Sheep unit forced to move

By Kelly Victoria Youker Daily Staff Writer

Cal Poly's proposed $9 million sports complex has made it past administrative hurdles and budget dilemmas, but as construction begins in 1998, Cal Poly's sheep will be moving to a new home.

Because of plans for the sports complex, Cal Poly's sheep unit is expected to move in April 1998 to Cheda Ranch, located on the northern part of campus just off Highway 1.

The sports complex is designed to occupy the 33 acres that now house the sheep unit, a thoroughbred horse racing track, a rodeo area and a research lab.

According to Bob Rutherford, head of the sheep unit, the rodeo area will also be relocated. The Agricultural Land Use Committee is currently meeting to decide where it will go.

"It is my understanding that the horse track will not be reconstituted. It's not really used anymore," Rutherford said. "The research lab will stay."

The sheep unit supports anywhere from 200 to 600 animals, depending on the time of year. Right now it has about 250.

"The sheep are currently living just off Brizzolara and Came Department discovered that the sheep unit was polluting Brizzolara Creek," said William MacNair, director of the project for facilities planning. "Hopefully the sheep will be able to move by April after their lambing season. It has been determined to be the best time for them to be moved."

The sports complex is not the only reason for the sheep unit's move. The U.S. Army Corps of Engineers and the Fish and Game Department discovered that the sheep unit was polluting Brizzolara Creek, so they too want it moved, MacNair said.

The new location will not have the same resources as Cheda Ranch, MacNair said. They will have to work programs and move them into some community-service jobs.

Professor dissects welfare reform

By Megan Long Daily Staff Writer

Welfare as we know it is changing, but one Cal Poly professor doesn't think the reforms will make the lives of the poor in this country any better.

"The welfare system is no longer a safety net, but more of a prod to go back to work," said political science professor Dianne Long, at a Women's Studies Lunch Time Seminar Monday.

About 60 students, faculty and staff attended Long's presentation, "Women and Welfare Reform." Through this talk, Long explored the effects of the new welfare reform on poor families, teen mothers and immigrants.

After President Clinton signed the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, standards including welfare time limits and required work programs were instituted, and states were given the responsibility of developing programs to comply with those conditions.

If states fail to meet program requirements, they may lose some of their federal funding.

"The states are grappling with this particular charge," Long said. "Every state is responding to this dramatic change, and is in a crunch to decide how to dismantle existing programs and move them into the new framework."

The CalWORKs program (California Work Opportunities and Responsibility to Kids), which will take effect Jan. 1, is a bipartisan compromise that sets a time limit for welfare recipients and requires them to work.

Under CalWORKs, which was voted into law in August 1997, current welfare recipients will be limited to two years of assistance at a time, while new recipients can receive benefits for periods up to 18 months, with an optional six-month extension to be determined by the individual counties.

The federal stipulation of five years of total lifetime assistance is also part of the state's new program.

As part of the welfare-to-work aspect of reform, welfare recipients will have to work or attend job training at least 20 hours per week initially, with that number increasing in 1999. Those who fail to find a job after the time limit will be able to stay on assistance by taking community-service jobs.

In her presentation Long discussed possible negative impacts of the new work-to-welfare system on the 2.5 million Californian recipients of public assistance.

"Right now we're in a real long-term economic boom, so it's a very clever thing to strike on welfare policy at this time because basically jobs are out there for those individuals as they move off welfare into some work programs and Services Pat Harris, who serves as Take Back the Night adviser, spotted some distorted handprints on her way to work.

"I'm mad," said Harris. "The work that the students have been putting in on this issue—it's just been trashed."

Harris said the vandal's use of male genitalia does a disservice to men in that it links men with violence. She said the handprints represent acts of violence committed against both men and women.

Students to show world-premiere surf video tonight

By Brad Davis
Daily Staff Writer

A world-premiere surf video is slated for viewing at tonight's free Surf/Snowboard Festival '97 in the University Union Chumash Auditorium.

The festival will also feature live music from the Wookie Wedgie Loons Band, drawings for prizes, a Hawaiian shirt contest and, of course, surf and snowboarding films.

