The Republican said the cuts reflect the necessity of maintaining funding for education and public safety, Wilson's top priorities in an election year.

"To balance the budget, we have had to make tough decisions," Wilson told a budget briefing in the Capitol.

Los Angeles — California's unemployment rate rose from 8.6 percent in November to 8.7 percent in December, but its weary economy may finally be creating more jobs than it is losing, according to federal reports released Friday.

Johnlessness in the nation and Los Angeles County also continued to ease, though Los Angeles' rate was still nearly 9 percent.

A Labor Department survey of households concluded that 13,069,000 Californians had jobs last month, up 58,000 from November and 155,000 from August. The jobless rate rose as the number of people looking for work increased — itself often a sign of increased confidence in the economy.

Los Angeles — California's unemployment rate rose from 8.6 percent in November to 8.7 percent in December, but its weary economy may finally be creating more jobs than it is losing, according to federal reports released last week.

While public school funding has been maintained, spending for all other programs has fallen 11.7 percent: From $20.5 billion in 1991-92 to a proposed $18.4 billion in 1994-95.

Welfare recipients are again the target of Wilson's proposed cuts, as they have been in each of his budgets. His proposals would affect the 2.6 million people, mostly mothers and children, on the Aid to Families with Dependent Children program.

According to Investigator Mike Kennedy, Gutierrez's death.

A resident of Sierra Madre Residence Hall tower four died early Friday morning of complications resulting from an acute sinus infection, according to Public Safety.

Jose Arturo Gutierrez, 18, was a freshman at Cal Poly.

Student dies in dorms early Friday

He was found in Sierra Madre room after infection migrated to brain

By Elizabeth Patrude

A resident of Sierra Madre Residence Hall tower four died early Friday morning of complications resulting from an acute sinus infection, according to Public Safety.

Jose Arturo Gutierrez, 18, was a freshman at Cal Poly.

His major was not released.

A mandatory meeting Friday for the residents of Sierra Madre allowed them to ask questions and express their emotions about Gutierrez's death.

"An acute sinus infection spilled over onto the up front, left side of his brain, behind the eyes and sinuses — causing the brain to swell," Cochran said. "The reason for vomiting may have been because he had a high fever and in struggling for air and breath, sucked the vomit into the air passages," he said.

According to Investigator Mike Kennedy, Gutierrez's death.

The investigation committee probing Cal Poly's baseball program has uncovered three separate bank accounts that were used to pay registration fees for at least four players on this year's squad — and possibly a few from previous teams.

The accounts are held by individuals and not Steve McFarland, who admitted he paid a few of his players registration fees with funds outside of university control.

Crabb said the individuals holding the three accounts,

The investigation committee probing Cal Poly's baseball program has uncovered three separate bank accounts that were used to pay registration fees for at least four players on this year's squad — and possibly a few from previous teams.

Crabb also said "other things" have occurred outside the university's control which cumulatively amount to greater than $4,000. He gave no specific amount, but other local news organizations — including the San Luis Osipco County Telegram-Tribune and KSBY-TV — have used $5,000 as a figure.

The accounts are held by individuals and not Steve McFarland, who admitted he paid a few of his players registration fees with funds outside of university control.

Wilson’s budget blueprint calls for 24% fee increase

Student dies in dorms early Friday

He was found in Sierra Madre room after infection migrated to brain

By Elizabeth Patrude

A resident of Sierra Madre Residence Hall tower four died early Friday morning of complications resulting from an acute sinus infection, according to Public Safety.

Jose Arturo Gutierrez, 18, was a freshman at Cal Poly.

His major was not released.

A mandatory meeting Friday for the residents of Sierra Madre allowed them to ask questions and express their emotions about Gutierrez's death.

"An acute sinus infection spilled over onto the up front, left side of his brain, behind the eyes and sinuses — causing the brain to swell," Cochran said. "The reason for vomiting may have been because he had a high fever and in struggling for air and breath, sucked the vomit into the air passages," he said.

According to Investigator Mike Kennedy, Gutierrez's death.

The investigation committee probing Cal Poly's baseball program has uncovered three separate bank accounts that were used to pay registration fees for at least four players on this year's squad — and possibly a few from previous teams.

