New major doctors up college of engineering

There are 125 students with a biomedical concentration; 23 students hope to receive a master’s degree in the field

Corry Harris

Cal Poly’s college of engineering received a boost with the addition of biomedical engineering to its list of majors.

Current sophomores and freshmen will be able to graduate with the degree.

According to a FAQ produced by the college of engineering, "Biomedical engineering is a branch of engineering in which knowledge and skills are developed and applied to define and solve problems in biology and medicine".

So how does this relate to Cal Poly students? Ben Call, an engineering senior, explains biomedical engineering’s significance to a community.

"In biomedical engineering, we do anything from designing artificial implants like hips and knees to pace makers and surgical tools," Call said. "It’s pretty much anything a doctor would use in the surgery room."

Some students believe that the major will be impacted within in its first years.

"The demand is high for biomedical engineering," engineering senior Jessio Wood said.

Both Wood and Call will graduate from Cal Poly with a concentration in biomedical engineering. It would not be a surprise to Call to see many engineering students jump to the biomedical major.

"It is attractive to a lot of engineering students," he said, "You get to help people out in a direct way.

High cost of diesel hitting farm industry hard

A barrel of crude oil costs as much as $55, up from $33 this time last year
Juliana Barbassa

FRESNO — The farmers who grow many of the fresh fruit and vegetables for the nation’s dinner tables say the rising cost of oil is making this one of their toughest planting seasons yet.

Farmers nationwide have seen the price of fuel more than double, from $4.55 a gallon in April 2005 to $9.97 in April 2005. In California alone, they use more than 1.5 million gallons of diesel a day at the peak of harvest.

Truckers in the state, which has the highest fuel prices in the country, pay about $0.36 a gallon at the pump. 28 cents more than this time last year, for diesel, which sells for about $2.26 a gallon nationally.

Nationally, U.S. farmers will spend about 10 percent more this year, about $3 billion, on costs including fuel and fertilizer, even as the price consumers pay for fruits and vegetables remains relatively stable, said Terry Fried, senior economist with the American Farm Bureau Federation, a Washington, D.C.-based group representing farm interests.

"Farmers are price takers, not price makers," said. "This means they’ve just had their income reduced by $3 billion."

High diesel prices burden farmers

California farmers and truckers pay 30 cents more per gallon for diesel than the national average.

Musical students jump to the biomedical field

According to an FAQ produced by Cal Poly’s college of engineering, "Biomedical engineering is a branch of engineering in which knowledge and skills are developed and applied to define and solve problems in biology and medicine."

So how does this relate to Cal Poly students? Ben Call, an engineering senior, explains biomedical engineering’s significance to a community.

"In biomedical engineering, we do anything from designing artificial implants like hips and knees to pace makers and surgical tools," Call said. "It’s pretty much anything a doctor would use in the surgery room."

Some students believe that the major will be impacted within in its first years.

"The demand is high for biomedical engineering," engineering senior Jessio Wood said.

Both Wood and Call will graduate from Cal Poly with a concentration in biomedical engineering. It would not be a surprise to Call to see many engineering students jump to the biomedical major.

"It is attractive to a lot of engineering students," he said, "You get to help people out in a direct way.

Environmental horticulture science major and team member Audrey Chaney stood out by winning the top judge in the county. She was award-
Biomedical
continued from page 1

with the quality of their life. You really will get a lot of satisfaction at what you accomplish."

Wood and a few of her fellow classmates have made the helpful push for biomedical engineering to go from a concentration to an actual major.

"It's a nice way to be visible on campus. We have become the intermediate between the students and the faculty," Wood said. "We even had a booth at open house. It was called a place the implant on the patient. It was a fun little game where kids had to fish out an implant and place it on a patient."

The Biomedical Engineering Society played a crucial part in getting the major accepted. Along with the help from engineering professor Dr. Dan Walsh, the club spoke out to gain attention.

"He (Dr. Walsh) calls us the ambassadors of biomedical engineering," Call said.

There are currently 125 students who have a concentration in biomedical engineering and 23 students hope to receive their masters degree in the field.

