President Baker says he favors new Rec Facility

By Angela Darnell

The proposal for a new Recreation Facility is an excellent one that students should really consider, President Warren Baker said in an opening statement during a panel discussion Thursday on campus.

Four panelists were present to answer questions about the proposal and to give students a chance to learn about the facility before they vote, said Jennifer Smagala, moderator of the discussion.

The panel included Dwayne Head, physical education department head; Shelly West, chair of the University Union Advisors Board; Roger Conaway, ASI Executive Director; and John Rembao, Research Coordinator.

Such a facility is needed to improve the quality of life for students, said Baker. "We have a very active student body and we have evidence of a limitation of events that can be scheduled for students' needs."

The problem is how such a project can be financed, said Baker. Full state support for building a rec center would get low priority, he said. "It is generally state policy not to fund such facilities."

Baker said that "students need to look at whether or not this is an appropriate investment in improving the quality of life at Cal Poly." That is, the facility would have to be built between the Physical Education building and the Health Center at the intersection of South Perimeter Road and Via Casa.

Approximately 100 faculty and staff parking spaces in the Health Center parking lot would be lost while the facility is under construction and five would be lost permanently.

The cost of building the facility is jointly funded by the state (41 percent), said Head. The price of the proposed facility is $10.7 million. The state would be the primary financier of new capital outlay programs is not as tight as it was before the new engineering building, near the library, was built. But there is not enough lab space for some programs, said Gerard.

The proposed Rec Facility would be built between the Physical Education building and the Health Center at the intersection of South Perimeter Road and Via Casa.

Resource efficiency needed

By Susan Harris

To ensure the ecological future of the state, the people of California need to develop long-term perspectives, said a University of California Press editor and writer in a speech on campus Thursday.

Ernest Callenbach's speech, "A Sustainable Future for California," was the second in the "California Vision" series sponsored by the School of Communicative Arts and Humanities.

People usually see matters with a short-term view, said Callenbach, but a longer, or ecological view is needed for maximum resource efficiency.

Budget has funds for remodeling

By Craig Andrews

The Governor's 1986-87 Budget proposes allocates money for blueprints to remodel the Engineering East Building and plans for a new Dairy Science Center at Cal Poly.

The Engineering East Building was built in 1957. Electronic innovations have changed equipment standards since that time, said Cal Poly Executive Dean Douglas Gerard, who is in charge of capital outlay programs.

Air conditioning will be installed in some parts of the existing building to cool electronic equipment. Also, electrical service will be renovated in some areas to facilitate new equipment needs, Gerard said.

Classroom space for engineering programs is not as tight as it was before the new engineering building, near the library, was built. But there is not enough lab space for some programs, said Gerard.

The proposed Rec Facility includes:

- Multi-use gymnasium with space for three full-sized basketball courts, six volleyball courts or 12 badminton courts, and equipment with movable bleacher seating for 2,800
- Large weight room with Nautilus equipment, Universal machines and free weights
- Exercise room with mats for aerobics, martial arts and wrestling and a holding capacity of 100
- Gymnastics room with a holding capacity of 50
- Nine racquetball courts
- Twenty-five yard pool behind the existing outdoor pool
- Locker room and shower facilities
- Equipment room
- Ticket office for concerts and sporting events
- Rec sports office

The price of the proposed facility is $10.7 million. The state would be the primary financier of new capital outlay programs is not as tight as it was before the new engineering building, near the library, was built. But there is not enough lab space for some programs, said Gerard.

The proposed Rec Facility would be built between the Physical Education building and the Health Center at the intersection of South Perimeter Road and Via Casa.

Approximately 100 faculty and staff parking spaces in the Health Center parking lot would be lost while the facility is under construction and five would be lost permanently.

The cost of building the facility is jointly funded by the state (41 percent), said Head. The price of the proposed facility is $10.7 million. The state would be the primary financier.

Lottery funds are subject to debate

When Gov. George Deukmejian refused a request from the California State University Board of Trustees to fund certain items differently, some budget officials said it was a matter of interpretation.

Certain CSU expenses which received funding from the Lottery Educational Fund will probably continue being lotteried-funded next year. But the trustees had asked to support those items through normal state funding.

The California Lottery is only supposed to be used to supplement the educational till. It is not intended to be substituted for normal state support.

Using lottery money to pay for what the state normally pays for would mean lottery opponents' initial fears were well-founded. California voters did not intend it, and the law opposes it.

But there is a gray zone containing some budget items which could be interpreted as falling into the lottery fund category. For example, a $7 million was allocated for instructional replacement equipment under the 1985-86 Lottery Fund. Indeed, the expense was new — and therefore special.

