must show proof to collect damages, says court
SAN FRANCISCO (AP) — The state Supreme Court ruled Thursday that patients harmed by prescription drugs cannot collect damages from the manufacturer without proof of carelessness in making the product or in warning of possible dangers.

The unanimous decision was a victory for the pharmaceutical industry, which gained protections from thousands of potential claims by doctors and most other products.

Ruling in San Francisco suits by 69 cancer patients who blamed their disease on the anti-miscarriage drug DES, the court said the public's interest in the development of new medicines would be harmed if drug manufacturers could be sued for defects in the design of a product without proof of fault.

"Public policy favors the development and marketing of beneficial new drugs, even though some risks, perhaps serious ones, might accompany their introduction," said the opinion by Justice Stanley Mosk.

Since 1960, a consumer in California harmed by a defective product can sue without proving fault.

A plain-clothed officer was shot; House pushes for reinstatement of 1,000 air traffic controllers

WASHINGTON (AP) — Congress Thursday gave final approval to $48 million in humanitarian aid for Contra rebels and for children injured in Nicaragua's civil war.

The White House signaled President Reagan's eagerness to sign the measure.

WASHINGTON (AP) — Legislation calling for the rehiring of 1,000 air traffic controllers fired nearly seven years ago has won strong approval in the House, although the Senate has yet to consider a similar bill.

The Reagan administration has steadfastly refused to rehire any of the 11,400 controllers who were fired after they walked off their jobs in 1981. The Transportation Department has urged that such legislation be vetoed by President Reagan if it clear Congress.

The 234-180 House vote Wednesday calling for some of the fired controllers to return to the Federal Aviation Administration came two years after similar legislation was defeated by a 193-226 margin.

Supporters of the legislation argued that there are too few controllers to handle air traffic needs, especially at some of the busiest towers and traffic control centers, and that the former controllers could become trained more quickly than trainees off the street.

Rep. Gay Mollman, sponsor of the House resolution, said fired controllers should be rehired "for the sake of safety and the convenience of the flying public."

Congress breaks partisan split, OKs $48 million for Contra aid

WASHINGTON (AP) — Congress Thursday gave final approval to $48 million in humanitarian aid for Contra rebels and for children injured in Nicaragua's civil war.

The White House signaled President Reagan's eagerness to sign the measure.

The Senate voted 97-0 for the aid a day after the House broke a five-year record of partisan division on the issue and, with strong support from Democrats and Republicans, gave in to the package.

The approval ends the one-month drought of U.S. supplies flowing to the Contras.

The legislation would reverse aid to the rebels, whose U.S. support ran out on Feb. 29, and keep them together with the Sandinista government.

The legislation was made possible by the 60-day cease-fire reached by the two sides last week. The House had killed two similar bills earlier this year.

World
Panama general strike closes government; food lines swell

Panama City, Panama (AP) — The government shut its doors Thursday for the long Easter weekend and left thousands of public employees without paychecks for the second time in a month, facing a black holiday.

The streets of Panama City, filled with anti-government demonstrators in recent days, were eerie quiet, virtually abandoned by pedestrians and vehicles by mid-afternoon.

With government offices and ministries closed and most businesses and industries shuttered by an 11-day-old general strike, the largest congregations of people were found in welfare agency food lines.

Leaders of the National Civic Crusade were meeting to plot new strategies in their frustrated effort to force out Gen. Manuel Antonio Noriega.

"We'll be talking over the weekend, discussing where we go from here," said Roberto Almanza, an attorney and director of the Crusade, a coalition of professional, business, labor, political and other groups.

Former Venezuelan President Carlos Perez said he understood Noriega had promised to resign in May.

Palestinian rebellion leaders want riots during Shultz' visit

HERODION, Occupied West Bank (AP) — Leaders of the Palestinian rebellion called Thursday for riots during the visit of Secretary of State George P. Shultz next week, and Israel's prime minister vowed to crush the uprising.

Soldiers shot one Palestinian dead, bringing the Arab death toll to at least 124 since violence began Dec. 8 in the occupied West Bank and Gaza Strip, where 1.5 million Palestinians live.

An Israeli soldier also has been killed.

Israeli officials said they would lift a three-day closure of the occupied territories late Thursday.

Issuance of Leaflet No. 12 from leaders of the rebellion indicated Israel had not removed its leadership despite mass arrests last week of more than 1,000 people, including those Israel said were responsible for publishing the leaflets.

Arabs known to be involved have said that, if the Israelis caught some of them, other people would be ready to take their places.

American ambassador quits after Shultz-PLO meeting

JERUSALEM (AP) — Benjamin Netanyahu Thursday said he resigns as Israel's United Nations ambassador to protest Secretary of State George P. Shultz's meeting with two Arab-Americans linked to the PLO.