The major focuses on other engineering concepts as it deals with biomechanics, bioremediation, bioelectric Signals, communications, and microbiological interaction with materials.
Jennifer Wilbanks checked herself into a lawless region near the Syrian border Tuesday after meeting one of the Euphrates River. Marines and councilmen, including the man in line to become interim mayor, were on trial Tuesday on federal charges for taking money from a Las Vegas adult club owner in exchange for trying to ease restrictions on touching strippers.

Councilmen Michael Zucchet and Ralph Inazuza pleaded not guilty to charges they participated in the alleged scheme to reap San Diego's "no-touch" law in exchange for tens of thousands of dollars from club owner Michael Galand.

"This is a case about the corruption of the political process through bribery, undue influence and deceit," Assistant U.S. Attorney Paul Cook said in his opening statement Tuesday.

PINE MEADOW — Six bodies were found Tuesday in a sprawling ranch home in rural Riverside County, authorities said. Deputies responded to a 911 call around 4:30 a.m. discovered the bodies in the home on Devil Ladder Road, Riverside County Fire Department spokesman Patrick Chandler said.

SAN LEANDRO — Alameda County supervisors are considering a proposal to open a medical marijuana clinic at a county hospital as an alternative to private pot clubs that have generated complaints from neighbors.

If a majority of the Board of Supervisors approve, Alameda County could become the nation's first public entity to run a medical marijuana dispensary.

The idea of opening a clinic at San Leandro's Fairmont Hospital, which now has rehabilitation and HIV services, was proposed by Supervisor Nate Miley at a committee meeting Monday and will come before the full board on May 24.

CHICAGO — Children who are poor often don't get the medical follow-up they need for lead exposure, and those at highest risk for lead poisoning are the least likely to get additional testing, a study in Michigan found.

The study involved 3,402 children in the Medicaid program whose blood tests showed levels of lead that could harm mental function. Only about half the children — 54 percent — had follow-up testing within six months, the researchers said.

SEUL, South Korea — North Korea accused the United States on Tuesday of "making a fuss" by notifying allies of the communist nation's possible preparations for a nuclear test, and maintained it would stay away from international disarmament talks.

However, the North didn't confirm or deny it was planning such a test.

IN OTHER NEWS

MUNCIE, Ind. — A Ball State University student always teased her mother for being unable to cook well, but she never imagined it would land the two a spot on NBC's "Today" show.

Courtney Brown and her mother, Suzi Brown of Columbus, appeared Wednesday on the morning news program as one of four families featured in a series titled "My Mom's Not the Greatest Cook."

"This all has been a little embarrassing, but if there is anyone who deserves it, it's me," said Suzi Brown, 52. "Everybody who knows me knows that I've always considered myself a poor cook."

For the segment, a Today show crew came to the Brown's home in Columbus and requested that the mom bake something. But she had problems with her stove, which she had cleaned the night before.

"I washed the knobs, and when I showed them back on, I put them on the wrong places!" she said. As Courtney Brown was helping her mother with some sloppy joes, sandwich bread her mom had placed in a toaster began to burn.

"Smoke was coming out of the toaster," Suzi Brown said.

At this point, the daughter noticed something else about the sloppy joes.

"The can expired in 2003," she said. "I was like, 'This is disgusting!'"

UNDER FOUR? OR IN THE ER?

69% of students never injure themselves due to drinking. The average CP student drinks less than 4 in a sitting.
Rifts between non-resident landowners and locals prompted a "no" response to a Montana university's grant request
Susan Gallagher

HELENA, Mont. — The rejection letter to the University of Montana fundraising drive was just five sentences, straight and to the point: Until Montanans start showing that out-of-state landowners are "more appreciated," the writer said, don't expect a donation.

"This is both baffling and humorous and it sounds like the melodrama of the New West: Wealthy outside landowner and locals clash over stream access." — JERRY BROWN

University of Montana's dean of journalism, Jerry Brown, the university's dean of journalism, responded to the letter by saying, "This is both baffling and humorous and it sounds like the melodrama of the New West: Wealthy outside landowner and locals clash over stream access.

