Voting in progress

Onshore oil resolution to be on June ballot

By Susan Harris

The resolution also calls for a special municipal election to be held with the statewide primary election June 3 to amend the city zoning regulations. 

A county organization, Voters for Responsible Oil Development, is now collecting signatures to put a similar proposal for county land on the November ballot.

San Luis Obispo City Councilman Robert Griffin said the organization has been criticized because its oil initiative came out after a facility on the Nipomo Mesa was proposed and halfway through the review process.

Griffin said, "One objective is to get this proposal passed before any project gets underway in the city." There are as yet no plans to develop onshore support facilities within the city.

The resolution states, "This council is determined that the establishment of onshore support facilities for offshore oil and gas development is a matter of grave concern to the people of this community," and "the voters should have the final authority to establish any zoning districts."

The resolution, titled Measure D, will be on the June 3 ballot, and will ask if the Municipal Code should be amended to allow onshore support facilities with voter approval.

Council amends permit of frat house

By Susan Harris

The San Luis Obispo City Council voted Tuesday night to amend the use permit of the Alpha Upsilon fraternity house on Palm Street with stringent new conditions.

In a four-to-one vote the City Council adopted 12 conditions which the fraternity must obey or suffer possible revocation of its use permit.

Councilwoman Penny Rappa was the only member to vote "no" on the amendments. She said her concern was for wanting to revoke the permit stemmed from the incompatibility of the fraternity's social gatherings and parties in a residential area.

Some of the new conditions for the use permit include: limiting hours for outdoor activities; allowing only members of the fraternity to attend parties and meetings at the house; and possible revocation of the use permit by the City Council if complaints are received.

Mike Schmahl, president of Alpha Upsilon, said he was happy with the amendments. "It was what we agreed on in early November before the Greek Review Board," Schmahl said about the condition concerning members-only parties.

Because of complaints by neighbors in December 1985, the San Luis Obispo Planning Commission favored revocation of the permit, but this action was appealed by the fraternity to the City Council in January.

The Council voted on Jan. 21 to uphold the appeal of the fraternity and to set conditions on the use permit.

Schmahl said the fraternity plans to relocate before the use permit expires on June 30.

What was the last book you read and when?

Al Savay, city and regional planning senior: "Nine Tomorrows," by Isaac Asimov. It was a compilation of science fiction stories I just finished reading. Before that I read a Bradbury compilation. I like contemporary fiction as well.

Del Rae Klepper, corporate fitness specialist: "Children of Dune" by Frank Herbert. I just finished it up this weekend. I've been working on it for two months. It was the third one I really wanted to finish.

Greg Stone, mechanical engineering senior: "Tortilla Flats" by Steinbeck. I'm a big fan of Steinbeck. It depicts real people. I can see a lot of my friends in it. I started it this summer and I'm still finishing it.

Denise Nordstrom, speech communications senior: "Eddie Bee's Bike Book." I'm going to start bike racing, get information on workouts I need to do, training. I read it over Christmas break.

Steve (Torch) Irwin, biology junior: Actually, I don't do a lot of reading. I read Surfer Magazine.

LETTERS TO THE EDITOR

Students should read with a 'critical eye'

Editor — I'm astonished at the acts of vandalism committed to thwart the passage of the proposed rec facility. Sunday night, at about 9 p.m., two vandals were seen running from the railroad trestle over Highland Avenue. These individuals had just destroyed a 35 foot banner that was hanging over the trestle costing about $250. Tuesday evening more vandals attempted to destroy campaign materials by spray painting posters throughout school.

I question the morals and sense of fair play for these senseless outbursts of destructive behavior that can only feel sorry that they chose this method to vent their feelings on the rec facility. I urge anyone witnessing these acts of destruction to please contact the campus Police Department at 546-2281.

MUSTANG DAILY

Gas? Gearshift? What is this 'G' stuff?

I was out driving and this little red light on my dashboard goes on. Gee, I wonder what that's for? Well, there's a 'G' next to the light. Let's see — Gas. No, my gas gauge doesn't work. Okay, how about gearshift? Now, that's ridiculous. Gasket, that's it, my gasket's not working! Come on Andy, now you're starting to sound like an idiot.