But there are new expenses in every budget. Should the state pay? Or should such items have to depend on the lottery?

What is disturbing is that the CSU Board of Trustees and the California Department of Finance disagree on every item currently supported by lottery funds.

We hope this conflict between the Trustees' request and the Governor's stand holds adifference in interpretation.

It would be disquieting if the state suddenly made needed programs dependent on the gambling whims of residents.

LETTERS TO THE EDITOR

NASA letter writer has no sympathy

Editor — I am writing in regards to the letter of Karen Teys ("Space Shuttle blew away our tax dollars." 100: What is her problem? Seven Americans died in the worst space flight disaster in history, yet all she can think about is wasted dollars! Has she no sympathy for those people (family, friends, students) who have lost loved ones? It is a matter of interpretation.

BRIAN CHURCH

Reader responds to anti-shuttle letter

Editor — In response to Karen Teys' letter of Jan 30, I realized everyone's right to their own opinion and ignorance. Of course she doesn't remember Apollo 15 landing on the moon, she's only 18 years old now.

JANET Dillard

Mustang Daily

The Editor reserves the right to edit all contributions submitted for publication and may determine the size and typeface of all contributions. The College of Business and Management and the journalism department do not guarantee the accuracy of any information or illustrations contained in this newspaper.

The intent of the space shuttle program is to provide a reusable orbital vehicle to efficiently retrieve, repair and deploy satellites in orbit. This program has been and will be aided through corporate/private investment — all of these points save your precious tax dollars. The "millions of dollars" Teys said NASA "blew away" were no more than just a scratch the multi-trillion dollar deficit.

READER REPORTS TO THE EDITOR

The Teacher in Space Program has nothing to do with teaching classes from space. The program is intended to provide teachers who can pass the experience on to you and me. I don't know where Teys heard "you can't even get qualified teachers and professors to teach in schools on earth." I know a quality teacher who was one of the 100 from California alone who applied for the Teacher in Space Program.

She is a high school and college English and aviation teacher as well as a flight instructor. She also happens to be my mother.

I asked her if she would still consider going on a shuttle mission. She said, "If they asked me tomorrow, I wouldn't hesitate." I'm glad that not everyone has lost faith in the shuttle program.

BRIAN CHURCH

Shuttle blow-up loses lives, not just money

Editor — Once again I find myself in awe at how little some people engage their brain before opening their mouth, to paraphrase a common saying, in Karen Teys' letter to the editor, she said that it would be "OK" for NASA to spend millions of dollars on the space program if they did a sufficient job at it. She went on to say that she "had her doubts when she watched NASA blow up millions of dollars within 72 seconds on public television." The people at NASA, like everyone else, want to keep their jobs, but they don't go about it by blowing seven people in a fiery explosion while their family, friends and the world looked on.

I think it could have been more sensitive on Teys' part to have at least waited until the news broke before saying that the world wasn't that important to people. I'm glad that not everyone has lost faith in the shuttle program.

MARGARET EVANS
Interpol still on hunt for Nidal

PARIS (AP) — Interpol has relayed a "wanted notice" worldwide for Abu Nidal and turned over the case of the feared Palestinian terrorist leader to a newly formed anti-terrorist unit, the chief of the international police agency said Thursday.

Raymond E. Kendall, Interpol secretary general, said the alert went out last Saturday to police forces in 138 countries. Both he and Italian authorities, seeking Abu Nidal in connection with the bloody terrorist attack at Rome's airport Dec. 27, say they do not know where the fugitive is.

Libya and Syria, which have been accused of aiding the Abu Nidal group, were among the member countries receiving the notice.

Judge dismisses Diablo suit

LOS ANGELES (AP) — Superior Court Judge Michael Tynan has ruled in favor of anti-nuclear demonstrators who blockaded the Diablo Canyon nuclear power plant and were sued by plant workers, attorneys say.

"The dismissal of the suit was based on the court's finding that non-violent civil disobedience is protected by the First Amendment of the Constitution," San Francisco attorney Kathleen Fisher said at a Los Angeles news conference Wednesday.

Letters to the Editor

Senator lacks debate because it's efficient

Editor — Although Steve Dunton is a former student senator, he should be familiar with the fact that as senate members change, the dynamics of the senate also changes.

This year's senate works together, not against each other. These senators have worked together to make legislation that works for everyone. Ironing out the wrinkles during workshop and informal meetings helps smooth rough spots that would otherwise create controversy.