Other wealthy people have bought land in Montana only to find conflict is part of the package. After Ted Turner began buying ranch property more than 25 years ago, some Montana cattlemen complained when he brought in prized cattle, which ranchers feared could transmit disease to cattle. He refused to allow hunting on a ranch, and neighbors complained that elk wandering from his place damaged private land.

Last year, former NBC anchorman Tom Brokaw, who gave the University of Montana $40,000 for its journalism building, obtained a court order revoking permits that would have allowed an outfitter to take more hunters onto land next to Brokaw's Montana ranch. Brokaw said he did not oppose hunting in general but was worried that he or his family would get hit by a stray bullet. In Montana's Bitterroot Valley, rock singer Huey Lewis has been involved in a dispute for several years over water running through his property. Lewis maintains that it is nothing more than a ditch and is not covered by a Montana law that says all navigable streams are public. Some Montana cattlemen fought for control of livestock on his land are keeping people from teaching the Ruby River. Jerry Johnson, a political scientist at Montana State University, has studied what he calls "the out-of-state-national-comer thing" for more than a decade.

"It's really easy to blame the out-of-staters for putting up 'no trespassing' signs one day last summer to fish the waters. As for Kennedy, critics such as the Atlanta-based Center for Public Integrity, have encouraged landowners to sell or give away their land.

"Sometimes your emotions get carried away," said Kennedy, whose personal giving in Montana includes scholarships for high school students in Twin Bridges and White Sulphur Springs, near his property.

Jerry Brown, the university's dean of journalism, responded to the letter by saying, "This is both baffling and humorous and it sounds like the melodrama of the New West: Wealthy outside landowner and locals clash over stream access."

planning firm specializing in the

Are you serious about working for a major competitor in heavy civil construction?
Do you like teamwork? Do you want to build some of the most challenging projects in California?
Do you want to grow with a great company? Do you like to get your hands and feet dirty?

If you answered YES to these questions,
we want to talk to you!

Shimmick Construction is currently recruiting for the position of
Construction Engineer.

This position demands an energetic and dynamic person. It is very
“hands on” as well as technically challenging. The duties include
managing the field personnel, procuring materials and equipment
and other company assets. Other duties include scheduling, cost
estimating, and project management/procurement of varying
responsibility levels. Project management will include submittals,
progress payment requests, management of subcontractors, and
many other types of contractual documents. Engineers typically
work in a support role directly for project superintendents/engines
and work closely with the crews.

Minimum Requirements: Pursuing a B.S. in Civil Engineering,
Engineering Technology, or Construction Management preferably
with an interest in construction

Internships are also available.

Please E-mail or fax your resume to Chermene Hooker at info@shimmick.com fax
510/293-1110. Please visit www.shimmick.com for our current job openings.

Shimmick Construction Co., Inc. is a General Engineering-Heavy Civil Contractor
headquartered in Northern and Southern California. The Company performs heavy
engineering projects for various government agencies in the greater Bay Area and
Southern California. Shimmick Construction is an Equal Employment Opportunity Employer

Shimmick Construction will be on recruiting
on campus on the following dates:

Nunhems' Vision & Mission

Nunhems is

A globally integrated group of teams dedicated to the development and marketing of innovative
vegetable genetics and related science and services for the production of healthy food.

Nunhems stands for:

• Well-being of its customers and employees
• Long-term value growth
• Ideas and innovations
• Functional and cultural diversity and an open mind for everybody’s contribution
• Entrepreneurship with professionalism and integrity

Nunhems employs a highly trained workforce in research, plant breeding, seed production,
seed processing, and marketing and sales. All members, whether in research, operations or
sales, are dedicated to the creation and marketing of state of the art vegetable seed varieties
with an added value to Nunhems’ customers.