When I get home, I ask my roommate who owns a VW too, "What's 'G' stand for?" "Gas, I think." "Terrific. Do you have an owner's manual?" "Sure, it's here somewhere ... oh, here it is. I took it out of the car because I spilled coffee on it."

Splendid. Now it's moldy and all the pages are stuck together. "Let's see ... the little blue light is for high beams." "Check." "The little red light with the 'G' is ... covered with mildew."

The next day my car doesn't start. Deja vu. So I have it towed to the repair shop and tell them to take a look.

"Well, it looks like your generator's shot."

"So that's what 'G' stands for. I always thought generator started with a 'J'."

"What?"

"Never mind, how much is this going to cost?"

"With parts and labor about $160."

"160 bucks? No, not the Porsche. I'm the guy with the VW Bug."

"I know. It's $160. We might be able to do some minor repairs, but you'll probably be back in next week for a new generator anyway."

"All right, all right. Do the work."

As I'm driving away I hear this rattling noise in back. I stop the car, lift the hood and ... it comes off in my hands. So I drive back to the shop. "Hey, look at this!" I yell at the service agent.

"Oh, yeah, the mechanic said your hood was loose."

"Well, don't you think you should've told me before it came off in my hands?"

"You mean the thing that's sitting on the freeway or something?"

"Okay, bring it in tomorrow and we'll fix it."

The next day I take my car in and they fix my hood. As I'm driving home, I notice my car's not running too well. I open the hood and half my engine's missing. Hey, where's my air filter? Where's my smog kit? That cost me 60 bucks! So I drive back to the shop, again. "Can I have the rest of my engine, please?"

"What?"

"I'd like the rest of my engine."

"Huh?"

"Don't tell me you're holding it for ransom. Wasn't 160 bucks enough?"

Finally, a mechanic appears with the missing parts and puts my engine back together. Funny, my car hasn't run the same since.

Students should read with a 'critical eye'
Booster may have been found

CAPE CANAVERAL, Fla. (AP) — NASA sent a second ship Wednesday to an area 30 miles from Challenger's launch pad to search for an object that could be the ill-fated shuttle's suspect right rocket booster.

There have been strong sonar "hits" in that area, indicating that the booster may be there in 1,100 feet of water. The Independence, a booster recovery ship, was steaming in that direction to join another such ship, the Liberty Star.

The Independence carried a robot submarine capable of photographing the object, but NASA said plans for its use were undetermined because of a choppy sea.

Sources reported, meanwhile, that ships had recovered 17 feet of explosives from a "destruct package" that was on the side of Challenger's main fuel tank when it lifted off. The explosives had not been detonated, the sources said, removing them from the list of possible causes of the catastrophe.

Marcos criticizes opposition

MANILA, Philippines (AP) — President Ferdinand E. Marcos, in his last rally before the election, Wednesday accused his opponents of sowing hatred and revolution during the bitter presidential campaign.

Speeaking in a Manila park during a heavy rain, Marcos addressed these remarks to Mrs. Aquino and her supporters:

"I ask my opponents to stop what they have begun. You have sown an atmosphere of hatred, anger and revolution. Now I say to you, the government of the Philippines is not defenseless," Marcos said on the last day of campaigning allowed by law for Friday's presidential election.

Public is indoctrinated rather than educated

Editor — I agree with certain aspects of Pete Brady's column entitled, "Americans can Distinguish Good from Bad." I too believe that censorship is the worst form of government control.

Brady however ignores the fact that the media has incredible political power over the majority of ill-informed Americans. I'm not saying that people vote for a candidate because of an advertisement on television, but it remains true that those with media power have great advantage over those without it. The media is a tool that the politically successful have learned to manipulate, either through their personality, issue involvement, or the ability to pay for the high cost of coverage.

Media emphasis is on the visual, the exciting and focuses on the obvious. It is clear that Americans are politically indoctrinated rather than being educated. I learned about democracy in pre-school and never even heard about the Kremlin until the pro-American philosophies were firmly rooted.