Investigation Committee Chair Charles Crabb said Friday that the initial sweep through the three accounts uncovered $4,000 outside of the university's control given as financial aid to players — a violation of National Collegiate Athlete Association rules.

Crabb also said "other things" have occurred outside the university's control which cumulatively amount to greater than $4,000. He gave no specific amount, but other local news organizations — including the San Luis Osipco County Telegram-Tribune and KSBY-TV — have used $5,000 as a figure.

The accounts are held by individuals and not Steve McFarland, who admitted he paid a few of his players registration fees with funds outside of university control.

Crabb said the individuals holding the three accounts,

"The reason for vomiting may have been because he had a high fever and in struggling for air and breath, sucked the vomit into the air passages," he said.

According to Investigator Mike Kennedy, Gutierrez's death.
INVESTIGATION: Probe will scrutinize all Cal Poly sports, school officials say

From page 1 whose names have not been released, have broken no laws and will not be prosecuted. However, they have ap­parently violated NCAA rules which specify athletes are to only receive financial aid administrated by the univer­sity.

Crabb said the NCAA could ask the university to separate relations with these individuals for a certain amount of time. In a recent decision handed down to Texas A&M University, the NCAA demanded the school to severe ties with a Texas businessman or suffer more sanctions. The individual was found to have paid football players for work never performed.

The five football players in that case were suspended for a number of games because they knew they were receiving money against NCAA rules. However, Cal Poly’s case appears to be different, according to Crabb. Athletic department officials plan to soon make an appeal to reinstate the players deemed by the NCAA as ineligible during the investigation.

“No evidence suggests players knew they were receiving financial aid outside university’s control,” Crabb said. Athletic Director John McCutcheon and faculty athletic­ representative Mike Wendel were at an annual NCAA convention in San Antonio, Texas, over the weekend, seeking advice on the best way to handle the investiga­tion and appeal for the players’ eligibility.

Crabb also said no players seem to have received ex­cessive aid. But until all the accounts have been inves­ tigated, he added, it cannot be determined for certain.

The investigation committee is attempting to deter­mine if the amount improperly paid to cover athlete’s ex­ penses exceeds the amount the NCAA allows a program to give its players through legal channels, such as scholarships.

Crabb said if the amount exceeds the NCAA allotment then the conference might declare a university’s program had an unfair advantage over those its teams competed against. As some of the 20 universities the NCAA has currently placed on probation for exceeding the allowable amount of financial aid have discovered, the NCAA can decrease the number of scholarships a university can give as punitive action.

The NCAA has also stripped teams of their records and accomplishments for exceeding allowable scholarship amounts, but the NCAA treats each case individ­ually.

Company health officials stress that Gutierrez’s death was not due to a meningitis outbreak. Gutierrez suffered from meningitis symptoms, but not meningitis.

"Gutierrez complained of a headache for three days and went to the local hospital," Kennedy said. "Hospital officials took X-rays which showed he had a sinus infection and he was given antibiotics."

Cochran said he agreed with how hospital officials addressed Gutierrez’s illness.

"I fully support the treatment given when he was seen at Sierra Vista Thursday and its diagnosis as a sinus infection," Cochran said.

"He was never seen at the Health Center," Cochran added. "I was told he went directly to Sierra Vista."

Housing officials unilaterally refused to comment on the death. But a residence hall official who spoke on the condition of anonymity said Gutierrez did not have a roommate.

Coroner’s officials contacted Gutierrez’s family, who delivered their son’s body back to his home town of Santa Ana.

According to Acting Police Chief Steve Schroeder, Gutierrez was taken to Lady-Suliffe Mortuary in Southern California. A complete medical investigation is pending.

Services will be held Monday morning in Santa Ana.

STUDENT: CPR fails to revive 18-year-old found unconscious in his dorm room

From page 1 was found laying unconscious on the floor next to his bed by fellow student Andrew Hall, who began cardiopulmonary resuscitation.

Cochran said the usual scenario in cases such as these is for the victim to be found lying on his back, but he added he did not know the specifics of this particular situation.

Public Safety officers continued CPR until an ambulance arrived and took Gutierrez to Sierra Vista Regional Medical Center.

He was pronounced dead at 1:39 a.m.

