Positions for ASI up for grabs

ASI candidates filing forms for the positions of president, vice president and student senators are now available in the ASI Office in the University Union.

Candidates must hold at least a 2.3 grade point average and be continuing students who have attended Cal Poly for at least two quarters.

Student senators represent their school. Twenty-four student senator positions are open:

- Five from the School of Architecture and Environmental Design, three from the School of Business Administration, three from the School of Communication Arts and Humanities, five from the School of Business, four from the School of Professional Studies and Education and two from the School of Science and Math.

ASI officers serve one-year terms as executive officers and trustees of Associated Students, Inc. Complete job descriptions are available in the ASI Office.

Filing forms must be completed and returned by March 21. Candidates for president and vice president must also turn in a

Exam during finals week subject of resolution

The Academic Senate will consider several resolutions Tuesday, including a proposal which would make it mandatory to give final exams during finals week.

There is an increasing number of final exams given during the week prior to finals week, resulting in disruption of classes, according to the proposal submitted by the Senate Instruction Committee.

The resolution further recommends that faculty who do not give final exams at the normally scheduled time be considered absent for the day they were supposed to give the exam.

The committee claims that Section 484 of the Campus Administrative Manual already specifies such a policy and urges that the "Administration enforce CAM 484."

However, CAM 484.3 is a provision for rescheduling finals if there are "unusual circumstances."

The propose is intended to make instructors consult with the associate dean of educational services in keeping with a clause in Section 484.3, said Lynn Gamble, vice-chair of the senate.

Because so many instructors are giving finals early, students are missing other classes, she said.

Another resolution — also submitted by the Instruction Committee — recommends giving Fs for senior projects if not completed within one year after being assigned. At Cal Poly there is no policy regarding time limitations on senior projects.

Currently an SP (satisfactory progress) symbol is used in connection with theses and other assigned work which extends beyond a single academic quarter. The F symbol would replace the SP symbol in cases in which students have taken more than one year to complete projects.

The committee also wants a similar policy for a two-year limitation for master's degree thesis work.

Gamble said both of these proposals are on the agenda for the Academic Senate meeting tomorrow, in addition to a resolution to maintain a Cal Poly teacher effectiveness program.

The proposals will be discussion items at the meeting, and they may be changed prior to presentation before the senate.

Boycott of SDI plan proposed

A resolution calling for all California State Universities to boycott Strategic Defense Initiative Research and all SDI research grants will be discussed at a meeting of the California State Student Association March 8 and 9.

A vote on the resolution, authored by Humboldt State Student Body President Mark Murray, declaring all CSU campuses a "Star Wars Free Zone" was delayed at the February meeting, but at that time was designated a "social issue" by the Board of Directors. Because the proposal has been designated a social issue rather than an educational issue, there will be additional procedures to be undertaken before it can be considered for a vote.

The resolution states, "Student leaders have a responsibility to register disapproval with those in the national agenda which are perceived to negatively impact education relative to their social good."

It continues, "The current price tag for the first five years of 'Star

Editorial

Not for the meek

Our ASI officers take a lot of flak. They work hard, they get paid little or nothing and they get scathing editorials written about them.

Today is the first day of the filing period for candidates seeking office as ASI president, vice president and student senators.

ASI officers are responsible for a $1 million budget, they research issues concerning the student body and propose resolutions to remedy problems. Some solutions are good; some are bad. They still get flak and perhaps occasional praise.

You may be one of their critics, either positive or negative. If so, don’t be silent. Run for office in their place.

You are active in your school council or club, or you have a sincere interest in legislating for the betterment of the student body. You can take criticism. You can do the job.

At the end of the year, the ASI president, vice president, and student senators should leave office with a sense of real accomplishment for having a positive impact on the student community.

Candidate filing period is open until March 21. Somebody’s gotta do it.

KCPR Congrats

We’ve heard it all week, we’re sick of it and we’re glad it’s over.