Nunhems’ responsibility does not end with the supply of the seeds. For better results,
Nunhems has organized their marketing and sales into crop teams to better focus on our
customer’s needs. Cell biotechnology, seed technology, molecular biotechnology and
information technology departments support the plant breeding technology. Nunhems
considers the health benefits of its products an essential part of plant breeding and
marketing strategies. Nunhems strives for long-term value growth for all shareholders; customers,
and employees. Ideas and innovations are founded on the creativity to apply and implement
advancements of science and technology. As an international company, Nunhems respects
cultural differences in the many countries they operate in and do business. Nunhems pursues
excellence inside and outside the company, and emphasizes entrepreneurship in all aspects of
our business.

Our result is founded on entrepreneurship

The following positions are currently open to application:

Food Scientist • Support breeding and product development activities through vegetable quality analysis. Identify and implement novel vegetable quality traits.

Assistant Breeder • Together with the Breeder assist in providing direction to the breeding program in designing and executing the process of continuous variety
improvement and development in certain market areas. Responsibilities include: horticulture, plant breeding, genetics and related field with 1-2 years experience
in plant breeding. Working knowledge of horticultural practices and procedures, genetics and plant breeding preferred.

Sales Specialist • Introduce new varieties and realize sales within an international environment in order to realize long-term profitability and partnership with customers.

engineering, interior design, and planning services to domestic and international clients. With five offices across the country, including one in Irvine, EwingCole has grown from a small firm in the early 1960s to over 300 professionals. The firm's portfolio includes a diverse collection of projects in the research and development, healthcare, corporate interiors, sports and entertainment, academic, cultural, government, and senior living practices.

Fastenal Company Fastenal is the fastest growing industrial supplier in North America and we are looking for motivated individuals that are interested in starting a fast paced career. With over 1,500 locations and over 1.2 billion dollars in sales in 2004 and a growth rate of over 20 percent since 1967.

FCI Constructors, Inc. FCI Constructors, Inc., a Flannion Company has been serving California since 1991, specializing in Transportation & Heavy Civil Construction Projects. Our experience encompasses major bridge/ regrets projects, toll road, light rail transit, tunnels and other transportation and infrastructure projects. AGC of California has been an integral part of our projects and business development.

Fetzer Five Rivers Ranch Fetzer Five Rivers Ranch located in Paso Robles is a progressively designed 5,000 ton red wine facility and one of the largest growers of organically grown grapes. Fetzer values its employees and is committed to quality wine production while maintaining a high level of environmental stewardship. We have two to three temporary harvest intern positions open for fall 2005.

Field Paoli Architects Field Paoli is a diverse, design-oriented architectural practice with a national reputation in complex, large-scale community, mixed-use and retail projects. Since our inception in the 1970s our design efforts have focused on the integration of multiple uses within a community and our expertise includes the design of community centers and libraries.

Gillespie Design Group Gillespie Design Group is a 35+ person Landscape Architect firm involved in all aspects of landscape architectural design for residential developer-planned communities, urban developments, hotels and resorts and commercial developments. We are located in La Jolla, a suburb of San Diego.

Gotha Architecture Inc. Full service architecture firm located in San Diego specializing in Coastal housing, both single and multi-family work as well as specific commercial site projects. Great opportunity for the right person to work in our relaxed and fun environment while being challenged with unlimited opportunities and experience.

Gothic Landscape Gothic Landscape is committed to proudly create an unparalleled client experience that enhances our environment and demonstrates our passion for extraordinary service. We work primarily in the home building industry dealing with the largest builders in the Southwest. We are into landscaping and maintenance services. We are looking for motivated and organized individuals that can train and promote in the landscaping industry.

Harris & Associates Harris & Associates has been committed to serving public and institutional clients since 1974. Since our inception, our firm has seen dramatic growth within the size of our firm and the expansion of services we provide. Given the ever-changing needs of the communities around us, we are constantly faced with new challenges and opportunities to create a dynamic and exciting work environment.

HBE Corporation The HBE Corporation is a fully integrated design-build organization headquartered in St. Louis, MO. We continue to be a major force in the highly fragmented engineering, architectural, and construction industries. HBE has been selected by Forbes magazine as one of the top 100 privately held companies within the U.S. and currently ranks among Engineering News Record's top design-build firms. Our unique single-source, design-build format allows employers to be exposed to every facet of design, engineering, and construction within one organization.