The meeting raises a larger question of the value of American commitments to us when we have made huge concessions to obtain these guarantees," Netanyahu told The Associated Press, referring to a 1975 American promise not to meet with PLO members.

Netanyahu's resignation was the strongest message yet from Israel regarding its displeasure over Shultz's meeting five years ago with two members of the Palestine National Council, the PLO's self-declared legislative body.

Prime Minister Yitzhak Shamir, meanwhile, sharpened his attack on the session with Edward Said and Ibrahim Abu Louhdi, both American citizens.

WASHINGTON (AP) — Legislation calling for the rehiring of 1,000 air traffic controllers fired nearly seven years ago has won strong approval in the House, although the Senate has yet to consider a similar bill.

Surreal piece wins show

An orthopaedic leg with what appears to be a simple cardboard box resting on it may not be what more visitors to the University Union Galerie would expect to find. But they will.

Rene Bihan’s “Space & Dream: An Exploration into the Surreal Landscape” is the title of the unopened leg and is designed as a journey beyond the rational. Bihan’s piece was awarded Best of Show at the Galerie’s second annual juried student art exhibition and will be displayed there until April 25, along with 34 other student pieces.

The theme of this year’s exhibition, “Art Without,” was chosen to encourage students to search within themselves for uniqueness and creativity, according to Galerie Director Jeanne LaBarbera. And Bihan’s work reflects just that.

“The excitement of Rene’s piece is that it wants people to touch, interact and think,” LaBarbera said.

Bihan, a senior landscape architecture major, said he originally designed the piece for his senior project and entered it in the exhibition after an art major saw it and suggested he do so. He said the piece explores relationships between man and his environment, including man’s alienation and inter-relation with it.

The cardboard box on top of the leg is meant to be opened and explored by anyone. After coming into the “virgin forest” that allows access into the box, numerous layers of drawings and poetry are found. The search ends with a recorded message from Bihan which tells the participant there is no single correct interpretation of his work.

“The piece is part of an exploration into surrealism,” Bihan said. “I am dealing with the problem of language and understanding.”

Bihan said he wants it to be a piece without an identity because he wants the viewer to complete the piece.

“I don’t want to explain the piece,” Bihan said. “The person who says he understands it doesn’t.”

LaBarbera said “Space & Dream” is a one-on-one work, an interactive piece of art. She added it is best understood if a person is alone while experiencing it, focusing on thinking.

“The reactions will differ and that’s OK,” LaBarbera said. “There’s not one correct response to it, just as there’s not one correct response to life.

“The piece was chosen (as Best of Show) because it captured the jury’s attention. It speaks to us. It goes beyond funk and novelty. It is far more than a student prank, it is a statement about society,” she said.

“The original impact and the sampling experience is a marvelous, whole experience.”

In addition to Best of Show, three pieces were awarded honorable mentions. They are Michelle Frey’s acrylic titled “Stacey,” Brent Martin’s airbrushed “332,” and Matt Faye’s “Silens,” which combines airbrush and painting. Frey, Martin and Faye are art and design majors.

LaBarbera said the jury awarded honorable mentions to “say a little something extra.”

“We’re saluting the mastery of the media and the imagination of the artists,” she said.

LaBarbera added that all submissions were outstanding but factors such as space do not permit every entry to be exhibited.

A four-person jury selected the 35 pieces to display in the Galerie from about 50 entries. The jury consisted of an arts professional, a non-arts professional, an art student and a non-arts student. The works were chosen on the basis of originality and impact.

This year’s student exhibition also includes a sampling of 14 student-designed posters from the “Poly Bowling Challenge” which the jury selected to recognize the student’s creativity.

The Galerie exhibit is free and will be on display Monday-Wednesday 10 a.m. to 5 p.m., Thursday 10 a.m. to 4 p.m. and noon to 4 p.m. on weekends.

Alda's 'New Life' too reminiscent of his past

By Ken Miller
Special to the Daily

Alan Alda is one of the most talented entertainers around today. His 25-year-long popularity stems to this day. To anyone who has seen one of his movies or the TV show "M*A*S*H," his acting ability is readily apparent, but few people realize he is also an accomplished writer and director. He has only warmly welcomed the writer-director-actor cap twice: for "The Four Seasons" and "Sweet Liberty." Now, Alda checks to see if these things come in threes with his newest opus, "A New Life.

The title "A New Life" is ironic, however, since very little in this film can be called new. Producer Martin Bregman and Alda (who have worked together on "The Seduction of Joe Tynan, The Four Seasons and Sweet Liberty") have molded a movie that, while having a few strong points, is too reminiscent of past Alda movies to be called an original work.