KCPR is more than glad. It’s rich. The first annual KCPR Pledge Week received $12,116 in pledges, surpassing its $10,000 goal.

The Cal Poly student-run (volunteer) radio station has an annual operating budget of approximately $15,000 comprised of funds from the journalism department, Instructionally Related Activities funds, private donations and station fundraising.

If all pledge monies are collected, the KCPR budget will increase by 70 percent. Glenn Wisegarver, pledge director, said pledges made were from students, listeners from the community and local businesses. He said the funds raised will be used mainly for new equipment and repair and replacement of records.

Wisegarver called the week a “grand experiment.” It was a grand success.

Changes in state bottle bill are bad news

Imagine yourself lying on the beach, basking in the warm sun, singing with the radio as the waves caress your feet. You sit up and look around to see the once beautiful beach littered with bottles, cans and other trash.

This is all too often the case on our state beaches, roads and campuses.

To provide adequate incentive for people to clean our environment will be forgotten. The result will be that when we look up from our towels on the beach the litter will still be there. We must take a strong stance against the present bill in order to ensure the passage of a bill which will provide adequate incentives to meet the litter problem head-on.

Guest columnist David Kamin- sker is a student and member of the Academic Senate.

LETTERS TO THE EDITOR

Americans should help other nations

Editor — in a letter titled “U.S. is as cruel to people as Soviets are” (Feb. 25) J.S. Baker tells us that our own backyards should be cleaned up before we start pointing our the dirtiness of our neighbors’ backyards.

It is not just on human rights violations in the U.S.S.R. that American people should be informed. Joseph Stalin once said, “A single death is a tragedy, but a million deaths is a statistic.” Stalin crushed and atomized the Russian people into dust and then built them back up into nice, neat cement blocks. This is more than violating human rights. This is the total destruction of the human spirit.

He mentions that the government (Reagan Administration) is robbing people of social security. What he does not mention is that the average American gets back over three times what he or she puts in, and this is adjusted for inflation.

Next, Baker tells us that it is not humane to have Orwellian organizations such as Accuracy in Academia watch and reprimand those who do not agree with the government.

Baker totally misunderstands AIA’s purpose — to protect the freedom of students to express their views. Teachers are here to teach all views in a fair and objective manner. My father is a teacher and he supports these principles. I have a relative who was wounded in Vietnam and I would be crushed if a teacher mentioned that everyone who suffered in Vietnam suffered in vain. How do you justify telling someone that his friend died a worthless death while attempting to save his buddy?

How much farther would Hitler have gone if we had not jumped out of our own filthy backyard to save the backyards of Britain, France, Belgium, Holland, Norway, Denmark, Russia, Poland, Czechoslovakia, Greece, Italy, Luxembourg, and even Germany itself?

America’s Marshall Plan for Europe is a good example of how the United States of America believes in tackling global and domestic problems. America should clean up its own backyard, but also help other countries clean up their backyards.

Marcos had urged military junta

LOS ANGELES (AP) — Philippine defense minister Juan Ponce Enrile says exiled president Ferdinand Marcos urged him to seize power via a junta last month, but he refused, believing the military should be subservient to civilian rule.

He says he also rejected the urging of his own staff members who wanted to "hit the palace," opting instead for a bloodless coup to pave the way for the civilian government of Corazon Aquino.

"If I wanted the power or the presidency," Enrile said Saturday in Manila, "it was being handed to me on a silver platter.

Enrile, 62, said that at the peak of the uprising against the Philippine leader, "Marcos asked me to take over through some sort of junta and forget about Mrs. Aquino.

Judge questions accused Nazi

BELGRADE, Yugoslavia (AP) — An investigating judge reportedly has begun pretrial questioning of Andrija Arlikovic, who was extradited from the United States on charges of ordering the deaths of hundreds of thousands of people during World War II.

The Belgrade daily Vecernje Novosti said Saturday that Judge Sada Joka began interrogating Arlikovic in Zre'eb in the presence of a public prosecutor and defense lawyers.