The Henry Wine Group The Henry Wine Group is a wholesaler/broker/importer of fine wines from around the world. We are a company focused on wine education and sales training.

HGA Architects and Engineers HGA is a full-service architecture and engineering firm with six offices nationwide. HGA trains listen and lead. The firm is about helping clients fulfill their needs and realize their aspirations. Delivering lasting, flexible and environmentally intelligent design is the legacy on which HGA was built and the one it intends to leave for future generations.

Hibiichi Global Storage Technologies Hibiichi Global Storage Technologies is a global storage technology company that brings a customer — focused and full service approach to solutions for the hard disk drive marketplace.

Hitachi Global Storage Technologies is positioned to inspire and lead the evolution of storage component technologies in the spirit of its founders.

HKS Architects Inc. HKS began in Dallas, Texas with Harwood K. Smith. The firm has been in operation since that time—growing and expanding, becoming one of the most recognized and successful architectural firms in the country — with significant commitments in the commercial, health care, hospitality, education, sports, aviation, justice, and religious practices. The firm is headquartered in Dallas with offices in Atlanta, Los Angeles, Mexico City, Orlando,Richmond, Salt Lake City, Tampa, Washington DC, and alliances in the United Kingdom.

HOK HOK is celebrating its 50th year in 2005. We have 22 offices around the world. Our office in Culver City has both Architecture and Interior Design. We work in a wide variety of large-scale projects — healthcare, science + technology, higher education/university, justice, corporate, aviation, general office. We have a major focus in sustainable design and a keen interest in creating projects that lives through the built environment.

HRP LandDesign HRP LandDesign offers an excellent professional environment. With four design studios and a technical support studio, we offer employees the opportunity to work in a variety of land use planning opportunities. See Directory, page 9.
Irrigation Designer Position Available

KTU+A, a San Diego-based land planning & landscape architecture firm, has a position available for an irrigation designer. The position will require close coordination with the Irrigation Project Manager, production of computer-generated drawings, specifications, cost estimates and as-builts for a variety of project types. Assignments may include site analyses, water audits, site visits, writing inspection reports, memos and technical reports.

Minimum requirements:
- Current or completed college course work in landscape irrigation system design and construction documents.
- Proficiency in AutoCAD 2004-2005, Microstation experience desired.
- Must be self-motivated, with good organization and communication skills.
- Field experience and construction administration a plus.
- Positive attitude and the ability to smile, even while working on deadlines.

For consideration, please contact:

Landscape Development, Inc.
Landscape Development, Inc. was
founded in 1982 with the goal of
delivering the highest quality land­
scape services to the California
market. Landscape Development's
headquarters is in Valencia. In
2000, Landscape Development, Inc.,
exploded to open an office in San
Diego, Ca. Since the launch of the
San Diego Division, we have added
divisional offices in Norco,
Balakiedad, and Ventura.

Lion Charang Rohling and Associates
Lion Charang Rohling and Associates
is a medium size architectural firm
providing high quality residential
design services. UCRA's primary
focus is on single and multi-family
luxury housing throughout California
for the publicly held
builder/developer clientele. Our
informal office atmosphere provides
every staff member a broad range of
responsibilities in both design and
production with opportunities in
hand drawn conceptual design and
computer aided graphics. Located in
the heart of vibrant Old Town
Pasadena, we offer comfortable
working conditions in a contempo­
rary environment.

Nikon Beaumont Design
Group, Inc.
Nikon Beaumont Design
Group, Inc. is an in-house
architectural, structural engineering,
planning and interior teams
collaborate to provide
our clients with award win­
ning & comprehensive design solu­
tions. Key to Nikon Beaumont —
and important to our client's ulti­
mate success — are respect and
integrity. We honor ideas and
expressions as part of our team
approach. At LBDCi we value chal­
lenge and enjoy the excitement and
opportunities presented by our
work. We have fun working
together to meet our client needs.
LBDCi is a growth oriented firm
with strategic goals which promote
opportunity for all staff.