Workshop meetings do not eliminate dissertation; they provide awareness and information. Senators spend the extra hour every week to establish an outstanding attendance record, with only five absences during the entire Fall Quarter. Workshop provides interaction between senators to make confrontation obsolete.

Senators have made every effort to obtain reliable information from as many sources as possible. Student opinion is researched prior to meetings, then carefully weighted for its impact.

Senators listen keenly to the needs and desires of students. They listen to the campus clubs, student councils, and special groups on a variety of issues that directly affect students. The senate meets is not the place to begin research and hear student opinion. It is the place to take action, to pass or fail legislation.

Debate exists. People affected by any resolution do appear to make known their opinion. The senate listens, debates, then decides. The process is streamlined by senators working together.

Letter Policy

Mustang Daily encourages reader's opinions, criticisms and comments. Letters and press releases should be submitted to Room 226 of the Graphics Arts Building. Cal Poly, San Luis Obispo CA 93407. Letters should be shorter than 250 words, must be typed and include the writer's signature and phone number. Editors reserve the right to edit all letters for length and style and omit libelous errors. Letters will not be published without the author's name.

CSU to require proof of immunization in fall

By Kathy Kent

New and reenrolling students at the California State University system will be required to show proof of measles and rubella immunization beginning fall quarter, according to a Chancellor's Office report.

The purpose of this requirement is to prevent outbreaks of measles and rubella on CSU campuses. Dr. James Nash, chancellor of the Health Center, cited cases at a Christian Science college where there was an epidemic of 338 cases of measles, resulting in three deaths.

Chancellor Ann Reynolds said, "Last year there were disturbingly high incidences of measles and rubella at universities in the East and Midwest. By taking orderly steps, we can avert possible outbreaks on our California campuses, which would impede the normal progress of afflicted students in their academic programs."

The requirement, according to Reynolds, was a result of advice received from the American College Health Association, the Centers for Disease Control and the California Department of Health Services. If effective, the requirement will lead to total immunization of CSU students by the early 1990s.

According to Nash, the Cal Poly Health Center will offer the immunizations free to those requiring the shots. "We've been offering free immunizations, but now it's a requirement," Nash said.

The Chancellor's ruling includes new students and students applying for readmission for fall quarter that were born after Jan. 1, 1957. Staff and faculty under the age of 30 will also be asked to show proof of immunization, Nash said.

According to an executive order from the Chancellor's Office, the immunization will also be required of "certain groups of enrolled students who have increased exposure to these diseases. These groups include dorm residents, students who received their primary and secondary schooling outside of the United States and students enrolled in dietetics, student teaching or field work involving children or health care.

Exemptions from the immunization requirement will be granted on medical grounds or because of religious or personal beliefs. Those with leukemia, organ transplants, or AIDS should not be immunized, according to Nash.

If the requirement is not met by spring quarter 1987, a hold will be placed on registration materials until it is met.

Those born between 1957 and 1968 are at the greatest risk of contracting either measles or rubella because of the vaccination used at that time. It is less effective than the vaccination developed after 1968. According to Nash, the first vaccination intended only to be temporary with another shot given during teenage years.

The details of the new policy haven't all been worked out yet, Nash said. It is not clear whether the Health Center will keep records of who has been immunized or if it will be handled by the administration. "Everybody agrees it's a great idea, but nobody wants to do it," Nash said.

Funding of the immunization program is also a problem. According to a Health Center report, the measles-rubella vaccine costs $10.38 a dose. Nash said that if a student isn't sure if they have had any type of vaccine, the Health Center will give them the measles-mumps-rubella vaccination, which costs $12 a dose. Nash said the Health Center may be receiving the vaccines from the State Health Department, but it is still tentative.

Nash said he has had reports saying that 30 percent of the college population has no immunity to rubella, but he found through his own Cal Poly survey that 12 percent of the campus population has no immunity to rubella.

"Rubella is not much of an illness unless you're pregnant," Nash said. Twenty-five to 50 percent of the babies born to women who had rubella during pregnancy are born with birth defects. Measles is a potential threat to college students because it can result in severe ear infections, brain inflammation and, in extreme cases, death.

Shuttle launch still planned for California

The Associated Press -

While crews gathered debris from the space shuttle Challenger off the Florida coast Wednesday, California officials said the loss of the seven astronauts and work continued for a mid-summer shuttle launch at Vandenberg Air Force Base.

At the base near Lompoc Air Force Base, Rick Sanford said preparations will continue on the launch site because no one has told the Air Force to stop.