Program Coordinator Darren Connor said the event is a culmination of eight weeks of work from four Rec. 230 students.

"It was a class project to put on special events," he said. "Students have done all the work."

Those students are Scott Hollitz, Eran Minzei, Heidi Hodges and Aaron Burch.

Burch, a recreation administration junior, said the idea spawned within the group and was then further developed.

"Originally we wanted to show a movie, a surf movie," he said. "And it just grew from there. It's a lot more work than originally expected, and we've turned it into a really big event."

The group originally ordered a surf video called "The Search" from Rip Curl, a company specializing in surfwear. On Friday, Rip Curl Representative Andrew Jakubowski called the group's program coordinator and offered the only American copy of "Stomp," the sequel to "The Search," for a world-premiere presentation at the Cal Poly event.

The theme of the video is travel to exotic, global surf locations. Jakubowski said "Stomp" will also feature "a bunch of young rippers from Australia."

"We try to find new, unseen-before surf spots for the video," he said. "A lot of people will walk away from (Stomp) asking 'where do I get my ticket to those places?'"

Approximately 10 businesses have donated prizes for two drawings set to take place during the event. Tickets are being sold for those drawings at $2 for students and $4 for non-students.

The Surf/Snowboard extravaganza kicks off at 6 p.m. tonight. The band will jam from 6 p.m. to 7 p.m. and from 7 p.m. to 9 p.m.

Hi! My name is Kirk Perron. I’m the founder, Chairman and CEO of Juice Club. It’s hard to believe it’s already been 7 years since the first Juice Club opened on Chorro Street in San Luis Obispo. I’d like to sincerely thank both the community and the team members in our stores for your continued loyalty and for making Juice Club a success.

When I founded Juice Club, my goal was to provide a healthy alternative to fast food. It was your support that helped Juice Club to grow and as a result, our number 1 customer request is to open a Juice Club in every community! As we started to grow, so did our competitors. The only problem was a lot of them were copying Juice Club. That created a lot of confusion in the marketplace, which begins to explain why we felt it necessary to change our name from Juice Club to Jamba Juice.

The first thing I want to clear up is that we did not sell out to Starbucks or any other corporation. The truth is that we do have investors who have provided us with money to grow and take Juice Club to other communities, however, we’re still the same company. I am still leading the company, and the people who helped me start Juice Club - Linda, Kevin and Joe - are still making our dreams become a reality!

Second, we chose the name Jamba Juice and we love it! After 4 hours at Cal Poly library, one of the names Linda had written on a notepad was JAMBA JUICE. We loved the energy the name evoked and the fact that it comes from a word that means “to celebrate!” It’s what we do everyday.

Unfortunately the name change and some of the other changes that we made offended some of our most loyal and cherished customers. This really upset me. We’ve been spending time in our San Luis stores talking to people and finding out what they want. It was you that helped make Juice Club what it is today and your needs continue to be the most important to us.

We’ve learned that a lot of people miss the consistency and taste of our old smoothies. So, we got rid of those new blenders and brought back the old ones. We’re back to “whipping, beating, and blending” our smoothies for you! We’ve also learned that people want more information about our new “Juice Boosts.” So, we’re in the process of putting together a brochure that offers helpful, nutritional information about them.

We’re really sorry about all of the confusion. If we haven’t had a chance to talk to you on one of our visits to San Luis, we’d love to hear from you. You can call us with your thoughts at 800.545.9979. Again, thank you so much for your support all of these years. We look forward to seeing you soon!

With Health and Vitality,

Kirk

Kirk Perron
Jamba Juice Company

P.S.: As a special thank you we’d like you to enjoy $1 off your next smoothie. Just bring this letter the next time you come into either our 17 Chorro Street or 890 Marsh Street stores... no later than December 31st, 1997!
Evaluate this...

By Dawn Pillsbury

Ab, that's special time of the quarter, again, when professors stride much more intently than usual into their classrooms. When they stretch unused facial muscles to smile at the class. They're saying how glad they are that everyone is doing so very well for so. When they hand out evaluation forms.