According to Barbara Schwoenau, an official with the San Luis Obispo County Health Department, the infection was not contagious. Those who came into contact with Gutierrez, she said, are apparently at no risk.

County health officials stressed this is not a meningitis outbreak. Gutierrez suffered from meningitis symptoms, but not meningitis.

CALIFORNIA: Jobless rate up slightly, but economists say recession soon to bottom out

From page 1 people and is generally regarded as more reliable, showed a decline of only 3,000 jobs from November to December. That is statistically flat, said First Interstate Bancorp’s chief economist, Lynn Beaser.

The payroll survey showed 13,000 jobs lost in November and 16,000 in October. Those losses had made Beaser skeptical of the increasing numbers in the same months’ household surveys, but she was more optimistic following Friday’s news.

"It indicates that the worst of the recession is clearly behind us and we may be starting to reach the bottom," she said.

Other positive recent signs included higher home sales in California, construction stabilizing, a fairly good Christmas for retailers and a pickup in lending, she said.

"It shows that the worst of the recession is clearly behind us and that we may be starting to reach the bottom," Beaser said.

Other positive recent signs included higher home sales in California, construction stabilizing, a fairly good Christmas for retailers and a pickup in lending, she said.

The nation’s unemployment rate was 6.4 percent, down from 6.5 percent in November. In Los Angeles County, hard-hit by defense spending cuts, the rate was 8.9 percent, compared with 9.8 percent a year earlier. The local figures are not seasonally adjusted, so year-to-year comparisons are used.

December job losses in California and the nation were concentrated in durable goods and manufacturing, including defense. Gains came mainly in retailing and services.

California has been in recession since mid-1990. Despite the encouraging signs, huge numbers of people remain without work. In Los Angeles County, the service and sales industries are holding up best, but the growth is unimpressive.

In Los Angeles County alone, the Bureau of Labor Statistics estimated that 387,000 workers were searching unsuccessfully for jobs.

People appear to be giving up the search for work or moving out of the county, noted Bureau of Labor Statistics economist Mary Dzialo in Washington, D.C.

"It shows that the worst of the recession is clearly behind us and that we may be starting to reach the bottom," Beaser said.

Socialized medicine: An “F” for America

By Cynthia Nelson

Socialized medicine will not work for America. It has been a complete failure everywhere else in the world. Hillary Clinton’s proposed $100 billion to $150 billion health care plan will receive a whopping red “F” when it hits Americans right between the eyes.

And socialized care will not be free. We will all have to pay dearly — but few will qualify for benefits. Under the current system, all Americans qualify for care if they have enough George Washingtons or Ben Franklins. This system is far too discriminatory than it will be under a national federal control.

Let’s bring the point close to home. Have you ever visited the Health Center and been in and out in less than 20 minutes? After your brisk exam did you find yourself in the hall with your head spinning? Did you ask yourself, “Are they sure of what the problem is?” More often than not, the problem is diagnosed correctly but such rapid treatment leaves one wondering.

What makes anyone think socialized health care will be any more personalized?

Students currently receive socialized health care — taxpayers pay the costs not covered by student fees. This eliminates the patient’s individual responsibility for paying for their care.

When a doctor knows the patient does not directly pay their medical costs, the temptation for the doctor is to overcharge for the service. It is only fair to say that the hurried pace at the Health Center is not the fault of the doctors and nurses. They want to see as many patients as possible and do their best to do so.

Frank Lopez, material engineering senior

“My little brother because we had territorial conflicts. We fought a lot about everything.”

Erika Heise, biology junior

“I didn’t visit any relatives. Most of my family lives in Mexico. In the past we’ve always gone to Mexico, but as my brothers get older it was harder to go.”

Andy Fisher, business senior

“My uncle, because he’s not trustworthy. He’s a slob and he has taken money from my family. Right now there’s even a warrant out for his arrest.”

Leahy Silver, junior English

“Are they sure of what the problem is?” More often than not, the problem is diagnosed correctly but such rapid treatment leaves one wondering.

What makes anyone think socialized health care will be any more personalized?

Students currently receive socialized health care — taxpayers pay the costs not covered by student fees. This eliminates the patient’s individual responsibility for paying for their care.