Television only enhances the indoctrination process and inhibits us from developing the power of unbiased, open-minded opinions.

I agree that people should be able to say what they want; this creates a free flow of ideas vital to retaining an unstaginated society. All I ask is that people take everything with a grain of salt and think about what they read and hear. The media, like everything else, is opinionated.

Academic Senate may have study of women's issues

By Craig Andrews

A measure to establish a permanent committee to study women's issues and status at Cal Poly will be on the Academic Senate agenda for next week.

The Academic Senate Executive Committee decided Tuesday to put the resolution on the agenda because of a recommendation by a special committee appointed to examine the need for a permanent committee for women's studies.

No program for counseling women re-entering the workforce or advising graduates about work in non-traditional fields exists on campus, said John Rogalla, who chaired the special committee. Also, Cal Poly lacks a women's studies academic program and resource center.

Cal Poly is one of a few California State University campuses without a committee to examine the status of women, said Nancy Lowe, who served on the special committee.

Last fall the CSU system held a conference to study women's issues at the state level. The state conference prompted the Academic Senate to create its own committee at Cal Poly, said Lowe.

Rogalla was appointed by Lloyd Lamouria, Academic Senate chair, because he is the chair of the Constitution and Bylaws Committee. Language regarding a new committee for women's status is being developed at this time, he said.

A resolution opposing Accuracy in Academia and a resolution to make senior projects optional for individual departments were deferred until Friday. There was not enough time to act on the two resolutions, due to a visiting evaluation team appointed by the CSU Chancellor's Office to collect data on the performance of Cal Poly President Warren Baker.

HOW does a man come from the Russian shores of the Black Sea through the blitzkrieg of Nazi Germany to the comfortable office of the mayor of San Luis Obispo?

With many adventures and against all laws of nature, Mayor Ron Dunin would say.

Many papers do a profile story on their mayor, few end up with a portrait of a homeless child in Russia, a Polish soldier, a four-time escapee of prisoner of war and internment camps as well as a 20-year resident of San Luis Obispo.

Ron Dunin was born in Russia, March 8, 1918, but his life's circumstances were being shaped by world events before his birth.

"My Polish parents were deported to Russia before I was born. At that time deportation was an everyday occurrence in Poland," Dunin said.

"I was a student and I'm sure just as rebellious as any student at anytime," said Dunin. One sunny Sunday morning the Polish police surrounded the campus of the Warsaw University and put the entire student body, Dunin's parents included, on a train to Russia.

It was in Russia, near the Black Sea, where Dunin was born. The year was 1918 and the Black Revolution had started the year before.

"I don't remember much about Russia," Dunin said. "My mother died in the Revolution during that time, and I hardly remember her."

In 1924, Dunin's father was arrested by the Russians and then escaped back to Poland.

"I was a child-of-the-street, handed to anyone that would feed me," Dunin recalled. "It was terrifying."

Upon reaching Poland, his father sent someone back to Russia to find him, Dunin said.

But after making his way back to his father and Poland, Dunin said he found hostility toward him there, too.

"The children resented me because I could not speak Polish yet," Dunin said during his childhood years he'd grown up speaking Russian. "Father took me out of school and I was tutored at home."

Dunin is 78 years old and attending a law university when he was conscripted into the Polish army to fight against Hitler's troops.

"I was conscripted August 2, 1939," Dunin said. He then attended an artillery academy and was sent to the Black Sea.

Within the first three weeks of September 1939 German armies raced across Poland. On Sept. 27 Warsaw fell to Hitler and the Polish government went into exile.

Dunin, assigned to a regiment in Krakow, was taken prisoner by front-line German troops.

"We were housed in our own barracks for the first two weeks, before being transferred to another camp," said Dunin.

It was while being transferred by train to a camp in Germany that Dunin made his escape.

"The train was passing through my home town. I had sent word along that I would be coming through," Dunin said. The people of the communities were allowed to come out and give the prisoners baskets of food at the railroad stops, so a friend gave him a basket containing a shirt, pants and hat. Dunin said he hopped off the train in the darkness and the guards, hearing the noise, fired into the fields where they thought he would escape.