Now, I don't have any problem wanting a class period filling out those forms for me, I understand some of my colleagues rather enjoy doing so rather than the traditional cell to cell to try and learn something. What I do mind is never knowing how I did on them. I know there's no grades involved and what I write won't go into my academic record, but I'd like to know what the department thought of it. Some of my best work has gone into teacher evaluations. We never get them back the next quarter. The teacher never e-mails me saying, 'Well Dawn, I appreciate your filling out the evaluation so completely, especially the part where you say that when my department head finally wakes up out of whatever coma he's been in and fires me, a kindergarten shouldn't hire me for fear of lowering standards junior, shouldn't hire me for fear of lowering grades of the exams. I've heard the heartache stories of losing a son, a brother or a best friend. And I also heard we lost. We lost more than just the war.

As I move along the wall, as I look at the endless lists of names, I feel a small part of me begins to understand. I feel suddenly really that I am crying.

I don't know one single name, but for a brief moment, I feel I connect with them all.

They were my age. They were feeling, possibly, as insecure about life's direction as I am. But they did something I would never have the courage to do. They did something which to me seems unpayable.

We put their names on a wall. We observe one day out of the year to lower flags across the nation in their honor—but it seems like even that is not enough. There is nothing. These boys are dead. To say thank you now would seem like wasted time. Yet that's exactly what I mumble as I stand there, tears running down my face as I touch it. I know these boys, who grew to be men a world away from home. I am touching the names of heroes. It is for them that I turn and salute my country's flag in the only way I know how to say thanks.

Julie O'Shea is a liberal studies junior.

Get off your drooling butt, you've got it easy

In response to the opinion article titled "Is anybody so sleepy as I am?" by Shonna Waldron, I have only one question. Was it a slow day for opinions? Did the Mustang Daily not have any other opinions that were thought out, supported by facts, or even logical in their presentation of ideas? Analyzing her joke of an opinion would take more time than I would allot from my life. But I thought with some prose.

Miss Waldron, the fact that you can pay over $10,000 a year to attend a university and still fall asleep in class, is less than impressive and hardly garners any sympathy. But that's another issue that needs to be resolved.

What concerns me more is your desire to learn, but seeming inability to do so because of the assumed ineptitude of your professors. Leaving aside the fact that SOME professors lack in teaching style and ability to communicate with the sleepy undergrad, can it be possible that you can learn absolutely nothing? From my undergrad career I took away some important tenets, I learned that an education in what is made of it is needed in a preposition, bad). I learned that the lecture in class is just the beginning of your 'learning' the material, and NOT the end all, be all of your education. True, a real assessment of our knowledge cannot be relegated to a scantron sheet with .50 questions asking for a letter. However, the expectations of higher education have lowered since your grand parents attended college, in fact, the expectations are even slightly lower than your counterparts in other countries. Some countries require you to attend high school through the 13th grade, and then take an exam that determines if you can attend university. Fail the exam and mixing cement is in your future.

Sound harsh? Proves the point. You have it easy and the fact that a professor won't kick you out on your sleep butt for drooling on his/her syllabus is both sad, and borders on pathetic.

Quit your crying, strive to get more out of a class than relying on your drooled stained notes from one little lecture. Disregard this voice and whoever's footling the bill, is throwing away their money.

Too much waste in the world already, don't add to it.

Albert A. Nunez Jr. is a speech communication alumnus.

Good luck with your sports degree

In response to “Show me what you’re made of” Nov. 13

Editor,

This is in response to Mr. Wallace’s letter regarding athletics here at Cal Poly. Perhaps a course in reading comprehension might be in order. Mr. Dexter never designated the skill and effort put into athletics. Nor did he explain what he meant by saying that this is an educational institution, FIRST. The emphasis and yes, the money, should be first in that direction. FIRST. Instead of putting money into a new stadium, perhaps we should be building up our agriculture, engineering and science programs. Perhaps that extra $7 per quarter could be used to pay our teachers so that course offerings wouldn’t have to be cut. I’m paying for my education and resent having to pay for a new stadium as well when there are so many other things that that money could be put into.