He said tests of the shuttle launch complex fuel systems' piping were being conducted Wednesday.

The site is being prepared for the first West Coast launch of the space shuttle Challenger. It had been scheduled this summer, but the National Aeronautics and Space Administration officials said Tuesday all shuttle flights were canceled until the cause of the Challenger explosion is found.

Sanford said Vandenberg has been given no other instructions. "The network news has been our primary source of information," he said.

Spokesmen for Martin Marietta and Lockheed Martin, the major contractors on both coasts, were not making formal statements. Martin is the maker of the shuttle's huge fuel tank and Lockheed is the spacecraft's ground servicing contractor on both coasts. Challenger was carrying a $100 million tracking and Data Relay Systems Satellite that was to have enhanced communications with unmanned orbiting shuttles in polar orbit.

Dr. and Mrs. Jerome Radding of Fresno received a telephone call Tuesday from their daughter, Barbara Morgan, an elementary school teacher from McCall, Idaho, who was the alternate for Mrs. McAuliffe. "The last thing she told us she's OK," Radding said.

"Oh, God. It's really a tragedy," Morgan said. "I'm not aiming at all now for her to go into space.

In San Pedro, Elfiiredc Teeling said she harbored no worries until Tuesday. "What happened yesterday is just a tragic day. It makes you realize when you see something happening," she said.

Her daughter, Dr. Anna Fisher, and son-in-law, Fred Teeling, have both been members of crews guiding the orbiter Discovery into space.
Spike's makes a move

Beer lovers, take note: Spike's Place is moving! In another month the Spike's many Cal Poly students have come to know and love will be leveled. The site of many prodigious drinking feats will soon be a parking lot.

A popular student hangout since it opened on Poly Royal weekend of 1981, Spike's won't be moving far — just a few feet. It will still be located in the Creamery on Higuera Street.

The original owner and manager, Bob "Spike" Speicher, said he and his staff will try to resurrect the same ambiance. "The people that come in here get a better taste of San Luis Obispo than at any other restaurant in town, and that's not going to change," he said.

So why the move, Spike? "We're going to be able to seat 30 more people, and in the winter we won't lose half of our tables because of the weather," he said.

The new building will have an open atmosphere, more like a cafe, Speicher said. The entire front of the restaurant will be covered with French doors and windows. The tables will be bigger, the bar will be longer and there will be more wall space, he said.

Wall space doesn't sound important, unless you've been to Spike's, for the walls are almost completely covered with more than 6,000 tiny metal plaques.

Each plaque signifies somebody's "Trip Around the World," that is, drinking a bottle of each beer Spike's sells — all 40 of them. In addition to the plaque, a T-shirt is given to successful travelers which states that the journey has been completed.

Speicher said all the plaques will be removed with a hot air gun and mounted at the new place.

He said about 20 percent of them might be destroyed, but they have a record of every plaque ever given, and will replace any that are damaged.

Anyone who completes three trips around the world at Spike's is given a personalized white mug which is stored at the restaurant. The mugs cover the walls behind the bar, and if they get dusty, demonstrating a lack of use, they are hung on the ceiling.

The beers at Spike's aren't just the standard beers found in a liquor store, either. They are imported from countries such as Thailand, Czechoslovakia, Jamaica and Sweden. In addition, the beer list is changed every month, thanks to Chuck Hiliged, the resident beer expert.

Speicher said he thought he knew a lot about beer until he met Hiliged. "I doubt you could name a beer that Chuck couldn't identify. I mean ancestors, ingredients, brewing method — everything. He's on a constant search for knowledge of beer. He's intense."

Spike's is known for something else besides beer — potato skins. Speicher said he had worked at other restaurants that served potato skins, but they were only topped with chicken and cheese. "I saw skins as a vehicle, like two pieces of bread," he said.

Speicher originally came to San Luis Obispo to watch his brother play football at Cal Poly. He said he fell in love with the town when he wrote out a few checks and no one asked for identification, even though he was from out of town. "There is major trust in this town," he said.

Speicher wanted to open a fully-stocked bar, but the price of a liquor license was prohibitive, nearly $90,000. He didn't want just a beer bar, so he decided to serve potato skins and nachos along with a wide variety of beers. He and his wife Candy got $17,000 together, and Spike's was born.

Speicher said he is proud of all the different items on the menu. "Spike's is a great place to go if you don't know where you want to go, and you don't know what you want to eat!"

Speicher started another Spike's in Santa Barbara, but sold it in September when he couldn't stand to be away from his family. The restaurant in Santa Barbara is still called Spike's, though.