"I hid in the dark, close to the train. They had their lights on the field. I retreated back toward the train and the platform when they began shooting into the fields."

On the platform the friend had left a basket of food and Dunin said he grabbed it as a German guard came around the corner.

"I held up the basket as if to give it to the prisoners in the train and the guard told me to leave, 'get lost!"' So, Dunin left — with his new clothes and the basket of food and made his way back to Poland.

In Poland he contacted his younger brother and three cousins. On a tip from a German official who was also a school friend, Dunin learned he was to be arrested that night and the five family members fled to Czechoslovakia.

"We were arrested there but escaped and then split up because we were too obvious a group," Dunin said. "My brother and I went together but I have never heard from my three cousins again."

From there the brothers traveled to Hungary and then Yugoslavia.

"We were captured in Hungary and placed in internment camps for six months," Dunin said. In the internment camps, Dunin explained, men of military age were detained and "neutralized" so they would not fight against the country in which they were held.

Dunin and his brother were held in three different camps but finally escaped to Yugoslavia.

"To escape was not as difficult at this point in the war as it would be later," Dunin said. "At this time we were guarded by front-line troops. I did not go through the terrible days of the S.S. troops guarding the camps. When you were a prisoner of a front-line troop they would remember you were a soldier,"

The internment camp guards were often sympathetic to the prisoners plight and would even aid in their escape, Dunin said.

"I was there when France fell in 1942," Dunin said. He was captured by the Germans and was deported to Britain.

Dunin lost track of his brother but has since learned he is living in Argentina. He last saw his father at Christmas, 1939. Through contacts in Poland, Dunin said he discovered he and his father had just missed each other by hours as they passed on their way to separate prison camps in Hungary. His father died in 1968 in Poland.

In Britain Dunin worked on the staff of a Polish resettlement camp.

It was while in Scotland at a skating rink he met his wife whom he calls "my inspiration."

The Dunins moved from Britain after the war and settled in California.

"My daughter was on vacation and discovered San Luis Obispo," said Dunin. A visit to the city, the Dunins settled here in 1965.

"I have been involved in the community for 20 years now," Dunin said. "I had no political aspirations when I arrived."

"When we came to San Luis Obispo we were accepted in six months," said Dunin. "When you come to a new community it doesn't owe you anything. When you are accepted into a community you have to give as much as you can when you take out."

Dunin said he was proud to be mayor of such "broad-minded community that would elect a small, dumb man with a thick accent, that is not very good political material."

Sitting in his quiet chambers Dunin said, "This is a long, long way from where I was born, not only in distance but in experience."

Doctors should help prevent AIDS hysteria, expert says

BOSTON (AP) — Reassuring evidence that AIDS is not spread through casual contact should encourage doctors to work harder at quelling hysteria and preventing discrimination against those who risk catching the disease, a health expert says.

A study of people who live in close daily contact with AIDS victims found that none of them caught the virus, even though they often share bathrooms, eating utensils and beds.

"We conclude that the risk of transmission of the virus during close, long-term contact has to be extremely, extremely small, approaching zero. That is very reassuring," Dr. Gerald H. Friedland, who directed the research, said in an interview.

New England Joum ^ of Medicine, along with an editorial by Dr. Merle A. Sande, chief of medical services at San Francisco General Hospital. The findings were first publicized last fall when Dr. Martha F. Rogers, a co-author of the report, presented them at a meeting in Minneapolis of the American Society for Microbiology.

Sande noted that the chance of catching AIDS is remote for all except homosexuals, drug abusers who share contaminated needles, people getting tainted blood transfusions and children born of AIDS-infected mothers.

He said doctors should oppose proposals for universal AIDS screening and quarantining AIDS victims, as well as the exclusion of infected students from classrooms and adult victims from their jobs.

Friedland, a physician at Montefiore Medical Center in New York, conducted the study with researchers from the U.S. Centers for Disease Control.

Friedland said some physicians, especially those who don't treat AIDS patients, have been slow to accept the idea that AIDS is extremely difficult to catch except through sex or blood.