I came to Cal Poly because of its reputation as an Agricultural College. If I had wanted to attend a sports-oriented college I would have chosen another. Frankly, I would rather attend a college known for its excellent academic reputation than for its sports programs. When you graduate, you will receive a degree in agriculture - not sports. That should tell you where your priorities should be. This IS NOT to say you shouldn’t participate in sports. The fact that people pay to watch other people play sports, but will not pay to watch them study, should in no way be a determining factor as to who receives scholarships. That people don’t play sports DOES NOT mean they aren’t actively involved in school in some other way. The halls of both the Engineering Department and Soil Science Department (and probably other departments as well) have on display the many engineering students who went to this school. Should they receive less scholarship money simply because people don’t watch them strut their knowledge as you do your athletic ability?

When I graduate, we will be judged not on our athletic ability, but on the knowledge we have gained in our chosen fields of study. Companies want to hire the most qualified people. Not the most athletic. I wonder how the genus, species, subspecies would feel knowing that they are subsidizing students who feel that a low GPA is nothing to be ashamed of so long as they play a sport.

Frankly, Mr. Dexter, I would challenge you to a battle of endurance. Except that in the former case he would probably fare pretty well. (You see, staying in shape isn’t just for the sports team.)

A miscarriage of thought

By Brian Johnson

I read it for the first time in a newspaper couple of years back. It got me so mad I wrote three or four lines in a letter to the editor in response. A year later I heard Alan Colmes say it on his radio show. And two weeks ago, I heard Garrison Keeler say it on his. This absurd, ridiculous argument has been popping up more and more.

"You can't believe abortion is wrong, then try and justify capital punishment," they say. "After all, Killing is killing, and if you believe abortion is killing, then you can't be in favor of the death penalty."

My reply?

"Would you like a plum with those apples and oranges?"

We’re talking about totally different things here. Abortion is not wrong because a human life is being taken. I’ll say it again. Abortion is not wrong because a human life is being taken. Just like false imprisonment is not wrong because of the type of punishment, cell with bars, is not the issue. Putting someone in it unjustly, that is the issue. Likewise, abortion is not wrong because it’s a life being taken, but because the penalty of death is not deserved. Abortion is the killing (not to be emphasized) of an innocent (to be emphasized) human life. Capital punishment is the killing (not to be emphasized) of a guilty (to be emphasized) person.

A person who gets the death penalty does so because of his or her own actions. They are receiving punishment for a crime, and pay the price to society. Now let’s look at abortion.

In abortion, to say “dads,” let alone off a convenience store worker, and giving him or her the death penalty. In capital punishment cases, person A commits crime B which results in punishment C in abortion.

Please write in the space below what crime or injustice a fetus has committed. Well? We are taking a child who hasn’t been given the chance to say “dads,” let alone off a convenience store worker, and giving him or her the death penalty.

The false premise of if you don’t support the other, is the equivalent of saying, if you don’t support capital punishment, you can’t support any punishment.

Again, it is not the sentencing of jail time, the distributing of fines or suspending of licenses that is wrong. It is the act of doing things unjustly that is wrong. Comparing abortion and the death penalty is a total miscarriage of rational thought. They don’t belong being equaled, because they’re not.

If this argument is in your repertoire, it’s high time you kill, well, get rid of it.

Greek parties are safer

Editor,

As an Associate Member of Delta Chi Fraternity, I would like to offer a flip side to the portrayal Greek system in regards to the Oct. 20 article in the Mustang Daily.

Granted, the deaths of four students and the close calls of a few others are unfortunate. However, in the LSU case, autopsy reports found amounts of GHP, a new rave drug, in the young man’s system. When mixed with alcohol in any amount, GHP can cause serious injury or death, as was the case. So alcohol was not completely responsible. And I don’t believe the fraternity is completely responsible either. This LSU student should have known his limits, like a great team does. Someone in the other cases know their limits. Nobody, and I repeat, nobody, forces you to drink. You decide to.

And for all the people who are now saying to themselves “Well, what about peer pressure?" What about it? I learned of peer pressure in fifth grade. People hang with people they feel comfortable with and are more comfortable doing stuff around. These people were and are grown adults, and they knew what peer pressure was. If you couldn’t handle the first drink, or pill was taken. The chances that this could happen were slim, but they knew.