Speicher said the San Luis Obispo restaurant will be called The Original Spike's.

"We do want to expand," Speicher said, "but I won't leave San Luis Obispo. It will be a franchise type thing."

The current Spike's had to be built into a small existing building with its limited indoor space. The new location will have more indoor space and will allow more flexibility in the design. "It's the product we want to take on the road," he said.

For those who would like to learn more about beer, Speicher said there will be a beerfest in the Creamery parking lot sometime in March. More than 125 beers will be available, and almost every country that brews beer will be represented.

It will be one of the largest beer tasting events in the state, and because all the beer will be donated, almost every cent will go to charity — Hospice and the San Luis Obispo Symphony. The donation is $10, and includes a commemorative pilsner glass.

Frank Loving, a merchant marine based in San Luis Obispo, was recently sitting at Spike's bar drinking out of a black mug. Asked how many trips around the world it takes to get a black mug, Loving said, "Only 10. I'm on my 31st card here, and my ninth in Santa Barbara."

Loving said he is in favor of the move because it will be less crowded. He's just happy he'll still have Spike's to visit. "I don't like a bar. I like coming in here," he said.

By David Eddy
A dance concert scheduled to open Thursday night in the Cal Poly Theatre features original student and faculty compositions.

The concert, "Dance: The Ultimate Expression," is performed by members of the Orchesis Dance Company, a combination of a club and a class. To become a member of Orchesis, auditions are held in September. Those who are selected are enrolled in the corresponding class. Techniques in jazz, ballet and modern dance are taught.

A tremendous amount of work goes into assembling a production. "Putting on a show of this magnitude is hard sometimes," said Sanford Smith, a speech communication major and president of Orchesis. The majority of rehearsal time takes place on weekends and during the scheduled class times.

"I don't know how they get their homework done," said Peter Kentes, theater and dance department professor.

Previously, Orchesis performed one concert a year, but Smith said they have added a concert in the spring. Half of this concert will be performed by Orchesis and guest artists and local dance companies will also be invited to perform.

According to Kentes, finances played a role in the addition of a matinee performance this weekend. "The income from the ticket sales, after expenses, goes to Orchesis. ASI also gives money to Orchesis."

This is the first time that Orchesis has scheduled a matinee performance. Kentes said, "We hope to draw a younger, more community crowd." Because of this, Orchesis is adding a performance of "Chicken Little," an English folktale. This piece was choreographed by Moon Ja Minn Suhr, the founder and artistic director of the company.

The concert also has input from outside sources. Music faculty member Antonio Baran has composed a piece of original analog computer and electronic-generated music, to which Kentes has choreographed a number dealing with abstract and concrete thoughts about time. Physics professor Dave Smith choreographed a dance based on "A Whale for the Killing," by Farley Mowat.

During the remainder of the year, Orchesis will focus on learning dance techniques and preparing for the spring concert. Classes with guest lecturers will also be held, along with trips to other areas to attend classes and performances of other productions.

Additional performances of "Dance: The Ultimate Expression" are scheduled for tonight and Saturday at 8 p.m., and a matinee Saturday at 1 p.m. Tickets are available at the University Union Ticket Office, priced at $5 for students.
The Great American Melodrama and Vaudeville presents "Sour Dough," a Western musical about a struggling widow and her daughter. Following the play is a country-western vaudeville show. For reservations call 489-2499.

Rocking The Spirit tonight and Saturday is local favorites The Plumbers. On Sunday, blues guitar great Roy Buchanan performs. Thursday, there's new wave a capella with the Bobs.

Alex McFee performs "original music" 7:30 p.m. Thursday at Coalesce Bookstore in Morro Bay. Call 772-2880 or 346-9083 for more information.

8000 TOTAL SQ. FT.

PROGRAMS

* Aerobics taught by trained fitness instructors.
* Personalized fitness programs designed to suit all body types.
* 6 different types of aerobic exercises, with varying levels of difficulty.
* Staff of over 15 trained instructors to help you with your questions.
* New class: non-impact aerobics, call for details.

MALONEY'S GYM
3546 S. Higuera, SLO 541-5180

Friday, Jan. 31, 1986

THEATER

The Best of Times — Kurt Russell and Robin Williams star in this comedy about "life, hope and getting even." Madonna Plaza Theatre.

The Color Purple — Whoopi Goldberg portrays Celie, a young black woman living in a small Georgia town at the turn of the century. Steven Spielberg directs this adaptation of Alice Walker's Pulitzer Prize-winning novel. Festival Cinemas.

