Explosives found at UCSB, SB congressman’s office

UCSB Daily Nexus

Explosive pipe bombs, discovered early Wednesday at the UCSB Military Science building and Congressman Robert Lagomarsino’s downtown Santa Barbara office, may be linked to a fire that gutted UCSB’s Office of the Registrar in Cheadle Hall Tuesday night, police said.

An anonymous male voice — identifying himself as a member of a group called “Rites of Spring” — made several telephone calls to area news organizations claiming the group planted the bombs at all three locations in protest of the Gulf War. But investigators have not determined whether the Cheadle fire was caused by an explosive device or who may have been responsible for it.

“At least one call referred to Cheadle, but we haven’t found any indications of a bomb yet, so we don’t know if the calls are linked to the fire or the bombs or both,” UCSB Police Chief John MacPherson said.

Fire investigators said Tuesday night that the fire was probably caused by faulty electrical hookups in the registrars office, but they reconsidered after learning of the phone calls. An investigation is continuing, MacPherson said.

Another anonymous male caller, also identifying himself part of Rites of Spring — apparently undaunted by President Bush’s cease-fire announcement to take effect Wednesday at midnight (EST) — phoned in a bomb threat to campus police at 10:50 p.m. Tuesday, claiming an explosive device had been placed on the lower level of UCSB’s Main Library’s south wing.

Scholar drafts ethnic studies plan

Poly considers including the program in general education courses.

By A. Mortimer Naughton
Staff Writer

A draft proposal regarding the implementation of an ethnic studies program was submitted to Cal Poly’s Academic Senate last week by visiting scholar Bob Gish.

In an interview Tuesday, Gish stressed that the proposal was only a first draft. Seldom, he said, are first drafts the correct answer. He said he submitted the proposal to the Senate mainly as an effort to get on-the-record support of an ethnic studies program.

The Senate has made no official statement yet. But industrial technology professor James Murphy, the Senate’s chair, likened the idea of having such a program to “the flag, motherhood and apple pie and baseball.”

“The way you could oppose the idea of a program that would promote ethnic educational equity,” he said. Murphy believes that, living

Johnson’s attorney appeals court ruling that denied suppression of key evidence

By D. A. Arviso
Staff Writer

Cal Poly economics lecturer Michael Johnson will return to court April 3 when his attorney Ilan Funke-Bilu will appeal Judge Barry Hammer’s decision that denied suppression of evidence.

Bilu filed a motion that sought to suppress evidence on the grounds of illegal search and seizure on January 11. Hammer denied the motion Wednesday, saying that even though police committed a technical violation, there was substantial compliance with the law.

“I believe the court committed

Employers say Co-ops are way to make ‘smart hire’

By Anne Buila
Staff Writer

Why would a business invest time and money to train a new employee just to see him leave in six months? On the surface this situation doesn’t appear to make much business sense. And yet about 50,000 employers nationwide, both public and private, do it every year. They all participate in college Cooperative Education programs (Co-ops). Co-ops allow students to earn college credit while they are working as well as salaries. A Cal Poly Co-op usually lasts six months but sometimes lasts only one quarter and is sometimes as long as a year.

While it may be obvious why

The nurse at Goleta's Occupational Health Center asked me if I'd just had my blood pressure and pulse, completed an eyeglass examination and helped while I read out a "Confidential Health History." Now as we were walking together down a long, white-tiled hallway, there was in her demeanor that late-afternoon restlessness most people have by the end of the day, especially when they're working by the hour and have a million other things they'd like to be. She might have had a ton of shopping to do, to kids to cook dinner for and any number of other things to do, and it showed. I really didn't want to be there either.

Here we are "sweating white-room," Mr. Speer, and you'll find containers over there. Just go ahead and take your time and make sure to give us a good one. I locked the door to the bathroom behind me and thought about what I had to do - pee in a jar.

It had come to that. Of course I knew there was more to this physical exam than what we'd already been through. I'd signed all sorts of release papers and readily consented to what was about to happen, yet it was still difficult to realize that if I really wanted to work at the New Orleans Times-Picayune this summer, I had to pee on command.

Like an animal, I was going to be forced to allow someone to monitor what are perhaps a human being's most private moments - going to the bathroom. My parents train dogs, and for years I've gone to bed at night with the sound of dogs barking. "Potty! Potty!" at our three golden retrievers. If dogs have a right to their own bodily functions, why should I not? I know exactly how they feel every night. Embarrassed. Humiliated. "Ur-in." After emptying myself into that plastic cup, I felt a bit like I'd backed out of a promise - one to slowly stroll across the plaza, walk across to the bathroom beneath the big awning, pick up a specimen container in the middle of the plaza, walk to the bathroom beneath the Coverglo, fill up and then bring the cup full of warm pee back. Boxes of jars were collected, the bottles were sealed, and the whole kit and kaboodle was allegedly mailed to the White House, although no signatures, and the whole kit and kaboodle was allegedly mailed to the White House, although no signatures had arrived.