The state-supervised newspaper did not say when questioning began, but said it was not expected to take more than three days.

Poll shows polygraph support

NEW YORK (AP) — A majority of Americans believe lie detectors should be used in the courtroom, but they don't believe they should be used by businesses in most circumstances, according to a Media General-Associated Press poll.

The nationwide telephone poll of 1,512 adult Americans found that 72 percent believed the machines should be used in court to test people accused of crimes, and 63 percent said witnesses in court should also be tested.

Such tests are not presently allowed as evidence in court, in part because their validity is open to debate.
Women able to survive in professional world

By Julie Williams

Four panelists discussed ways women can survive in the professional world in celebration of Women's Week Wednesday.

The four speakers included Alice Loh, an architecture professor at Cal Poly; Linda Zeuschner, a speech communications professor at Cal State Northridge; Christina Shea, a graduate student at Cal State Northridge; and Rita Rich, a Registered Nurse at the Health Center.

"Women have to really know the subject matter, better than their male classmates," said Loh.

"I don't believe in giving up," said Loh.

"Women have to really know the subject matter, better than their male classmates," said Loh.

"What if she gets married, or has a baby?" asked Loh.

"I don't believe in giving up," said Loh.

"Women have to really know the subject matter, better than their male classmates," said Loh.

"What if she gets married, or has a baby?" asked Loh.

"I don't believe in giving up," said Loh.

"Women have to really know the subject matter, better than their male classmates," said Loh.

"What if she gets married, or has a baby?" asked Loh.

"I don't believe in giving up," said Loh.
Moving of Philippine bases will be costly

WASHINGTON (AP) — The Pentagon estimates relocation of the two huge U.S. military bases in the Philippines would cost upwards of $5 billion and put American military forces a long distance from potential hot spots, sources say.

A classified report containing the estimate is to be sent to Congress on Monday, less than a week after the fall of Ferdinand Marcos and the installation of Corazon Aquino as president of the long-time U.S. ally.

The Philippines is home to Subic Bay Naval Station and Clark Air Base, the largest American bases outside the United States. The leases on those bases run out in 1991 and Mrs. Aquino has refused to say whether she will let them stay.

The Pentagon report says that if those two bases are lost, the most stable potential spots to relocate would be Guam and Tinian islands, according to the sources, who spoke only on the condition they not be identified.

Both islands are under the control of the United States and are already home to U.S. military installations.

"There are other places you could move the U.S. bases to, like Japan or Australia, but you have the same potential problem there as in the Philippines — you don't know if we'll be welcome down the road," explained one source.

The report also outlines ways to improve the security at Clark and Subic, which has been subject of Capitol Hill criticism in recent months, the sources said.

Clark and Subic are the main U.S. bases in the western Pacific and Indian Ocean area.

At his last news conference, President Reagan said, "one cannot minimize the importance of those bases, not only to us, but the western world and certainly to the Philippines themselves.

Both bases would be difficult to replace, partly because of their sheer size. Clark sits on 131,000 acres while Subic is within a 36,000-acre district.

A key problem in moving the bases to Guam and Tinian would be the loss of a large, highly skilled work force. Relocation also would put American forces farther away from the Indian Ocean and western Pacific.

About 17,000 Filipinos work at Clark and 28,000 are employed at Subic.
Summer Ag Institute isn’t just for ag teachers

By Greg Colbert

California continues to be the leading agricultural state in the country, producing more than 25 percent of the nation’s food, but it is also one of the most heavily urbanized states.

The Summer Agricultural Institute, a program entering its third year, is specifically designed for educators in the California school system to increase agricultural awareness through the public schools and reduce tensions between urban and rural segments of the state population.

Mark Linder, agriculture education program director for the California Farm Bureau Federation in Sacramento, is in charge of the Summer Agricultural Institute.

"The Summer Agricultural Institute is a five-day seminar giving teachers and school administrators exposure to a broad spectrum of experiences and a thorough knowledge of agriculture," Linder said.