Also, Greek parties are probably the safest parties to attend. Security is there, they are more or less controlled and many more people can be held accountable if something goes wrong. So it behooves our Fraternities and Sororities not to let anything happen. Some say “What about Tyson, he was stabbed at a Greek party.” So What. If he was stabbed at a house party, would such a big deal have been made? Hell no! And I don’t doubt that being at a Greek party may have saved his life. How many Phi Kappa Psi were at that party? Plenty. Plenty more than at some house party. And when I say plenty more, I am talking about people who would jump in and stop whatever is going down.

The Greek system does a lot more than3 than parties. We hold fundraisers to benefit the community, ourselves and fellow Cal Poly students. We donate time to the escort service, to the folks in this world that are less fortunate than us and to the University. And being Greek, having brotherhood and sisterhood, makes all the positive things that happen, happen. It is unfortunate to hear the statement, from a head member of our campus, that the Greek system will be non-existent in ten years. A University representative, who has asked for our help, Delta Chi and others in numerous campus and University functions, has decided that we are not strong enough, that we don’t do enough and that we don’t care.

Well then explain for me if you will, why the Greek system continues to grow. And it has grown 2% each of the past two years. From 8% in 1995 to 10% in 1996 and to 12% in 1997! From 8% of the student body in 1995 to 12% of the student body in 1997 shows that we must have something to offer and without very many large parties, it sure as hell must be something else positive, like Brotherhood, and like Sisterhood.

You, the University Representative, try to dispose of the Greeks by telling of our demerit. You, the University, try to impose policies, guidelines, and bullshit rules, so we can’t throw parties or get together in large groups without feeling like bad people.

We would like to show the light on the fact that Greeks and Greek letters, have been around for many years in the college and Cal Poly community. And even with the attempted suppression of us, we will continue to grow for many years to come. So the next time anyone else wants to write or say anything about the Greeks, turn off Animal House while doing so.

Santana, Laszlo — Divers and fishermen rushed out to pull children dressed in blue and white school uniforms from a New Delhi river Tuesday after an overcrowded bus plunged into the shallow, murky water. At least 30 children died and about 20 were missing.

Witnesses said the driver was racing another bus when his vehicle skidded off a bridge, plunging 50 feet into the Yamuna River. Some students told a local TV network they had asked the driver to slow down, but he did not.

More than 60 people were injured, Sahib Singh Verma, New Delhi's chief minister, said 28 children were confirmed dead and at least 20 were missing hours after the morning accident. Later, Press Trust of India news agency said two more bodies had been recovered, raising the death toll to 30.

The bus had a capacity of 60, Verma said, but was carrying 112 children from primary- to high-school age, a driver, a custodian and three teachers.

Divers, police and volunteers in boats searched the slow-moving river to retrieve the dead and injured — girls in their white tunics and blue sweaters, boys in white pants and shirts. Rescuers draped the children over their shoulders and ran to waiting ambulances.

School officials checked homes to see whether some children may have sworn to shore and walked home.

Most of the injured were treated for minor injuries and released, four, including the driver, remained hospitalized Tuesday afternoon.

The narrow hospital corridors were crowded with waiting parents trying to find copies of the casualty list. The school had no list of the students traveling on the bus.

Outside, about 100 children gathered, yelling out criticisms of the principal for allowing the bus to be overcrowded.

"We have complained a lot of times (about overloading), but nothing was done," Ravi Kumar, who lost his daughter, told the Press Trust of India.

The accident was under investigation, and Verma ordered the suspension of the principal and the police officer in charge of traffic in the area.

"If negligence is proven, action will be taken against those involved," the chief minister said.

He also announced a two-day mourning period and said the government would pay about $2,800 to the families of the dead and $280 to the families of the injured.

Santana, Mary's Only Adult Cabaret

EXOTIC DANCERS

11 AM TO 2 AM

7 DAYS A WEEK
The baby was cranky and sleeping poorly. The boy's mother, who works, had a hunch. So the nanny was yelled at the baby, "You're miserable!" recalls Glenn B., the father. "She ignored him while he cried."