East of Eden — James Dean stars in this story of sibling rivalry. Starting Tuesday at Rainbow Theatre.

Heavy Metal — Music with animation. Midnight at Fremont Theatre.

Iron Eagle — Louis Gosset Jr. goes to the mid-east in search of a colonel who was shot down from his plane. Mission Cinemas.

Murphy's Romance — Sally Field plays a divorced mother who falls in love with a widowed pharmacist (James Garner). Mission Cinemas.

My Chauffer — It's a comedy about a female chauffeur. Madonna Plaza Theatre.

Nightmare on Elm Street II — Title is self-explanatory. Festival Cinemas.

Quiet Earth — A man is all alone in the world. What will be do? Festival Cinemas.

Rebel Without a Cause — James Dean and Sal Mineo star in this classic about troubled youth. Starting — Tuesday at Rainbow Theatre.

Runaway Train — Three passengers (two of whom are escaped convicts) are trapped aboard an out-of-control train. Jon Voight and Eric Roberts deliver powerful performances. Madonna Plaza Theatre.

Spies Like Us — Dan Ackroyd and Chevy Chase portray (surprise!) bungling idiots. Bay Theatre.

Twice in a Lifetime — It's been compared to "Terms of Endearment." Guess that says it all. Festival Cinemas.

White Nights — So the plot is slightly stretched — the dancing by Gregory Hines and Mikhail Baryshnikov is fantastic. Madonna Plaza Theatre.

Murphy's Romance. Mission Cinemas.

Young Blood — Rob Lowe stars. Fremont Theatre.

It's the remarkable Beijing Wushu Team Touring Exhibition, performing at 7 tonight at the Main Gym. More than 20 team members will demonstrate Chinese martial art. Tickets are available at the University Union Ticket Office and are $4 for students and $5 at the door.

“Dance: the Ultimate Expression” is the theme for the annual concert for the Cal Poly Orchesis Dance Company, performing tonight and Saturday at 8 p.m. at the Cal Poly Theatre, with a matinee performance 1 p.m. Saturday.

The deadline for registration to participate in the eighth annual Mardi Gras is Monday. There is no charge for joining the Feb. 8 parade and participants may march, dance or ride on floats. Registration is at Michael's Delicatessen on Higuera Street.

Heading this week at Bo Zany's Comedy Outlet is Wm Randolph's is Randy Lubas with Leslie Norris and Leo. Nine Shows start at 8 and 10 p.m. an I.D. is required.

Submissions to Spotlight Calendar must be received by 5 p.m. Wednesday for consideration for Friday publication. Send to Spotlight, Mustang Daily, Cal Poly, San Luis Obispo, 93407.
Twice in a Lifetime

Dull film about dull people

By Robert Chancey
Special to The Daily

"Twice in a Lifetime" is that wretched rarity: a movie that squanders material that could potentially illuminate small, intimate secrets in everyone's lives.

Writer Colin Welland and director Bud Yorkin attempt to reveal the tragedy of the modern American marriage — that comfort and complacency in the home can only lead to divorce.

"Twice in a Lifetime" simply wallows in its banality; the movie is so insufferably boring, it could place an insomniac in a coma.

Welland has tried to honestly depict the lives of a suburban Washington steelworker Harry Mackenzie (Gene Hackman), his wife Kate (Ellen Burstyn) and their two daughters.

He intends to display Harry and Kate as an enormously typical middle-age couple — weighed down by small talk and separate, but equally unappealing, careers and hobbies.

Welland only succeeds in showing (as he did in "Charlies of Fire") that he can create amazingly dull, stereotypical characters.

"Lifetime" pretends to show how a marriage can crumble. Harry and Kate's 30-year-old bond deteriorates when Harry receives a birthday kiss from the curvy barmaid Audrey (Ann Margaret), and he instantly leaps into an affair with this woman!

The movie has stretched credibility until it snapped — Harry is so stupid and such intolerable company that the only way he could nab Audrey is with hypnosis.

The movie isn't an examination of divorce; it's a middle-aged male's fantasy. Women are naive and ignorant and want to get married simply for security. Men are clever enough to see through that ruse — it only took that dope Harry 30 years — so, they shack up with young, voluptuous nymphomaniacs. Oh, brother.

The entire cast delivers their dismal roles to dismal perfection, especially Burstyn, who makes Kate as lifeless as a bowl of week-old gravy.

Maybe the cast shouldn't be blamed. After all, they were only taking orders from the two culprits who brought forth this mess, Welland and Yorkin. No better punishment exists for these two men than to be locked in a screening room for a year with their movie.