The seminar, to be held at the Farm Bureau headquarters in Sacramento, includes panel discussions on agricultural labor, wildlife development, foreign trade and agricultural economics, Linder said.

Also included in the program is an aerial tour of the Sacramento and San Joaquin valleys and an overnight stay with a farm family to see firsthand what it is like to live and work on a farm.

Linder said the SAI is available to teachers and administrators of all grade levels in addition to students majoring in education.

"The less experience and background people have in agriculture, the higher the desire they show to pass on information gained through the SAI; these people have the best chance of being selected for the class," Linder said.

Last year more than 100 applications were submitted to compete for 30 openings for Class II, and Linder said he anticipates more applicants this year.

Larry Rathbun, associate dean of the School of Agriculture, said the SAI is an agricultural awareness week designed to get public school teachers to incorporate agriculture into their classrooms.

"We have helped support the program in any way we can, but the distance between Cal Poly and Sacramento limits our involvement," Rathbun said.

"We are also faced with a problem in schedule conflicts. The Institute is going on at the same time the California Agriculture Teachers Association has its annual conference here at Cal Poly, so that also prevents us from assisting more," he said.

Linder and Rathbun agreed it is easier to get guest speakers from UC Davis and from Cal State Chico because of their proximity to Sacramento.

Linder said one of the benefits he has seen from the two previous classes that have participated in SAI are the spinoffs at the local level.

"Last year the Fresno County Farm Bureau, with the help of a member of Class I, developed an agriculture institute patterned after the state program which gives many of the same benefits to local teachers that may not be accepted for the state program," Linder said.

"The county ag institute was such a big success last year that similar programs are being developed for Lake Mendocino and San Joaquin counties," he said.

Wayne Carter, an administrator for instructional services for Kern County public schools, was part of Class I in 1984 and said the institute gave him a better understanding of agriculture.

"Last year we held our first-ever Farm Day, where we set up farm equipment and animal displays at the local fairgrounds and then bused kids from the city to see for the first time the animals and machinery involved in agriculture. It was a big success and we expect to have our second Farm Day this spring," Carter said.

While professors and administrators on the college and university level are eligible and encouraged to apply for one of the 30 scholarships awarded to each class participant, one problem the SAI faces at Cal Poly is awareness in the program.

G. Dew Ding, dean of the School of Architecture and Environmental Design, said he tries to observe as many agriculture programs at Cal Poly as he can but was not aware of the SAI.

"If the program looks at land use and the impacts urban planning have on farming, then it could have an influence on architecture instructors here at Cal Poly," Ding said.

Gus Wessell, associate dean of the School of Engineering, said he was not aware of the program, and said he didn’t expect a strong interest from the faculty members because of the great demand for personal time and other projects in which they are involved.

Phillip Bailey, dean of the School of Science and Mathematics, said the program could help make faculty members more aware of the needs of agriculture, but said the thrust of his department is to provide a basic knowledge and understanding on a variety of subjects.
Riverside wins CCAA tournament

Mustangs lose heartbreaker 72-71 in final to Riverside

By Joe Packard
Special to the Daily

In the CCAA Basketball Tournament over the weekend, the men's team won the battle Friday night against Cal State Los Angeles 86-78, but lost the war to UC Riverside Saturday night in a 72-71 heartbreaker.

This means that although the Mustangs won the CCAA regular season title with a record-tying 12 league wins and 23 wins overall, only Riverside is guaranteed a spot in the western region of the NCAA Division II playoffs. But there is still a possibility that Poly will be invited to the tournament.

Even though the Mustangs came up a tad short in the championship game, it was the human drama of athletic competition at its best. The Poly fans that packed the Main Gym were treated to two outstanding basketball contests played by talented, well-coached teams.

In the first round against Cal State L.A. Friday night, the Mustangs faced a monumental challenge — to beat L.A. twice in eight days and for the third time this season. Coach Ernie Wheeler had hoped not to face them in the first round, but the Mustangs were sky-high.