More and more parents are using hidden cameras to find out what goes on when the baby sitter is alone with the children. Despite the murky legalities and ethics of such spying, detectives and electronics shops are expanding into the business. Specialized agencies with names like Nannyvision or Baby-Safe are springing up.

And after each new headline involving an abusive nanny, most dramatically, the trial of the English au pair Louise Woodward — whose parents turned to spying — "Do you have to have your kid really hurt to find out the facts?" asked Glenn B., a New York City area financial adviser who last week bought a $1,500 miniature camera, partly because of the Woodward case.

The reaction of many families, who recently rented a camera to screen a prospective nanny, was "They have helped spur the nanny screening."

Secret videotaping — whether in the office or home — raises red flags for privacy rights, legal and rights advocates. Two types of record­ings are generally considered ille­gal, tapping other people's private conversations at work and taping in bathrooms or at other grossly intimate times.

Parents who exercise good judgment in the location of their camera are probably OK, but "there's no guarantee. We don't want to think of ourselves as Big Brother," said Lewis Maltby, director of the American Civil Liberties Union.

At the same time, videotaping is no substitute for thorough refer­ences checks and interviewing.

"There is some guilt in this. You do feel you're invading and being sneaky," said Karen T., a California mother who bought a camera last week to tape the first sitter she has had since she filmed her nanny hitting her 6-week-old last year. "You never want to think of yourself being like this. But are you going to do it?"

SHEEP from page 1

"It's not in the sports complex and is a lot of money away from central cam­pus, on a dirt road, creating an economic problem. It will take labor and money to supply the sheep's nutritional level sup­plement.

Rutherford said the move will affect students more than the sheep. The unit will be 5 miles away from central cam­pus, on a dirt road, creating an inconvenience for the students who have classes there.

He said sheep eat mainly grains and the grass supply at Chedra is not adequate to support the sheep. In order to make Chedra Ranch usable for the sheep unit, it will cost the state anywhere that $400,000 to $600,000, plus a fine. According to Schroeder, if an off­ensive word or not viable with video­cameras in action, making an arrest requires locating witnesses or indi­viduals who possess information about the crime, interviewing the suspects and submitting the information to the district attor­ney. The district attorney would then decide whether to issue a complaint.

"We would appreciate any help we can get," he said. "I think it's stupid, but college people are going to be college people... There's always people out there who don't take things like the red handprints) seriously.

Police, however, cannot take the incident lightly. Vandalism is a misdemeanor under section 94B of the California Penal Code. Schroeder said misdemeanors are punishable by up to one year in jail.

Rutherford said, "It's not in the sports complex budget or the Foundation bud­get," he said. "The state of California maintains the sheep unit and because the state is basically shutting down a labora­tory, then they have an obligation to relocate it."

But Rutherford believes the move will affect students more than the sheep. The unit will be 5 miles away from central cam­pus, on a dirt road, creating an inconvenience for the students who have classes there.

He said sheep eat mainly grains and the grass supply at Chedra is not adequate to support the sheep. Rutherford said, "It's not in the sports complex budget or the Foundation bud­get," he said. "The state of California maintains the sheep unit and because the state is basically shutting down a labora­tory, then they have an obligation to relocate it."

But Rutherford believes the move will affect students more than the sheep. The unit will be 5 miles away from central cam­pus, on a dirt road, creating an inconvenience for the students who have classes there.

He said sheep eat mainly grains and the grass supply at Chedra is not adequate to support the sheep. In order to make Chedra Ranch usable for the sheep unit, it will cost the state anywhere that $400,000 to $600,000, plus a fine. According to Schroeder, if an off­ensive word or not viable with video­cameras in action, making an arrest requires locating witnesses or indi­viduals who possess information about the crime, interviewing the suspects and submitting the information to the district attor­ney. The district attorney would then decide whether to issue a complaint.

"We would appreciate any help we can get," he said. "I think it's stupid, but college people are going to be college people... There's always people out there who don't take things like the red handprints) seriously.

Police, however, cannot take the incident lightly. Vandalism is a misdemeanor under section 94B of the California Penal Code. Schroeder said misdemeanors are punishable by up to one year in jail.