The plot of "A New Life" is fairly simple; Alda plays a stock trader who ignores his frustrated wife (played by Ann-Margret). The result: they divorce; he remarries; she decides to do so in this case. If you've not seen previews, be forewarned: Alda has changed his appearance. Whether or not it's for the better is up to the viewer to decide. Instead of his instantly recognizable jet-black hair and five-o'clock shadow, he now sports a graying beard and ear hair, a Robert Redford clone.

Despite its lacks focus on one character's adaptation to single life, this film shows how both characters adjust. This refreshing angle makes the film worth at least one viewing, but the lack of invention on Alda's part soon becomes tiresome (his fear of dealing with the delivery of a baby, given a bulk of the movie's running time, was already covered in "Same Time, Next Year").

Alda's supporting players should be well-known to viewers of prime-time television: Mary Kay Place (Mary Harron, Mary Harron), who is given little to do, and Hal Linden ("Barney Mitzvah"), who gives a predictably charming performance as Alda's best friend. Unfortunately, Linden's character grows insubstantial in a short time, which is the main problem with this film: by the time the film is over, most of the characters have way outlived their welcome (except for Alda, who has the talent of making exasperation diverting).

I usually don't make references to characters' personal appearances, but I feel compelled to do so in this case. If you've not seen previews, be forewarned: Alda has changed his appearance. Whether or not it's for the better is up to the viewer to decide. Instead of his instantly recognizable jet-black hair and five-o'clock shadow, he now sports a graying beard and ear hair, a Robert Redford clone.

Superior tied to the meandering "Sweet Liberty," this movie is still flawed. If this mullflikker filmmaker ever finds his rock, he could conceivably eclipse Woody Allen and Orson Welles as the most successful writer-director-star in the American cinema. Unfortunately, he finds a distinct stagnation of his talents in "A New Life."

jotted according to the number of student credit units (the number of students enrolled in the classes) that the department generates each quarter. The more SCUs generated, the larger the budget.

Therefore, said Crab, when a department has students who are not taking its classes, the number of SCUs is diminished, but its quota remains the same. This means that its budget is reduced, but it still has the same number of students to take care of, therefore reducing its effectiveness. So most departments require students to continue with their present studies to keep funding at its present level.

The inverse works for the departments that the students are trying to get into, which are generally the business and engineering ones, said Crab. They get more SCUs for the same number of students, which means they get more resources at the cost of the departments that the students are leaving.

This is why most departments are "a little leery of letting people float" between majors, said Crab, because the department suffers for it.

Most departments encourage students to make the change in a hurry, he said, because otherwise they're just generating more SCUs for other departments.

Usually students are allowed one quarter to make the change, but the two-quarter minimum suggested by the resolution "might be acceptable to some departments," he said. "I can't imagine a department letting them go for more than two quarters."

Crab also mentioned that Cal Poly's policy of declaring a major just aggravates the problem for indecisive students. Increased retention rates that occur when students are required to begin immediately taking major courses are one of the main reasons behind not having an undeclared major. Most campuses allow for an undeclared major, but Cal Poly believes its policy is imperative to its outstanding educational reputation.

This information led Engineering Senator Tom Lebens to suggest that the idea go to the senate's academic commission for more research. The motion was passed unanimously. The issue will also go to the Academic Senate for review and discussion.

Baseball splits two games

The Mustang baseball team has the weekend off after splitting a pair of CCAA games with Chapman College Tuesday and Wednesday, bringing their overall record to 17-6 and their CCAA record to 6-4.

The team will travel to San Jose State Monday for a non-conference showdown over the weekend.

After taking a 1-0 lead into the seventh inning Sunday, the Mustangs gave up two unearned runs, and the final score was 2-1.

Mustang pitcher Lee Hansen gave up three hits and struck out 10 in the loss, bringing his record to 6-4.

Wednesday's game evened the score for the Mustangs, as they came out ahead 6-5.

Cal Poly took a 2-1 lead into the seventh inning, and scored two in the seventh and two in the ninth to bring the score to 6-2.

The Mustangs gave up three in the bottom of the sixth, but were able to hold on to the lead.

"The Mustangs showed the determination and the character," said head coach Sam Park,

Winning pitcher Erik Bratien now is 7-5 on the season.

Women's track at Irvine

The women's track team will travel to Irvine Saturday to compete against perennial Top Ten Arizona, Division I Long Beach State and San Jose State.

The Mustangs spent last Saturday practicing at Stanford Invitational and returned with two national qualifiers in the 10,000m run. "I'm very happy," said Amanda Marks followed with a personal-best time of 35:30.9.