LPA, Inc.
LPA, Inc. is one of the largest
architectural, planning, landscape,
and interior design firms in
California. Founded in 1965, LPA has
a long history of architectural
design and project management
experience. LPA provides a full
spectrum of architectural, planning,
landscape architecture, and interior
design services from early program
development to final design docu­
tment through completion of con­
struction administration.

LPA Sacramento, Inc.
LPA Sacramento, Inc. is a multi­
discipline design firm offering
services in architecture, planning,
landscape architecture, interior
design, and graphics. For over 25
years we have focused on how the
total physical environment, from
open space and landscape, to build­
ings and their interiors, affects peo­
ple. We are committed to utilizing
function, aesthetics, environmental
quality and economic considera­
tions to provide our clients' projects
with a distinctive sense of identity
and place. We work with public and
private clients to maximize site
potentials with architecture, land­
scape and interior design elements,
design and create places that are functional and
inspiring.

LR Design Associates
LR Design Associates is a mod­
erate sized, award winning, service
oriented firm located in Oceanside,
California. Project emphasis is in
the area of K-12 through Junior
College educational facilities.
Projects range from the moderniza­
tions and additions to existing
school campuses to new
Elementary and Middle School
projects, multi-story Science and
Technology Buildings, to Junior
College Libraries, Science Labs and
Student Union Centers.

LSI Logic Corp.
LSI Logic is valued for its tech­
nology leadership and ability to
provide complete solutions for our
customers. We offer three enabling
system-on-a-chip technologies —
Platform ASICs, standard-cell
ASICs, and standard products — as
well as host bus adapters and sup­
porting software for our global cus­
tomer base.

Lynx Iron Corp.
Incorporated in June of 2000,
Lynx Iron has emerged as one of
the largest and most respected steel
fabrication companies in Central
California — a testament to our
determination, hard work, and
superior performance on a broad
spectrum of projects. The compa­
y's primary plant, located in
Bakersfield, sits on more than 9
acres and houses a 35,000 square
foot structural fabrication facility,
and a 15,000 square foot facility for
our main operations and clerical
offices. In addition to our house
detailing and production staff are
located in an adjoining facility.

MacKay & Sons
MacKay & Sons was founded
in Sunnyvale by Donald G. MacKay,
and George E. Somps in 1953.
Today MacKay & Sons employs
approximately 180 engineers, sur­
vivors, planners and support staff
and is consistently listed among the
largest 300 design firms in the
United States by the Engineering
News Record (ENR). The firm
offers a broad range of civil engi­
eering, surveying and land plan­
ning services from offices in the
San Francisco Bay Area, and the
Sacramento Valley.

Masterfoods USA
Masterfoods USA is a diversified,
multinational company, operating
on a global scale in more than 40
countries, yet is privately owned.
We are a world leader in each of
our main businesses, consisting of
more than five product groups,
including stack foods, main meal
foods, pet care products, electronics
and information. We offer an excel­
ient compensation package, com­
petitive benefit packages, unique
work environment and opportuni­
ties for professional growth.

Maxim Healthcare Services
Maxim Healthcare Services pro­
vides medical staffing, home health
and wellness services. Founded in
1988, Maxim has rapidly expanded
to include nine divisions and over
200 branch offices in 38 states. We
have earned a position as an innova­
tive competitor in the health care
industry through our quality of
patient care, commitment to employee
development and empha­
sis on customer service.

Maxim Integrated Products
Maxim Integrated Products is a
worldwide leader in design, develop­
ment, and manufacture of linear and mixed­
signal integrated circuits (ICs).
Maxim circuits "connect" the real
world and digital world by detect­
see Directory, page 13

We are now hiring for an Associate Accountant, Food Technologist, Staff Auditor, Training Coordinator and many more corporate as well as management positions.

Come stop by our table to learn more about these great opportunities!
A movie worth 'Millions'

Tonya Strickland

British boys with cute accents and freckles never fail to entertain, but director David Boyle's film, "Millions," the imaginative plot in which they are intertwined is also enchanting. In Northeast England, seven-year-old Damian (Etel) and his nine-year-old brother, Anthony, (Lewis Owen McCubbin) start fresh when their father, Ronnie (James Nesbitt), moves them out of their familiar home, where the walls echo from a once happier time and into a suburban neighborhood after the death of the boy's nunn.