"There is still a lot of skepticism," he said. "I think physicians have been susceptible to the AIDS hysteria epidemic, perhaps not as much, but to some extent, as the general population."

The researchers examined 68 children and 33 adults who lived with AIDS victims for an average of nearly two years. Only one of these family members—a 5-year-old girl—caught the AIDS virus, and the researchers believe she was infected before birth.

They said most of the families lived in poor, crowded conditions that would ordinarily be expected to facilitate the transmission of contagious diseases.

Acquired immune deficiency syndrome has struck more than 16,000 Americans; experts estimate that between 1 million and 2 million more are infected with the AIDS virus but no one knows how many of them will get sick.

Summarizing some recent AIDS findings, Sande wrote:

□ The AIDS epidemic appears to be slowing in some areas. In San Francisco, only 5 percent of AIDS-free homosexual men acquired the infection between 1984 and 1985. He did not give any earlier figures for comparison.

□ The incidence of heterosexual spread of AIDS remains low. Throughout the United States, there have been 152 reported cases of transmission from men to women and 28 from women to men.

CARDS

From page 1
On the backs of the cards, children find a variety of citations, including such things as a "Bully License" or a permit to eat junk food between meals.

Topps Chewing Gum Inc., which is better known for baseball cards and Bubble gum, cannot manufacture bubble gum, cannot manufacture the cards fast enough to meet demand, said Norman Liu, a spokesman for the Brooklyn-based company. He said demand was high in all regions of the country, but he declined to release sales figures.

Why are the cards popular?
"Kids like them because their parents don't like them," said Rick Anguilla, editor of Topps and Hobby World, a trade magazine. "Once kids know they're not supposed to have them, they just want them even more."

Topps, which sold its first Garbage Pail Kids last June, was unsure what sparked the fad, although several newspaper articles and a syndicated column about the cards appeared shortly before sales took off, Liu said.

The cards come in packs of five and sell for 25 cents. That includes a stick of chewing gum.

"I'd say there are only about five kids in my class who aren't collecting them," said Bo Belt, a 9-year-old fan in San Francisco. "Twenty-five out of 30, that's pretty good."

Guadalupe Rico-Pena, a counselor at the Alvarado Elementary School in San Francisco, said the violent images on some of the cards can be harmful.

"If the child was already being exposed to violence in the home, these cards could reinforce it," she said.

In Greenwich, Conn., the cards were banned from the private Brunswick School because students were playing with them instead of doing their work. Students were "just getting distracted away," said Principal Rob Peterson.

Similar bans were enacted at elementary schools in Ossining, N.Y. and Montrose, N.Y., when principals were concerned with students swapping and selling the cards during class.

Liss said the company has received about 100 complaints from parents.

"Any time something is that popular, and kids bring them to school where their friends are, these things happen," said Liss. "We certainly don't want to disrupt classes, but the cards are very, very popular."

Frances Schachter, the supervising pediatric psychologist at the Metropolitan Hospital Center in New York, said the cards were not something that parents should get overly excited about.

"It is unimportant in the overall scheme of things," she said.

But she added, "I think there is a kind of general threat to traditional authority and it's bad for kids. Kids are being too early exposed to things. I think this kind of thing is just one more added to the undermining of traditional values. But I think we could do without it."

'Purple,' 'Africa' top Oscar list

BEVERLY HILLS, Calif. (AP) — "The Color Purple," the struggle of a poor, black Southern woman for dignity, and "Out of Africa," a romantic tale of a Danish writer, led the field with 11 Oscar nominations Wednesday — but were snubbed "Purple" director Steven Spielberg in his bid for artistic acclaim.

"Prizzi's Honor," a black comedy about a lovesick Mafia hitman, and, "Witness," the adven­
tures of a Philadelphia cop in Amish country, each captured eight nominations. The list of contenders for best picture of 1985 was rounded out by "Kiss of the Spider Woman," about a revolutionary and a homosexual who become friends in jail. It had four nominations in all.

The 58th annual Academy Awards will be presented March 24.

The nominations reflected the independence of Academy of Motion Picture Arts and Sciences voters. They were unswayed by the big bucks of 1985's biggest box-office hits.