I really didn't want to be there either. The nurse at Goleta's Occupational Health Center had already weighed me, checked my height, had the business employees don't use drugs. That's what most college journalists I know will do - I know what I'm doing. The Times-Picayune is definitely a good job, in a great city, too.

Then things couldn't be better, right? Wrong. I've been against mandatory drug-testing for years. It's an affront to human dignity, and if nothing else, it could be unconstitutional. The Fourth Amendment guarantees all the right to privacy and has been used over the years to uphold a woman's right to privacy before birth control or choose to have an abortion. I don't see why it shouldn't be used to outlaw drug testing.

Almost 30 state attorneys general have not anticipated that 20th-century technology would enable medical technicians to search for traces of drugs in people's urine, but they did understand that every person has the right to control what other people know about his or her private life. Back in 1966, I attended an Associated Student-sponsored event in Shucker's called "Ur-in." For those of you who weren't around back then (and I doubt very many of you were), those were the heady days when Associated Students politics were a vehicle for student activism and protest on a number of topics, mandatory drug-testing of government employees being one of them.

Students attending the "Ur-in" were asked to pick up a specimen container in the middle of the plaza, walk to the bathroom beneath the Coverglo, fill up and then bring the cup full of warm pee back. Boxes of jars were collected, the bottles were sealed, and the whole kit and kaboodle was allegedly mailed to the White House, although no signatures had arrived.

If this summer, I had to pee on command, I am not so fortunate as to live within walking distance, so we have to bring our cars on campus.

I have noticed that some students have forgotten the most basic rule learned in kindergarten: "Look both ways before you cross the street." Even going 15 mph you cannot stop in a second's notice because someone doesn't take the time to look before crossing.

And do you know how much gas is burned waiting for someone to slowly stroll across the street? What happened to common courtesy? Give drivers a "break too."

Bush sets up 4-point postwar security plan

WASHINGTON (AP) — Declaring Iraq vanquished, the Bush administration is launching a four-point diplomatic campaign to secure the postwar Persian Gulf. Already a decision is taking shape to deny arms to Baghdad — at least if Saddam Hussein survives.

If Saddam is forced from power, U.S. obligations or those with family here far longer.

"It will take many months to get out," White House spokesman Martin Fixter said in Washington. "But we're going to start a steady withdrawal."

The overall plan, updated continuously during the six-month U.S. deployment, calls for sending troops home by unit on a first-in, first-out basis.

But a date to begin the exodus cannot be set until peace with Iraq is certain, military officials said.

"Can I give you a time? No. I really can't," Marine Brig. Gen. Richard I. Neil, deputy director of operations for Operation Desert Storm, said in Riyadh when asked if the command had a timetable for shipping troops home.

"We're going to have to find out how this peace process develops," he said. "If things go well, I think you will see a quick return for some forces.

New York City school board OKs condoms

NEW YORK (AP) — After months of controversy, the New York City school board on Wednesday narrowly approved 4-3 a plan to distribute condoms to students.

The plan, which would go into effect by August, would give students information on how to avoid unwanted pregnancies.

The New York City school board voted Wednesday with a 4-3 margin to distribute condoms to students.

"I think it's important for students to develop their own identity in college," Aiken said. "They must break away from their parents.

Traditionally, fathers have controlled issues in the family. Males are raised in a society where they are accustomed to controlling and dominating their children, Aiken said. This includes controlling for their parents.

The problem is gender-released, he explained. Female parents do not have a different set of concerns than do males.

In general, Aiken said, females are usually dependent on their father. They look for direction and want to please him. The father will assume a more dominating role.

Fathers call frequent on their daughter. They want to know that she is safe and associating with the right people. Fathers call frequent on their daughter. They want to know that she is safe and associating with the right people. Fathers call frequent on their daughter. They want to know that she is safe and associating with the right people.

Families, friends of Gulf troops told to mail letters, not packages

By Karla Hale
Staff Writer

News of the cease fire has many family and friends of military personnel serving in the Gulf hoping that their loved ones will come home soon. Just how long it will be before they come home is not known, so family and friends of those serving in the Gulf are still being asked to send letters from home but to refrain from sending large packages.