Much to the delight of the 2,900 screaming fans, the Mustangs jumped to a 10 point lead and were in control of the game for much of the first half. Thanks to Sean Chambers' 20 points, L.A. fought back though, and were in control of the game for much of the first half thanks to Sean Chambers' 15 points. L.A. fought back showing why many feel that it is one of the most talented teams in the nation, and went ahead by two points (34-32) just before the intermission.

That wasn't a new situation for the Mustangs. They trailed at halftime in the two previous meetings with the Golden Eagles. But this time instead of having to come back from a large deficit, the Mustangs kept it close and took the lead for good on a Melvin Parker lay-up off a Chambers' pass.

Poly also did a much better job on the boards this time against the Eagles. They were out-rebounded 46-41, but weren't dominated. Jim Van Winden led the way with 11, while Parker and Chambers crashed the boards for eight and seven respectively.

Foul trouble hurt the Eagles as their tail starting front line of Tony Brown, James Stewart and Anthony Buyer all fouled out. Poly built up as much as 13 point lead in "scamble time" near the end of the game.

Chambers, one of four Mustangs in double figures, finished with 28 points. Chico Riverside was a hot nine for 12 from the floor and canned a total of 26, while Parker had 18 and Van Winden was good for 13.

Senior point guard James Wells had an excellent defensive game and hounded Los Angeles' all-American guard Sam Veal into making good only on three of 17 shots. Marty Heede led the Mustangs in double figures, finished with 28 points. Chico Riverside also did a much better job stopping the Mustangs in double figures, finished with 28 points.

Mike Wells had an excellent defensive game, but the Mustangs were unable to score in the final few seconds of the game. Poly built up as much as a 13 point lead in "scamble time" near the end of the game.

In the championship game against UC Riverside, it was another case of two great teams going toe-to-toe. Riverside beat Cal State Bakersfield 90-83 Friday to get to the championship game against the Mustangs.

Chicos Riverside (14) brings the ball downcourt against Riverside's Anthony Holt. Riverick hit for 14 points in the Mustangs' losing effort.
TOURNAMENT

From page 7

It was a tough battle all the way and the Mustangs found themselves down by eight with 5:19 left after a quick Riverside basket.

But as they have done all year, the Mustangs fought back. Rivera hit a jump shot and Wells put in a lay-up after a steal to cut the deficit to four and sent the crowd into a frenzy. After another basket by Chambers and a Riverside foul, the Mustangs stole the ball from Robert Jimerson and Mark Ortiz hit a 18-footer to knot the score at 67 with 1:24 left.

It seemed as if destiny was on Poly's side, but the rest of the breaks and the official's calls went in favor of Riverside. The effective Mustang press forced another turnover and Poly had the chance to go ahead. Chambers over-eagerly threw a pass out of bounds over the inside basket, which accounted for one of the guards seemed to double dribble, but the officials didn't see it that way. The Mustangs didn't get the calls they needed and time ran out — Riverside 72, Cal Poly 71.

Although Poly is not guaranteed a playoff spot, chances are good it will get one. In 1981 the Mustangs were co-champs of the CCAA and were sent to a regional tournament in Missouri, which they won and eventually finished third in the nation.

Riverside, who had a wild net cutting celebration after the game, will be in the Western Regional Tournament with host Cal State Hayward, a team Poly easily beat earlier in the season, Alaska-Anchorage and an unnamed team.

Chambers posted numbers over the weekend that should give him a lot of support for league MVP — 43 points, 10 rebounds and several electrifying dunks.

After the game coach Wheeler praised his team and the outstanding crowd support the Mustangs received in the tournament and throughout the season.

"The support was tremendous," said Wheeler. "I think the reason we were able to get back in it was the enormous support from the fans. It is greatly appreciated. We had a great year and everybody, the players and the fans gave great effort."

Broncos take CCAA title
Lady Mustangs defeated in first round

By Ros Nielsen
Staff Writer

The Lady Mustangs dropped out of the CCAA post-season tournament Friday night after a loss to top-ranked Pomona by a score of 83-61.