When a doctor knows the patient does not directly pay their medical costs, the temptation for the doctor is to overcharge for the service. It is only fair to say that the hurried pace at the Health Center is not the fault of the doctors and nurses. They want to see as many patients as possible and do their best to do so.

But back to why socialized medicine will not work. Looking at England, Canada and New Zealand as test laboratories for socialized medicine, the results are disappointing at best.

A British friend told me those needing a dialysis machine are told to go home and die. There are not enough machines available. Can you imagine any American being given such a death sentence?

I have read that in Canada, those diagnosed with cancer and needing immediate surgery are told they must wait two years. They come to the good old U.S.A. for care.

My friend’s sister is a diabetic living in New Zealand. After having a baby, she was told she would have to wait five years to meet with a pediatric specialist. She came to the states and was found to be in surprisingly good health. Would you like to wait five years for that kind of peace of mind?

It would be naive to say there are no problems with our system, and I realize some doctors are greedy and arrogant. However, there are better solutions than soaking the American people on the whole. It is called individual responsibility. It would be naive to say there are no problems with our system, and I realize some doctors are greedy and arrogant. However, there are better solutions than soaking the American people on the whole. It is called individual responsibility.

For those of you saying, “Yes, but what about alternative remedies?” Watch your backside. This month all those vitamins, supplements and herbs are being harvested in the balance. They may become wards of the state if a majority of sponsors is not reached in the House of Representatives. If that does not happen, items now costing $10 will be $80, as is the case in Norway. That is if vitamins, supplements and herbs can pass the rigorous testing standards of the Food and Drug Administration.

That is if vitamins, supplements and herbs can pass the rigorous testing standards of the Food and Drug Administration.

Tests can take 10 years to prove effectiveness. They also cost billions of dollars. In reality, there is no need for such waste. No one has died from a vitamin overdose as they have from items such as aspirin.

To prevent this from happening, contact your representative, senators and president.

The socializing of medicine is simply a ploy to create a larger voter constituency. The Clintons know it, as do their wealthy friends who Hillary has appointed to office. They know their plans will create economic recession. They realize there are other, better things that they are if they had done nothing.

In reality, there is no need for such waste. No one has died from a vitamin overdose as they have from items such as aspirin.

Women’s soccer scores first All-American honors

Sophomore striker Wendy Jones and junior midfielder Kolleen Kassis were named All-American in women's soccer.

The two players anchored a Cal Poly team that advanced all the way to the NCAA Division II championship game in only its second year as a division sport. The Mustangs eventually lost 2-0 to defending champion Barry University.

The second place Mustang team earned a 15-5-1 record on the year and captured its first California Collegiate Athletic Association title in its first year in the league.

Jones led the Mustangs in scoring with 13 goals and seven assists in the regular season. Her two goals in the NCAA Division II Final Four earned her a First Team All-Tournament selection. She also tied for the team lead in game-winning goals this year with four. Jones was also honored to the CCAA’s First Team.

Kassis trailed only Jones on the team and scored seven goals and seven assists.

Kassis was also honored as the CCAA Most Valuable Player. Her performance at the Final Four earned her the tournament Co-Most Valuable Player honor.

Head Coach Alex Crozier was also honored as NCAA Division II West Regional Coach of the Year.

MEN’S HOOPS: Mustang freshman leads team

From page 8 about the key to Levesque's success.

6-foot 5-inch junior forward Bucky Tucker put in 10 points and pulled down four rebounds in his 14 minutes of play before fouling out.

Senior Matt Clawson dumped in 14 points — almost doubling his points per game average.

Wayne Williams scored 27 points to lead his team. His 27 points marked the most an individual managed to score against the Mustangs this year.

Quick Roundup

• Nancy Kerrigan will be going to Lillehammer, Norway thanks to a U.S. Figure Skating Association committee decision to place her on the squad and bump 13-year-old Michelle Kwan. Kerrigan withdrew last Friday, one day after an uninvited man whacked her right knee with a club or metal bar.

• Brady makes her home debut with the basketball team in its next game Wednesday at 7:30 against Stanislaus State.

• Williams’ teammate Eric Carpenter assisted the Coyotes with 20 points.

• Cal State San Bernardino’s Tony Tyler led his team with 11 rebounds and also added 15 points.