"It is hoped that letters from home will come to an end because they are one of the biggest factors for good morale of the troops over there," said Major W. Lachapelle, plans officer for the Military Postal Service Agency in Virginia.

The weight limitation on first class mail to first class (less than 11 ounces) and audio cassettes because the size and weight of packages in creating problems on transportation systems, Lachapelle said.

This is a voluntary limitation, and the U.S. Postal Service will still accept larger packages within their regulations, he said.

"The mail situation is being closely monitored, and the voluntary limitation will remain in effect until such a time that efforts can be made to free up the mail situation," Lachapelle said.

The size and weight limitations for the post office are 108 inches in length and girth and 70 pounds.

Jenny Smith, a claims and inquiry agent for the U.S. Postal Service in San Luis Obispo said, "The mail situation is being closely monitored, and the volunteers are determined to be undeliverable, we have no idea where to send them from that point on," he said.

Since the weight limit on first class mail is 11 ounces, he said it is possible for people to comply with the voluntary limitation and still send small packages.

Food Science Professor Hany Khalil said the key to sending food is to choose items that are nonperishable and make sure they are packaged tightly with some cushion material.

"Non-buttered poppers can be used to cushion, and it might arrive fresh enough to be eaten too," he said.

Items like beef jerky, processed cheese, dried salami, dried apples or apricots or seasonings would be good choices, he said. He advised avoiding anything in glass containers.

Baked goods should be packaged in a way to provide support and prevent moisture loss, Khalil said.

A small shoe box with layers of plastic wrap and then a layer of aluminum foil on the top, should arrive in good condition if they have been packed tightly, he said.

"But you could not send very many cookies that way and stay under 11 ounces," Khalil said.

The blaze did not damage student records, and students continued to use the telephone registration system to sign up for spring quarter classes.

The systems, centered in North Hall, was not affected by the fire. Assistant Registrar Elaine Wheeler said.

At approximately 2:35 a.m. Wednesday, less than three hours after the fire in the registrar's office, campus police were notified of an explosive device sitting on the steps of the ROTC building, several hundred yards south of Storke Plaza. The bomb in front of ROTC was designed by Santa Barbara Coun­ty Ordinance and Demolition teams at 3:55 a.m.

The bomb at Lagomarsino's office was discovered Wednesday morning when staff members began arriving for work, accord­ing to Lt. Rich Glans of the Santa Barbara Police Depart­ment. He described the downtown bomb as "not identi­fied.

Orienteering – a challenge against time, terrain

Club will sponsor annual meet for all skill levels this Saturday at El Chorro Park.

Michelle Hertig
Staff Writer

Racing through the woods with a map and compass in hand is an accurate picture of the sport of orienteering. Veteran orienteers say it’s a sport that relies on sharp mental skills as well as speed.

Cal Poly’s annual orienteering meet at El Chorro Regional Park this Saturday offers everyone, from beginners to the advanced, a chance to challenge both mind and body in a race against time and terrain.

“Orienteering fulfills a need for people,” said Maj. Mark Earley, an associate professor of military science at Cal Poly. “It’s a test for the orienteer – then a typical meet and the other competitors.”

In a typical meet, participants check in and are given a map and an orienteering map. The map is marked with the locations they must visit in a certain order and time. Markers punch holes in the scorecards at the control points to prove the location was found by the orienteer. The participant who takes the least time to correctly complete the course wins.

“Orienteering builds self-confidence,” Earley said. “It’s mentally challenging like a chess game and involves the appeal of being in the outdoors.”

Orienteering developed as a sport in Sweden in the early 1900s. Major Ernst Killander, who was president of Stockholm’s Amateur Athletic Association, was having difficulty keeping the interests of Swedish youth in track and field sports. To add a twist he devised a cross-country route where runners had to use a map to find their way. At that time, Killander called it the Sport of Orientation.

Orienteering ranks as Europe’s largest participant sport with a record of more than 7,000 participants in one competitive event.

Cal Poly’s military science department offers a course in orienteering (MSC 111) every winter quarter.

“The class consists of 40 percent (ROTC) cadets. The other 60 percent of the class is made up of students taking the class for credits. The course includes learning map and compass navigation skills,” Earley said.

Saturday’s race, sponsored by the Cal Poly Orienteering Club, will have ongoing registration between 8 a.m. and 1 p.m.

Thomas Notides, aeronautical and astronautical engineering graduate student and president of the club, said its purpose is to organize meets to keep members’ orienteering skills honed and to introduce others to the sport. “Saturday’s meet will have three courses for beginning, intermediate or advanced orienteers,” Notides said. “The terrain of the course is not difficult for beginners, so we hope people will come out and participate.”