Forward Sherrie Atteberry led the Mustangs with 17 points and 14 rebounds in the game at the Cal Poly Main Gym. Janet Jorgensen contributed 14 points before fouling out late in the second half.

The Mustangs, who lost to Pomona Tuesday in their last regular season game, played a good first half and were down by only four points at the intermission. A tough zone defense by Pomona contributed to several Mustang turnovers and a run of six unanswered points by the Broncos in the final minutes of the first period also hurt the Mustangs.

After a time out, Gigi Geoffrion hit two quick baskets from the corner to break the spell. Atteberry grabbed two defensive rebounds in traffic and Geoffrion and Trish Groo added a basket each to bring the Mustangs within five points.

The Broncos took control in the second half, scoring 50 points, many of them on layups or shots inside the key. Even with double-figure scoring by Atteberry, Geoffrion and Groo, the Mustangs shot only 33 percent from the field for the game.

"We were very tentative to shoot the ball," said head coach Marilyn McNeil. "We really didn't have anyone to take up the slack." The first 10 minutes of the second half were disastrous for us. We lost it then."

One high point of the evening was when Atteberry broke assisted coach Tommy Amaker's individual rebounding record for a single season. With 14 rebounds, the six-foot junior forward totalled 231 for the year, surpassing Amaker's mark of 228 set during the 1977-78 season.

The Pomona attack was led by Debbie Flett with 19 points and Vickie Mitchell with 14 points and 12 rebounds. The Broncos went on to beat Cal State Northridge Saturday to win the tournament and are already assured of a NCAA tournament berth.

DURHAM, N.C. (AP) — Senior David Henderson scored 11 points during a late 14-4 run for top-ranked Duke as the Blue Devils beat No. 3 North Carolina 82-74 Sunday and won the Atlantic Coast Conference regular season basketball title.

It was the first time Duke won 29-2 for the season and 12-2 in the ACC, had won the conference title outright since 1966. They tied with North Carolina for the crown in 1979. The victory also gave Duke the ACC title which starts Friday.

The Tar Heels, losing for the third time in the last four games, dropped to 10-4 in the conference and 26-4 overall.

Henderson, a 6-foot-5 guard, finished with 27 points, while senior guard Johnny Dawkins added 21, senior forward Mark Alarie had 16 and junior guard Tommy Amaker had 14.

Dawkins raised his four-year point total to 2,343 and surpassed Mike Gminski to become Duke's all-time leading scorer. He is No. 2 in ACC history behind Dick Hemric, who had 2,587 for Wake Forest.

Brad Daugherty led North Carolina with 24 points, followed by Jeff Lebo's 18, Joe Wolf's 14 and Curtis Hunter's 10.

North Carolina played its third game in a row game without starting guard Steve Hale, out with a collapsed lung. Duke led 37-34 at halftime and, paced by Dawkins and Henderson, went ahead 60-52 with 9:37 remaining on Amaker's three-point play. Four field goals by Daugherty, the Tar Heel center, and a jumper by Lebo reduced the Blue Devils' margin to 64-62 with just under seven minutes to go.

Henderson then scored the next seven points for Duke, which capitalized on Tar Heel turnovers and Daugherty's inability to connect on a pair of one-and-one free-throws situations.

Amaker's foul shot with 56 seconds left capped the 14-4 run which gave Duke a 78-66 advantage. North Carolina never got closer than six points thereafter, cutting the margin to 80-74 on Kenny Smith's jumper with 16 seconds to play.
Trouble with doubles matches

Lady netters lose to Bakersfield

By Duffy Carolan

The Cal Poly women's tennis team had a disappointing 5-4 loss Thursday in the second conference match of the season against Cal State Bakersfield.

The Mustangs went into doubles play with singles tied at 3-3, but Bakersfield edged the Mustangs by taking two of the three doubles matches needed for a team victory.