• The Mustangs had a 16-0 rebounding advantage in the first half but were out-rebounded 30-21 in the second half.

• The Mustangs will look for their first league win when they host Cal State Dominguez Hills Thursday at 7:30 p.m.

WRESTLING: Cal Poly falls 24-15 to Sooners

Sophomore striker Wendy Jones and junior midfielder Kolleen Kassis were named All-American in women's soccer.

The two players anchored a Cal Poly team that advanced all the way to the NCAA Division II championship game in only its second year as a division sport. The Mustangs eventually lost 2-0 to defending champion Barry University.

The second place Mustang team earned a 15-5-1 record on the year and captured its first California Collegiate Athletic Association title in its first year in the league.

Jones led the Mustangs in scoring with 13 goals and seven assists in the regular season. Her two goals in the NCAA Division II Final Four earned her a First Team All-Tournament selection. She also tied for the team lead in game-winning goals this year with four. Jones was also honored to the CCAA’s First Team.

Kassis trailed only Jones on the team and scored seven goals and seven assists.

Kassis was also honored as the CCAA Most Valuable Player. Her performance at the Final Four earned her the tournament Co-Most Valuable Player honor.

Head Coach Alex Crozier was also honored as NCAA Division II West Regional Coach of the Year.

Quick Roundup

• Nancy Kerrigan will be going to Lillehammer, Norway thanks to a U.S. Figure Skating Association committee decision to place her on the squad and bump 13-year-old Michelle Kwan. Kerrigan withdrew last Friday, one day after an uninvited man whacked her right knee with a club or metal bar.

• Brady makes her home debut with the basketball team in its next game Wednesday at 7:30 against Stanislaus State.

• Williams’ teammate Eric Carpenter assisted the Coyotes with 20 points.

• Cal State San Bernardino’s Tony Tyler led his team with 11 rebounds and also added 15 points.

• The Mustangs had a 16-0 rebounding advantage in the first half but were out-rebounded 30-21 in the second half.

• The Mustangs will look for their first league win when they host Cal State Dominguez Hills Thursday at 7:30 p.m.

WRESTLING: Cal Poly falls 24-15 to Sooners

After years in other programs' shadows, computer engineering gets a private HQ

By Katie Portillo

The Computer Engineering program (CPE) at Cal Poly has existed for five years but has lacked a real "home" on campus. But that will change today, when the door of the new CPE program office opens for the first time.

This afternoon, the CPE program will hold a reception and open house in the Engineering East Faculty Office Building to celebrate the opening of its new office.

Cal Poly Computer Engineering Program Director Jim Harris said this is a positive phase in the development of the CPE program. "We hope that this will greatly enhance the identity of CPE," he said.

According to Harris, the CPE program is the "bridge" between the Computer Science (CSC) and Electronic and Electrical Engineering (EE/EL) programs.

"There is a bridge now between the CSC and EE/EL departments," he said. "CPE provides students with a variety of choices between hardware and software, which maximizes curricular flexibility."

The president of the Institute of Electronic and Electrical Engineering (IEEE), Richard Chartel, said the CPE program has been struggling for years to establish its own identity.

"We feel like we've existed in another world between the two departments (CSC and EE/EL)," he explained. "The CPE program itself hasn't really changed. But with the visibility of the new office, it's going to feel as if we finally have a home."

The CPE faculty is made up of ten CSE, EE/EL, and ELCPE "joint staff" instructors.

Chartel said it was formerly up to CSC and EE/EL personnel to volunteer their time and effort to run the CPE program.

The CPE degree is currently unaccredited. A previous visiting accreditation team found the CPE program was "instructionally sound but lacked administrative identity." As a result, the dean of computer engineering authorized the formation of the new CPE office with a director and staff.

"What's happening with the office and the restructuring of the administrative workings of the CPE program is a response to the accreditation team's visit," Chartel said. According to Chartel, accreditation would be a "feather in the CPE program's cap."

The opening of the office should enable CPE members to attend "all the administrative details that go along with running a collegiate degree program."

"The office is meant to become a focal point for CPE faculty and a location for students to seek answers about the CPE program."

Harris said CPE has been granted $30,000 for administrative costs. According to Chartel, CPE is not spending money like a department does.