Beginner instruction and compass rentals will be available on Saturday.

Way to go!

Where are you going to go after you graduate with a degree in CS or EE? We can offer some helpful directions.

Novell practically invented network computing, and we’ve been making all the right moves ever since. That means you have the chance to work on—and help define—the industry standard in network technology. And we’re continuing to grow. That means more opportunity as well.

You’ll find another advantage at Novell—we offer more than one way to go. With development centers in Utah, Texas, and California, you’ll have your choice as to where you’ll begin your career.

To learn more about the directions Novell can offer, contact your placement office for a on-campus interview. Because if you want technical challenge and success, there’s only one way to go—straight to Novell.

If you’re unable to meet with us at this time, please send your resume to Novell, Inc., Human Resources, Dept. SLO 122 E. 1700 South, Provo, UT 84606. We are an equal opportunity employer.

Women take first, men second at CCAA swim championships

Teams are sending 13 swimmers to nationals in Wisconsin next month.

By Michael Belgard
Staff Writer

Cal Poly's women won the California Collegiate Athletic Association team swimming championship last week in Bakersfield. The Mustang men took second in the meet to defending national champions, CSU Bakersfield.

Senior Gina Indresano and sophomore Stephanie Brannon were named to the CCAA All-Conference team.

Women's coach Chuck Cummings said, "We were a little bit slow in going at the beginning," said Coach Barry Firmage. "During the second day of finals we started to see performances from our swimmers that the coaches thought they were capable of.

Senior Gina Indresano won the "Swimmer of the Meet" award. Indresano won the 200 freestyle, 100 freestyle, and the 200 butterfly. She also posted second in the 200 breast. "There are still some performances we hope to see from her," Cummings said.

Brannon improved upon national marks in the 50 and 100 freestyle and in the 50 freestyle relay. She was named CCAA Women's Swimmer of the Year award.

For the women, Chris Hugh was tops in the 200 individual medley and the 100 freestyle. Missy LawCoute out-distanced the competition in the 50 freestyle and the 100 freestyle. Stephanie Keller took first in the 100 backstroke. And Carolyn Bentley won the 100 breaststroke.

In the women's relay events Susie Giordano, LawCoute, Hall and Indresano teamed up to win the 400 individual medley relay. Keller, Bentley, Indresano and LawCoute won the competition in the 400 medley relay. LawCoute, Anne Oberg, Kim Salter and Giordano won the 200 freestyle relay. The 800 freestyle relay was won by the team of Indresano, Hall, Giordano and Bentley.

Brannon, Adam Christiansen, P.J. Madison, Mark Barner, Dave Poggiolo, Scott Swoboda and Larry Zurbin all qualified for the nationals for the men.

Indresano, Bentley, Hall and Giordano posted CCAA qualifying times for the women.

"National times are going to be tough," Firmage said. "Qualifying standards were a little tougher than last year. For the guys we look a little tougher because of our relay strength."

Firmage expects the men's team to finish in the top six or eight and the women's team in the top 10.

Cal Poly volleyball Head Coach Craig Cummings has announced the signing of Eileen Bermundo for the 1991 season. The 17-year-old recruit is a 5-foot-8-inch outside hitter out of Santa Ana. Bermundo was a two-time Peninsula League offensive player of the year while at Los Alamitos High School.

"Bermundo is a true lead for good. The Mustangs shot a paltry 18-63 from the floor in the game (28 percent), despite being 4-7 from three-point range. Cal State Los Angeles extended its lead to 10 at 22-12 midway through the first half, a margin the Mustangs rarely cut into the remainder of the game.

Leading 38-27 at halftime, the Golden Eagles pulled further away from the Mustangs in the first five minutes of the second stanza. Poly trailed 18 at 49-31 before going on an 11-0 run to pull within seven. For the guys we looked a little tougher because of our relay strength."

Bermundo will be coming to Cal Poly in the fall — the start of the volleyball season, which will major in physical education.

"We will add the intensity to a veteran group of returning players," said Cummings.

Women cagers lose to Cal State L.A.
in CCAA tournament semifinal, 61-47

By Adrian Hodgson
Sports Writer

The Cal Poly women's basketball team ended its season on a down note Wednesday, losing 61-47 to Cal State Los Angeles. The loss came in the semifinals of the California Collegiate Athletic Association tournament at Cal Poly Pomona. The Mustangs ended the season 14-13.