Hoffman to join Cannon

LOS ANGELES (AP) — Dustin Hoffman has signed with Cannon Films to play a retired Secret Service agent caught in a blackmail scheme in the film adaptation of Elmore Leonard's "LaBrava."

The deal brings together one of Hollywood's most bankable actors and an Oscar winner and a studio that in the past has been known largely for low-budget exploitation films, although Cannon has turned out such serious films as "That Championship Season," Sam Shepard's " Fool For Love" and "Runaway Train."

Menahem Golan, chairman of Cannon, confirmed that Hoffman had signed, but declined to discuss the fee.

Women travel to Pomona

The Cal Poly women's basketball team will travel to Pomona Friday to take on the number one-ranked Broncos of Cal Poly Pomona and will then return home to play Sacramento State University Saturday.

"We're going to have to play above our heads," said assistant coach Jill Orrock, referring to the game against Pomona.

The Pomona game is a big one. The Broncos are in sole possession of first place in Division II of the California Collegiate Athletic Association with a 9-1 league record. But the Mustangs are not on their trail in second-place with a league record of 4-1.

Orrock said the key match-ups will be between the Mustangs' Shetzie Ateberry and the Broncos' Vicki Mitchell and between the Mustangs' Carol Mills and the Broncos' Michelle McCoy.

"Of all of the teams in the league, we'll (Mustangs) give them (Broncos) their best competition," Orrock said.

The game against Sac State Saturday is a grudge match. The Mustangs have played Sac State twice this season and split games, 1-1. The game Saturday night will be the "rubber game of the series," Orrock said. "They'll (Sac State) come out fired up — they want to beat us badly." Tip-off for the Saturday night game will be at 7:30 p.m. in the Cal Poly Main Gym.

Hoopsters face two on road

The Cal Poly men's basketball team is on the road this weekend.

The Mustangs will travel to Los Angeles Friday to take on Cal State Los Angeles and then on to Cal State Northridge.

The Mustangs, 14-4 overall and 4-1 in league play, have a tough game against Cal State Los Angeles. The Golden Eagles have won 11 games straight and are in first place in Division II of the California Collegiate Athletic Association with an 11-3 overall record and a 5-0 league record.

However, should the Mustangs win, they will be tied for first place in CCAA Division II with Los Angeles.

The Mustangs will also play Cal State Northridge Saturday. The Mustangs should have an easier time handling the Matadors, who are 8-9 overall and 1-4 in league play. If they come home with two more wins under their belts this weekend, the Mustangs have a chance to be the soleprotectors of first place.

Mustangs ready for baseball season

By Tim Robinson

It may not seem possible, yet nevertheless it's time for Cal Poly to play baseball again.

The World Series has barely had a chance to fade from memory, and now the sounds of well-hit baseballs can be heard echoing from the baseball diamond at the northwest end of the campus. The sounds don't deceive the ear; baseball is, indeed, back.

"Pitching is going to tell the tale for us without a doubt. If we don't pitch well, we're not going to be successful, so I hate to put a lot of pressure on our pitching staff but they know what they have to do," said Steve McFarland, head coach of the Cal Poly baseball team. "They've been working hard at it and I don't think it's any secret that it depends on how well we pitch."

The Mustangs did help themselves in the pitching department during the off-season with the acquisition of Mike Schulz, Mike Milner and freshman Lee Hancock. Schulz and Milner, both junior college transfers, are expected to be placed in the Mustangs' starting rotation right away.

"Those three (Schulz, Milner and Hancock) are going to have to come to the top and be our three-four-five pitchers, and complement Mike Berringer and John Briaire, our two returners from last year," said McFarland.

Despite the question mark at pitching, the Mustangs have one of their better defensive units in recent years. At catcher, sophomore John Orton might be a candidate for all-American by the end of the year.

"I think our catcher is probably our strongest position with John Orton and we also have capable back-ups in Mark Renfree and Bob Wright," said McFarland. "We are very strong defensively this year. Johnny is probably one of the best catchers in the country. I think he's gained a lot of confidence and has become the type of leader we need behind the plate."

McFarland is also pleased with the quality of his infield and outfield. In the infield the Mustangs have returners at first-base in Dominic Constantino and Marc King. However, McFarland has several players competing for both second base and shortstop.

We have three quality kids at each position. At second base right now, we've got Joey Key, Matt King, brother of Mark King, and Harvey Martinez who was at shortstop last year," said McFarland.