"These things already exist from the CSC and EE/EL departments," Chartel said. "While I think the kind of identity and visibility that the office will give to the program is a crucial step toward its eventual accreditation."

"With a dynamic and enthusiastic director like Jim Harris, the future of CPE looks bright indeed," he said.

Chris Farley deserves Falcon job
It felt like being kicked in the groin and having barbed wire pulled through my intestines when I heard those four words, "Jerry Glanville is gone." To me it was like hearing Elvis died or John F. Kennedy was shot. It felt like being kicked in the groin and having barbed wire pulled through my intestines when I heard those four words. "Jerry Glanville is gone."

My sports world was rocked. To me it was like hearing Elvis died or John F. Kennedy was shot. It felt like being kicked in the groin and having barbed wire pulled through my intestines when I heard those four words. "Jerry Glanville is gone."

It was fun watching Michael Haynes catch a five-yard quick out into a Jerry Rice-like 81-yard scamper.

It was fun to watch Andre Rison reel in a one-handed diving touchdown catch through three defenders while taunting the defenders midflight.

My sports world was rocked. To me it was like hearing Elvis died or John F. Kennedy was shot. It felt like being kicked in the groin and having barbed wire pulled through my intestines when I heard those four words. "Jerry Glanville is gone."

Now that Glanville has left the building, I don't know if I will be a Falcons fan anymore. I probably will remain a

I didn't know Atlanta had a football team before Glanville. He got me to jump on his band wagon. He even got me thrown out of my dad's house on the handful of occasions the Falcons beat the 49ers — my dad being an avid 49er fan. The porch concrete burns on my face and butt mark on my butt were well worth the thrill of another Falcons fourth-quarter comeback.

Every time, the Falcons and their high-powered Red Gun offense seemed to stay in the game until the end.

No matter what team the Falcons played — whether it was the San Francisco 49ers, the Dallas Cowboys (whom they beat this season) or Larry, his brother Darryl and his other brother Darryl — the game was probably going to be close. Interestingly, to say the least.

It was fun to watch Andre Rison reel in a one-handed diving touchdown catch through three defenders while taunting the defenders midflight.

The men's basketball team opened California Collegiate Athletic Association play with an 86-69 away loss to Cal State San Bernadino Saturday.

The Mustangs (6-7 overall and 0-1 in league) cut their deficit to 40-35 at the 13:32 mark in the second half and closed within 64-58 after a three-pointer by senior forward Kristie McCall with 7:57 remaining.

Beason said the second half was quite different. He said the Mustangs committed too many turnovers — 24 in all — and the Coyotes capitalized by playing well.

The Mustangs sunk only 26 of 61 shots from the floor — 43 percent. From the line the Mustangs made 12 of 22 — 55 percent.

"We took good shots but just missed," Beason said. "Maybe we pressed a little bit too much.

Six-foot, 7-inch freshman forward Damien Levesque managed to benefit with a 8-3 decision over Sooners' Rico Jourdan. Senior Ramon Macias (142), senior Pat Morrissey (150) and senior Jake Gaeir (158) collected wins for the Mustangs.

"Tyson (beat) a senior ... and (we had) great performances by Ramon," Beason said, "and Damien played hard and was extremely active," Beason said, talking to the Mustangs after the loss.

The volleyballer shot his first basket as a member of the Cal Poly women's basketball team in the Mustangs' 79-67 loss to Sonoma State Friday.

Brady recently joined the team, whose numbers have dwindled down to eight.

Senior forward Kristie McCall made better use of her 31 minutes on the floor. She led the team with 17 points and 10 rebounds, but the Mustangs' hopes of reaching the state tournament fell short in an 82-73 loss to Cal State Fullerton.

"We had four seniors and a veteran lineup, and we did well. We took it to them, even in the moments we lost, we were fighting them hard."

The next day the wrestlers continued to battle hard in the Sooner Open against competitors from Oklahoma University, Purdue, Brigham Young University, University of the Pacific, Stanford and Illinois University.

Senior Don Miller lost to unseeded Hardell Moore 12-8 in the championship match at 167-pound weight class.

The three said they were all evenly matched. Miller said, "We had four seniors and a veteran lineup, and we did well. We took it to them, even in the moments we lost, we were fighting them hard."