Cal Poly scored the first four points of the game, but the Golden Eagles answered with nine straight points to take the lead for good. The Mustangs shot a paltry 18-63 from the floor in the game (28 percent), despite being 4-7 from three-point range. Cal State Los Angeles extended its lead to 10 at 22-12 midway through the first half, a margin the Mustangs rarely cut into the remainder of the game.

Leading 38-27 at halftime, the Golden Eagles pulled further away from the Mustangs in the first five minutes of the second stanza. Poly trailed 18 at 49-31 before going on an 11-0 run to pull within seven.

But Cal State L.A. scored the next six points to take a 55-42 lead. Guard Deanne Cox and forward Vanessa Hornbeck led the Mustangs with 12 points each.

Center Chris Royer, a member of the CCAA first team and last week's CCAA Player of the Week, was held to just one point and was limited to 13 rebounds.

JOHNSON

From page 1

(an) error," Bilu said. "That's why we have courts of appeals.

Bilu claims police illegally searched Johnson's home on Oct.
19. Authorities seized four grams of cocaine, some hypodermic
needles, inhaling straws and records of sales — evidence Bilu
hopes to suppress.

Bilu says police violated "knock notice" requirements when
they entered Johnson's home. Police must knock on the
front door and show a search warrant before entering a house.

Police walked into Johnson's home through a screen
door without knocking, Bilu said.

They then requested permis-
sion to enter and then showed
Johnson the search warrant.

Court records state that upon
entering the home, the officer ob-
served a bag of cocaine next to
where Johnson was sitting.

Philip Lowe is confident the ap-

decision.

"The first thing the attorney
will do is find out if the seizure is
lawful," Lowe said.

No action has been taken
against Johnson by the univer-
sity, said Walter Perlick, dean of
the School of Business. Perlick
said the school is "confident the
appellate court will reverse the judge's
decision on the weekend.

Johnson pleaded "no contest"
Wednesday to one count of pos-
session of cocaine in a plea bar-
gain. In the plea bargain, one
charge of possession of cocaine
with intent to sell was dropped.

Bilu is confident the appellate
court will reverse the judge's
decision. If Bilu wins the appeal, the
demands of the case will be dismissed
for lack of evidence.

Deputy District Attorney
Philip Lowe is confident the ap-
pellate court will uphold the
judge's decision.

The front door was open and
police could see Johnson through
the opening, Lowe said. Police
complied with the law by re-
questing permission to enter the
home after opening the screen
door, he said.

Attorneys frequently try to
dismiss narcotics cases by assert-
ing illegal search and seizure
laws, Lowe said.

"The first thing the attorney
will do is find out if the seizure is
lawful," Lowe said.

Johnson pleaded "no contest"
Wednesday to one count of pos-
session of cocaine in a plea bar-
gain. In the plea bargain, one
charge of possession of cocaine
with intent to sell was dropped.

Bilu is confident the appellate
court will reverse the judge's
decision. If Bilu wins the appeal, the
demands of the case will be dismissed
for lack of evidence.

Deputy District Attorney
Philip Lowe is confident the ap-
pellate court will uphold the
judge's decision.

The front door was open and
police could see Johnson through
the opening, Lowe said. Police
complied with the law by re-
questing permission to enter the
home after opening the screen
door, he said.

"The first thing the attorney
will do is find out if the seizure is
lawful," Lowe said.

No action has been taken
against Johnson by the univer-
sity, said Walter Perlick, dean of
the School of Business. Perlick
said the school is "confident the
appellate court will reverse the judge's
decision on the weekend.

in San Luis Obispo, it is easy to
forget that only 17 percent of
California residents are white.

"We need to trust our own eyes
to the fact that we need a better un-
standing of ethnicity," she said.

He said the hard part of
making a program work will be
giving it student appeal. Keeping
that and budget restraint and budget
restrictions in mind, he hopes to integra-
etnic studies into the current program
so students will not face another
general education requirement.

"The first thing the attorney
will do is find out if the seizure is
lawful," Lowe said.

No action has been taken
against Johnson by the univer-
sity, said Walter Perlick, dean of
the School of Business. Perlick
wanted the student's demographics
were changed in the law.

"There is a law," Lowe said.

"I think the plan contains some
unique ideas.

"I like it because it doesn't put
plausible medical devices.

Aldrich agrees with Bunyard
about the benefits of being able
to spend time with a potential
hire.

"We get to see how organized
he is, how motivated and how
disciplined he can be," said

Perlick said the proposal are being
distributed to
classified faculty but does not expect an official response soon.