"Back to the Future" could manage only the song and writing nominations and two for sound, and "Rambo — First Blood, Part II" muscled its way only to a mention for sound editing.

Stand-up comic Whoopi Goldberg was nominated for her role as the downtrodden farm wife in "Purple."

"It's amazing," Goldberg said in a statement read by her publicist Nan Leonard. "I'm grateful and very excited."

Also named for best actress were Anne Bancroft as the stern mother superior of "Agnes of God," Jessica Lange the country singer Patsy Cline in "Sweet Dreams," and Meryl Streep as the Danish novelist Isak Dinesen of "Out of Africa."

Geraldine Page, the homeward-bound Texas woman of "The Trip to Bountiful," scored her ninth nomination. The 61-year-old actress has yet to win.

Page, who learned about her nomination while rehearsing in New York City, said, "I'm so happy about it. I'm happy for all of us who worked on the film."

Jack Nicholson, the cool hitman of "Prizzi's Honor," and Jon Voight, the escaped convict of "Runaway Train," were nominated for best actor, along with first-time nominees Harrison Ford, the detective on the run in "Witness," James Garner, the small-town pharmacist in "Murphy's Romance," and William Hurt, the homosexual prisoner of "Kiss of the Spider Woman."

Shuttle astronaut may get master's

LOS ANGELES (AP) — A master's degree in management will be given posthumously to astronaut Gregory B. Jarvis, who died with six other crew members during the space shuttle tragedy, a college official said Wednesday.

"We are going to consult with Mrs. Jarvis and, providing she approves, we are going to award the degree posthumously to her in Greg's name at any appropriate time and place," said Norman Oglesby, dean of the business college at West Coast University.

Jarvis' 42-page, handwritten thesis was received by Oglesby in the mail the day after Jarvis and his crewmates died when the shuttle Challenger exploded shortly after liftoff from Kennedy Space Center, Fla., on Jan. 28.

Oglesby said completion of the thesis entitled Jarvis, who was 41 and lived in Hermosa Beach, to a master of science degree in management science, which is similar to a master of business administration but with more emphasis on statistics and analysis.

"His thesis was to study the book 'In Search of Excellence,' a very popular book on excellence in business management, and to relate that book to his work at Hughes' Aircraft in El Segundo, Oglesby said.

West Coast University is a small, private college established in 1909 and based in Los Angeles, with branches in Orange, San Diego and Santa Barbara.

Jarvis had planned to become the first person to accept a degree in space.

No stopping shipments of nuclear fuel

LONG BEACH, Calif. (AP) — Mayor Ernie Kelly conceded there isn't much he or the city can do to block the federal government's plans to ship spent nuclear fuel through the Port of Long Beach.

But he said he believes the U.S. Department of Energy will try to relieve residents' fears about possible hazards of the shipments.

The department intends to bring spent fuel rods from a reactor in an Asian country to the West Coast by ship. The rods, in steel casks lined with lead, are to be unloaded at the port 25 miles south of downtown Los Angeles and then trucked to South Carolina.

Eighteen shipments are planned over a two-year period beginning in March.

"I think the DOE will do it," Kell said of the shipments. "But I'm confident that they will address our issues ... and relieve our fears."

How you gonna get a job without a resume?
Rivera, Wells help push Mustangs into battle for first

By Joe Packard
Special to the Daily

The Cal Poly men's basketball team is tied for first place in the California Collegiate Athletic Association with a 6-1 league record.

And instrumental in the team's success has been the play of its guards, Chico Rivera and James Wells.

Head coach Ernie Wheeler said before the season began that if the Mustangs were going to do well in the California Collegiate Athletic Association they would have to get good play from their guards.

The Mustangs are currently tied for first place after the first round of conference games and indeed the team has gotten good play out of its guards.

Wells and Rivera, both seniors, have been guards since their days on the playground, but neither has played their current guard positions until this season.

Wells is the "quarterback" of the team at the point guard position, directing the team and calling different offenses. Rivera plays the off or shooting guard position, allowing him to put the ball up from outside.