PITCHERS FROM WORLD SERIES TEAMS SELECTED AS FIRST PICKS

By Ben Walker
Associated Press

PHOENIX - When last seen together, Tony Saunders and Brian Anderson were pitching in the snow during Game 4 of the World Series. They were linked again Tuesday amid palm trees and cactuses as the top two picks in baseball's expansion draft.

The Tampa Bay Devil Rays made Saunders the overall No. 1 choice, taking the rookie left-hander three weeks after he helped the Florida Marlins complete their five-year zoom from expansion losers to World Series winners.

"It's an honor," said Saunders, reunited with Tampa Bay manager Larry Rothschild, the Marlins' pitching coach until this month. "That tells me I must have done something right, that they wanted me before anybody else."

The Arizona Diamondbacks followed by choosing Anderson, a 25-year-old left-hander not protected by the Cleveland Indians.

"I enjoyed my time in Cleveland," he said. "I'm looking forward to being on a team that's just starting out."

Young pitching was at a premium early, and prospects far outnumbered veterans as both teams made 14 picks in the first round. Atlanta knuckleballer Dennis Springer (Tampa Bay) and White Sox catcher Jorge Fabregas (Arizona) were the only players over 27 years old taken.

Stars such as Fred McGriff, Eric Karros and Eric Davis were passed over. But there was a chance high-name players would later be among the 35 picks by each team, and that could set into motion a lot of trades.

NL Cy Young winner Pedro Martinez of Montreal, Marlins pitcher Kevin Brown and Cleveland third baseman Matt Williams were mentioned prominently in trade speculation. No deals were allowed to be announced, however, until after the draft ended, expected around 11 p.m. EST.

Boston pitcher Jeff Suppan and New York Mets pitcher Cory Lidle were taken in the opening round by Arizona, which will play in the NL West, Colorado outfielder Quinton McCracken and Houston outfielder Bob Abreu were picked by Tampa Bay, which will be in the AL East.

The cash-rich Diamondbacks, who signed free agent shortstop Jay Bell to a $34 million, five-year contract on Monday, were also closing in on a free agent reliever Roberto Hernandez.

The draft was held at the Phoenix Civic Plaza, right across the street from the Mariners' new Bank One Ballpark. Unlike the NFL draft, which attracts only select fans from the arena, there was little reaction to the lesser-known picks by the 75 supporters from both Tampa Bay and Arizona.

Marlins fans tried to make the fans feel comfortable, decorating the hall with palm trees and cactuses.

Tampa Bay, given the No. 1 pick when Arizona won the coin toss and elected to take the second and third choices, got off to a nice start with Saunders.

Saunders went 4-6 with a 1.65 ERA in his first season in the majors, though he gained a lot of notoriety by going 3-0 with a 1.65 ERA against Atlanta. He was in Florida's postseason rotation, and started and lost Game 4 of the World Series at Cleveland.

Saunders thought he was on the Marlins' 15-man protected list, but found out differently when the Marlins called him on his cell phone Tuesday while he was at a mall in Maryland taking Christmas pictures with his 3 1/2-month-old daughter.

Roy Tarpley charged with burning girlfriend

By Chris Newton
Associated Press

DALLAS - Roy Tarpley was arrested and charged with burning his girlfriend's stomach with a clothes iron, the latest legal problem for a player whose NBA career ended because of drugs.

Tarpley was being held in Lew Sterrett Justice Center on $500 bond for not appearing in court on an warrant for his arrest on an unpaid $105 speeding ticket and a $142 citation for not appearing in court in connection with the ticket.

Denton County also was seeking Tarpley's arrest on an aggravated assault charge.

"Probably, Denton County will come down first because that was the most serious charge," Ewell said.

Tarpley was barred from the NBA for the first time in 1991 for using cocaine. The NBA reinstated him before the start of the 1994-95 season, and he signed a six-year, $26 million contract with the Mavericks.

In October 1995, Tarpley could not complete a team physical because of suspected pancreatitis. He was banned again in December 1995 for using alcohol, violating the terms of his after-care program.

He forfeited the remaining $22.2 million of his contract with the Mavericks.