Patti Hilliard, playing in the number one position for the Mustangs, won her singles match 6-2, 7-6 against opponent Mary Ann Hodges. Hilliard and teammate Amy Stubbs also took the only doubles victory for the Mustangs, winning a close 6-2, 6-7, 7-5 match.

"Patti played very well today," said head coach Orion Yeast. "She was confident and kept the ball deep throughout her singles match," he added.

Stubbs, playing in the number three singles position, won her match 2-6, 7-5, 6-3. Yeast said, "Amy is our most reliable singles player right now, going undefeated so far in Division II match play."

Also winning her match with a 3-6, 6-2, 6-3 victory was number five singles player Mary Langenfeld.

"It was a tough match to lose. Singles was very close and I feel we had a chance to win two of the matches that split sets," (Cici) Barbe, number four singles, 6-4, 4-6, 2-6; and Carol MeUberg, number six singles, 6-2, 7-2, 6-0," said Yeast.

After Thursday the Mustangs are 1-1 in conference play and 3-5 for the season. "This makes our third match we've lost by one. It makes for exciting tennis," said Yeast. "But it would be nice to pull the close ones off."

FREE SPINAL EXAMINATION

Johnston Chiropractic Clinic, Inc. is sponsoring a spinal check-up and Scheiiosis Screening program as a public service. This service will include consultation, physical examination, and a report of findings.

WARNING SIGNS OF SPINAL MISALIGNMENTS

- Recurring Headaches
- Dizziness, Vertigo
- Head, Shoulder & Arm Pain
- Low Back & Leg Pain
- Pain Between Shoulders
- Numbness in Hands & Arms
- Loss of Sleep
- Difficulty Breathing

Wars' research alone is more than $30 billion, 10 times the total budget for higher education in California for one year. The estimated total cost for deployment of 'Star Wars' is in excess of $1 trillion, a figure too large for any analogous comparisons to education."

CDSA represents all CSU students and works to make state agencies and public officials aware of student needs and concerns. CSSA has a lobbyist working on the behalf of the association in Sacramento. Each campus has one student representative in the CSSA and Cal Poly is represented by ASI President Mike Mendes.

"CSSA is mainly concerned with issues that have an impact on education, rather than the social issues which may not directly affect CSU students," said Mendes.

Murray said, "Students have a right and a responsibility to take a position on issues such as this. If we don't say 'no' to 'Star Wars' now, we are going to be paying for it for the next 50 years."

"Reagan cannot have his cake and eat it too," Murray said. "On one hand he wants to reduce spending and balance the budget. On the other, he wants to undertake the most expensive project in the history of the United States."

In August, California State University Long Beach became the first CSU to accept a Strategic Defense Initiative-Initiative research grant. The $7.1 million grant will be allocated by Cal State Long Beach to small businesses and universities to research ways of powering a satellite platform for the SDI project. About 60 universities have accepted SDI research contracts, but there has also been signed boycotts from 58 percent of the faculty members in 14 top physics departments in the country, according to John B. Kogut, physics professor at the University of Illinois. Seventy-five percent of the physics faculty at Princeton University, 69 percent at Cornell University, 49 percent at Halward University, 74 percent at the University of Illinois, and 60 percent at the California Institute of Technology are among those who signed a formal pledge refusing to solicit or accept money from the SDI program.

Mendes said of the February CSSA meeting that he sensed strong opposition by the board on the resolution banning SDI research and grants because it was "would deny funding intended for educational purposes."

Because this resolution has been designated a "social issue" and not an educational issue, Murray fears it will be tabled, as has happened to many other social issues brought to the board in the past. But, Murray said, "This particular resolution can be effectively tied with education because the construction of 'Star Wars' will leave little government money to properly manage federal education."

Whether the "Star Wars' Free Zone" resolution will be brought to a vote by the CSSA board will be discussed at the March meeting of the association at Humboldt State University. Murray said, "The board is basically split right down the middle, conservatives and liberals. It will come down to that."