Both players have adapted to their new positions easily. "They have both performed well," said Wheeler. "The switch has allowed us to use their respective talents in a way that has been most beneficial to the team. And I'll tell you, not many people know about Wells, but he has been a jewel. A year ago this time we were losing the close games. This year we're winning them."

Wells, an industrial technology major from Lynwood, played two years of basketball at Rio Hondo Junior College in Whittier. He played at the shooting guard position where he was all-league.

James Wells has contributed to the Mustang's success this season at point guard and leads the team in assists and most valuable player both years. "The biggest change for me is not being the big scorer on the team. Before they always used to look to me to do the scoring, but now my job is to hit the open man."

Besides leading the team in assists, Wells has done some scoring of his own, averaging more than eight points per game and hitting a season-high 14 points in last Friday's huge win over Cal State Los Angeles. Wells has also been a clutch free-throw shooter this season, making 83 percent of all attempts and 92 percent of league attempts.

Rivera, an economics major, is used to being a distinguished athlete and he's got the awards to prove it. He was all-league as a football defensive back and a basketball guard and was most valuable player to the basketball team.

At Cuesta College he was all-conference in basketball both years he was there.

For the Mustangs this season Rivera has been what a good shooting guard should be — productive. He is Poly's second leading scorer, behind former Cuesta teammate Sean Chambers, busting for an average of 11 points per game.

Mustangs healthy, rested

**Grapplers prepare for post season**

By Tim Robinson

Staff Writer

After resting most of the week, the Cal Poly wrestling team will be in La Mirada this Saturday for the Biola Tournament, and it may be their best and last shot at tuning up for the PCAA championships.

The rest gave the Mustangs an opportunity to heal some of their wounds which have plagued them all season. It may also be a launching point for the Mustangs' drive for post-season play.

"One of our goals at the start of the year was to qualify as many people as possible, and this could be a good start to put the push on for the NCAA's," said Lenis Cowell, head coach of the Mustang wrestling team.

Cowell, in his first year as a head coach, still believes that the Mustangs can do well in both the PCAA and NCAA championships. They must, however, hope that they can stay healthy until then.

The Mustangs, now 9-13-1, beat San Jose State last Friday 26-19. It was only the second dual meet win in their last eight. The deciding match was in the 190-pound weight class, where David Lashtam took a technical decision over Scott Benson of San Jose.

There will also be another much-needed face in the Mustangs' lineup this Saturday, as Jesus Coranado will wrestle in the 142-weight class. Coranado, who was injured on the Virginia Duals roadtrip, has not wrestled since early January due to a shoulder injury.

The circumstance for a last season surge seems to be in place. First, the Mustangs have most of their normal starting lineup healthy. Second, they are coming off their first full week of rest since fall quarter ended, but what impact that will have remains to be seen.

Cowell said his wrestlers were mentally much sharper this week than in the past, but physically they may not know until this weekend. Cowell also said they will make a strong showing this weekend in the 15-team tournament.

"To be in the top four or five would be a pretty good accomplishment for us, and if everything goes right we might get in the top two or three," said Cowell.

**BATTLE**

From page 9

State Bakersfield, Rivera cut lose for a personal high of 21 points. However, offense is not the only phase of the game where Wells and Rivera are proficient. They also play tenacious defense and make it hard for other teams to score.

In the big win over Cal State L.A. last Friday, which put the Mustangs in a tie for first place, Wells and Rivera harried all-American guard candidates Sam Voal and Shawn Holiday up and down the court all night.

"What we were trying to do was stay with them at all times and not let them start up a running game. We didn't exactly shut them down, but Wells and I scored 28 points ourselves and pretty much neutralized them." The Mustangs will host UC Riverside Friday in the Cal Poly Main Gym. Riverside handed Cal Poly its only league loss earlier this season. "We were beating them (Riverside) and could have won the game, but we broke down in the second half and let the game get out of control. We beat ourselves," Rivera said of the loss.

If Wells, Rivera and the rest of the Mustang squad play up to their potential — and chances are they will — Riverside will have a major battle on its hands Friday night. Tip-off will be at 8 p.m.