On March 6, police found Tarpley passed out in his car on a Dallas expressway. He was arrested on misdemeanor intoxication charges.

Later that month, he was charged with assault after a woman told police Tarpley went to her apartment and screamed threats at her. Then he threw her down, choked her and chased her into the street when she tried to escape, she reported.
French said he also does well because of the camaraderie and support of his wrestling team. "A lot of teams wrestle around the nation aren’t close, they’re really cliquish," he said. "At Cal Poly the whole team is a unit, we go out together, we’re really tight."

French is grateful for his teammates and thankful to be involved with wrestling at Cal Poly because it helps him alleviate stress.

"Wrestling is a stress reliever because when we go to practice, we go in there and beat on each other for three hours and then go home," he said. "We get rid of a lot of stress that way, get beat on and beating on other people."

Off the mat, French said he hangs out with his teammates and loves to travel, but most of his time is spent with his girlfriend.

After graduation, French said he plans on continuing to wrestle. He said there’s always a possibility of trying out for the Olympics, among other things.

"I’m going to try and pursue it," French said. "To go to the freestyle national meets, compete internationally, and then we’ll just see how it goes."

French said his competitive side is usually what pulls him through a wrestling match.

"I hate to lose," he said. "Most guys on the team have more skill than I do, but I think the reason I win is because I’m a competitor. When there’s pride on the line, that’s when I do well."
French competes for pride

He's very mentally tough and he's a battler, a brawler. He doesn't dazzle people with his technique, but he's a tough fighter on the mat and he gets the job done.

Cal Poly wrestling coach on Mike French

Whelemen rank second nationally in track, mountain

The Cal Poly Mountain Cycle Wheelemen traveled to Mereimac, Wisconsin November 8-9 for the National Collegiate Cycling Association Mountain Bike National Championships and came home with a seventh place finish. This result combined with their seventh place finish at the track nationals in September vaults Cal Poly to second place overall.

Junior social sciences major Jumana Mofor with Coach of the Year honors.

NCAA Div. I-AA
Football Poll

No. 18 in both the USA Today/ESPN and the Sports Network poll.

I’ve been having trouble sleeping the last couple of days. Actually, ever since the football team won on Saturday. I’ve been tossing and turning all night.

I’ve lost even more sleep since the football polls came out on Monday.

No. 18 in both the USA Today/ESPN and the Sports Network poll.

I hit the web to find out what it all means and how good Cal Poly’s chances of making the NCAA Division I-AA playoffs are. Now I’m buried in a mass of papers Jeff Sagarin’s ratings, NCAA statistics and schedules.

I think I’ve finally got a handle on it.

Most importantly, Cal Poly needs a win this Saturday against Sacramento State. The Hornets are No. 9 this season.

The Mustangs compete as an Independent, they are battling for one of the eight at-large bids.

Cal Poly wrestling coach Lennis Cowell said they are an Independent team and also ranked one spot higher than Cal Poly.

Hostra beat Liberty last week and 17-12. Maine (5-5) this week. Cal Poly’s only loss was to Eastern Kentucky.

The Mustangs have a few things favoring Southern University. ranked No. 13 doesn’t normally compete in the NCAA Division I-AA playoffs, but opts for a bowl game instead.

All these factors should hopefully lead to a playoff spot for Cal Poly.

Everyone will be able to sleep better this Sunday night when the Mustangs finally hear word from the NCAA Selection Committee.

I’ve also been losing sleep over something else. As a fan of Cal Poly soccer, the toughest loss I’ve seen was two weeks ago in the Big West Championship game.

The women’s team faced UC Irvine and waged a four overtime thriller.

A 2-3 loss probably cost the Mustangs a spot in the playoffs.

But their season didn’t go unnoticed by the Big West Conference, who on Tuesday awarded forward Gina Oceguera with Player of the Year and head coach Alex Cowherd with Coach of the Year honors.

Yesterday’s Answer:
Nancy Lieberman-Cline, a three time All-American, was the first woman basketball player to play in the men’s pro-league (USBL)

Congrats Dean Wilkie!

Today’s Question: What U.S. District Court judge became the first baseball commissioner?