There are at least two players vying for the shortstop position. They are Scott Reeves, a junior college transfer from College of the Sequoias, and Don Poirier, a red-shirt from last year. There is also an uncertainty at third, where John Stevens and Scott January will be the two main candidates.

Among the outfielders, there are two junior college transfers with Eric Baysinger in leftfield and Jeff Smith in center.

"I'm satisfied with the outfield, I think we have a great defensive outfield with our two junior college transfers, Eric Baysinger and Jeff Smith, who have stepped in for us as excellent outfielders. They give us a lot of speed defensively as well as offense," said McFarland.

Yet, as the new season gets under way, hope springs eternal, and for the Mustangs, who begin their 1986 season on Saturday against Cal State Hayward, it may already feel like déjà vu.
REMODELING

From page 1

used more efficiently, said Gerard.
The blueprints, budgeted at $160,000, will include plans to build a second level on the building to hold 29 faculty offices and the department office.

In addition to the Engineering East Building remodeling project, Cal Poly may get a new dairy.

Preliminary plans to replace the Dairy Science Instructional Center will be underway next year if the proposal passes. The present dairy was built in 1953 from relocated buildings originally constructed in the 1930s.

Gerard said the new building would be built in sections so that instruction could continue in parts of the old building.

He said the present location is the best site for a campus dairy. It is on a slope and has good drainage.

Costs for planning the new dairy center and drawing blueprints are budgeted at $270,000.

Gerard said the Engineering East project is budgeted less because most of the planning stage has already been completed using this year’s budget money.

Construction costs for the Engineering East project are estimated at $3.4 million. Costs for building the new dairy are estimated at $4.5 million.

An estimated $850,000 in equipment expenditures for installing instructional equipment into both projects when completed will probably be in the 1989-90 budget.

The Governor’s Budget will go before the legislature for approval later this winter. Gerard is optimistic both projects will be approved.

An equipment expenditure of $890,000 is planned to be included in the 1987-88 budget for a Dairy Science Products and Technology Center. If approved, Cal Poly would get an up-to-date food processing center.

FACILITY

From page 1

would also provide an additional $590,000 a year for operating costs.

If the proposal passes, student fees would be increased $34 a year beginning in Fall 1987.

The facility would be completed and opened by 1991.

Students can obtain detailed information on the proposal at the University Union information desk and the Recreation Sports Office.

The Republican congresswoman said her indictment in Los Angeles last week had no bearing on her decision to reveal her longstanding marriage plans.

"I just decided perhaps it’s time," she said.

Fiedler and Clarke were indicted on charges they offered to pay off state Sen. Ed Davis’ campaign debts of $100,000 if Davis would quit the race for the GOP Senate nomination.

The three-term congresswoman from suburban Los Angeles said she received an “absolutely wonderful” reception from House colleagues when she returned to the Capitol following a court appearance on Monday.

"I really didn’t know how people would react," she said. "All I knew was I hadn’t done anything wrong and I had every right to continue conducting business on behalf of the 21st district," Fiedler said in a telephone interview.

Fiedler said one of the first things he asked for support was Rep. John Dingell, D-Mich., powerful chairman of the House Energy and Commerce Committee. She said Dingell, a former prosecutor in Michigan, “had some very serious legal advice for me.”

"The real culprit is Davis, who tried to push me out of a race he knew I was going to win," the congresswoman said of the former Los Angeles police chief.

WASHINGTON (AP) — President Reagan assured guerilla chief Jonas Savimbi on Thursday he wants to be "very helpful" to his campaign to oust the Cuban-backed government in Angola, and the administration suggested it wants to give aid secretly rather than openly.

Savimbi, leaving the White House, pronounced himself satisfied.

Reagan, dressed in a dark business suit, and Clarke, in wing chairs in front of a low-burning blaze in the fireplace.

"We want to be very helpful to what Dr. Savimbi and his people are trying to do; and what we’re trying to arrive at is the best way to do that," Reagan said.

The administration reportedly is seeking up to $15 million in aid for Savimbi, who was trained as a guerilla fighter by Mao Tse-tung and other leaders of the Chinese revolution.

Fiedler plans to wed co-defendant

Washington (AP) — Rep. Bobbi Fiedler said Thursday she plans to marry her top aide and co-defendant in a California indictment charging they tried to pay a campaign rival to quit the U.S. Senate race.

"I realize we’ve made some time ago," Fiedler, 48, said of her plans to marry Paul Clarke, 39, her executive assistant.

The Republican congresswoman said her indictment in Los Angeles last week had no bearing on her decision to reveal her longstanding marriage plans.

"I just decided perhaps it’s time," she said.