The distance medley relay team of Arterie Atin, Erin Erer, Tenna Colebrook and Sydney Thathcher finished first with a time of 11:39.32, as did the 4 X mile relay team of Sherri Mink, Melanie Krist, Kris Kochel, and Thathcher at 20:31.20.

Three matches facing men's tennis

The men's tennis team is up for a busy two days. The Mustangs will take on Rollins College today on the Cal Poly Pomona campus. They've got two CCAA matches scheduled for Saturday, with the first at 10 a.m. and the second at 1 p.m. Cal Poly Pomona at 3 p.m.

Cal Poly began the week with a 9-6 overall record, 4-1 in conference.

The Mustangs finished eighth in the CCAA this season and puts him seventh on the all-time Cal Poly list.

Men's track also on the road

The men's track team will also be traveling to Irvine for a tri-meet with Arizona State and UC Irvine.

The Mustangs are 4-4 overall, 3-1 in the CCAA, after last week's 5-3 win over Long Beach State and a 4-5 loss to Irvine. The Mustangs are 4-4 overall, 3-1 in the CCAA, after last week's 5-3 win over Long Beach State and a 4-5 loss to Irvine.

Two more Mustangs qualified for the NCAA Division II National championships, bringing the total to seven.

Hurder Mike King remained undefeated in the 400-meter hurdles turning in a national qualifying mark of 52.51.

The time ranks him second in the CCAA this season, and puts him seventh on the all-time Cal Poly list.

5th-seeded gymnastic team competing for national title

The gymnastics team, hoping to finish the season on a high note, is competing in the United States Gymnastics Federation National Championships today and Saturday at Springfield College, Springfield, Mass.

The Mustangs qualified for one of four at-large berths after their second-place finish in the USGF Regional Competition last month at Seattle Pacific. They are seeded fifth in the eight-team competition.

In addition to a sixth-place national finish, the highest national finish ever for a Cal Poly gymnastics team.

Softball to host Hayward

The softball team will host non-conference rival Cal State Hayward today at 1:30 p.m.

The Mustangs placed second in last week's 11-team field in the Cal Poly Pomona Tournament. En route to a first place finish in pool play, Cal Poly took the 1-0 upset loss in the title game, 1-0. The Mustangs also defeated the University of Nebraska, 7-6, 9-8, and the University of Oregon, 9-3.

Last week the Mustangs traveled to Hayward where they faced and defeated Grand Canyon College and the University of Oregon, both with a score of 3-4.

PREVIEW WEEKEND

where the identification card had been found.

Berrett said his department filed a complaint with the San Luis Obispo County District Attorney's office Thursday. After the department reviews the complaint it will probably issue a warrant for Hasford's arrest, according to Berrett.

"He moves around so darn much that it's been hard to find him," said Berrett.

The case at Cal Poly began when Kennedy Library officials asked university police for help in collecting $3,000 in late fees owed by Hasford, and in retrieving some 84 books checked out on Hasford's associate library card. After obtaining a search warrant for the storage shed, university police discovered the books and magazines March 17, packed away in 360 boxes.

Berrett said that many of the books are stamped "sold," but may not have been.

"He has his own stamp," Berrett said. Identification of the books has been slow because many of the identifying marks used by libraries have been removed or blurred out.

Berrett said that investigators were contacted by Sacramento police looking for 54 books missing from Sacramento. He said that 162 books from that library had been found.

"We found books that had been listed as missing or lost," Berrett said. "The cataloguing of the evidence has been real time consuming. We've listed them by title, author and I.D. number. Then it takes four hours to run the list on the computer.

If the district attorney's office issues an arrest warrant, Hasford could be charged with grand theft, for the $1,900 worth of books taken from Cal Poly, possession of stolen property and burglary, according to Berrett.

"Extradition to other states and even to England could be involved, if they want to prosecute," Berrett said. The F.B.I. has been brought in, according to Berrett, to help with contacting the libraries involved.

The case has been given national media attention, Berrett said. "Time Magazine was here to do a story and The L.A. Times was in here for two and one-half hours."

Hasford is believed to be in Orange County, Berrett said. Hasford's lawyer contacted Berrett and expressed a desire to straighten the situation out.

MEESE

From page 1
You finally reach a place where there is a cloud of suspicion, a sufficient cloud of suspicion, that I think you owe it to the president to remove yourself," he said.

Specter declined to call for Meese's resignation, but said the attorney general needs to answer questions about the resignation of specific officials.

"There's no doubt in my mind that it is very harmful to the Republican Party and could hurt our nominee in the fall," Specter said.

"It is even more harmful to the country, I'm concerned as an American."