Once in the new place, Damian retreats to his thought haven, a makeshift rocketship built of cardboard boxes and packing tape. It is here the story develops. Damian hears a rumble, peaks out the window of his ship and sees a duffel bag of cash falling from the sky.

In what could be a depressing tale of grievance, morals and greed, Damian's outlook on life changes. In Northeast England, seven-year-old Damian (Etel) and his nine-year-old brother, Anthony, (Lewis Owen McCubbin) start fresh when their father, Ronnie (James Nesbitt), moves them out of their familiar home, where the walls echo from a once happier time and into a suburban neighborhood after the death of the boy's nunn.

Abortion should be 'rare, safe and legal'  

Jesus do? I'm pretty sure he would be passing out all forms of birth control to the woman. "And it's not just what. I'm pro-abortion," I forcefully told her and asked, "How can you be complacent when they're killing babies inside?" She acted like there was a doctor inside "doctoring" and dicing away at one of those futile babies in the diaper commercials.  

Not knowing how to respond, I decided to humor myself and hopefully offend her. I thought about asking her if she had a day job, or if she got paid to sit outside and protest. Maybe she could offer me a job, who knows? After 30 seconds of silence, I quoted something I heard on the news a while ago by comedian Bill Maher: "You know what, I'm pro-abortion," I forcefully said to the woman. "And it's not just that, I continued, "but I'm pro-suicide, pro-assisted suicide and pro-death penalty. Anything that gets the freewheeling, I'm for!"  

That would be the first time a protestor would call me "crazy" and stop talking to me. So if you ever find yourself caught in an argument with these anti-choice people, remember Maher's quote. It's like a 'get-out-of-jail-free card.'  

On a more serious note, abortion is a 'non-issue' on which many social conservatives concentrate huge amounts of resources, money and time. Just imagine if they spent that time fighting world poverty or protesting the current genocide in Darfur? But of course they wouldn't do that. They must focus their energy on not just opposing abortion, but promoting abstinence-only education, preventing people from receiving condoms and opposing all forms of birth control. If you're against abortion, wouldn't it make sense to at least promote the use of birth control?  

If our goal is to limit and decrease the amount of abortions that take place, the "pro-life" movement should be actively involved in condom distribution. They should also be educating people on other birth control options - condoms, the pill, the "patch" and the "morning after pill.

People who are against abortion need to ask themselves, "What would Jesus do?" I'm pretty sure he would be passing out all forms of birth control in order to limit the number of abortions taking place.  

This issue should not be about ideology, but just plain common sense. If you believe abortion is against your religion, that's completely fine, as long as you don't try to prevent someone else from obtaining one. Because, like the gay marriage issue, religions differ on views about abortion. For instance, many Christians oppose abortion even if the mother's life is at stake. Then, on the other hand, Judaism "mandates" an abortion in order to save the life of the mother. This leaves us with our governmental laws which can neither "advance nor inhibit religion."  

Overall, when it comes to abortion, I think most people would agree with former President Bill Clinton when he said it should always be "safe, rare and legal."

LETTER TO THE EDITOR  

No one is an idiot, but I know that the recent permanent triple fines are a blatant and obvious discriminatory action. Noise complaints, minor in possession and drunk in public are obviously associated with students and now we have to worry about these obscene fines.  

Thanks a lot San Luis Obispo. Don't mention how this college keeps the town on the map. There is no doubt in my mind that the local police department is anti-student. What she would call this fine increase? I was under the impres­ sion it was a temporary thing with the "new rules" that this is the town's way of showing its appreciation for the calm and low key up the ASI' s grassroots weekend.  

Apparently the City Council used Santa Barbara's U.P.I.F. fine as an example who could argue the fine was reasonable. They pay $134. We will be paying more than double that. Now maybe my math is wrong, but it seems like that would serve to show our increase is ludicrous.  

Come on Cal Poly Are we going to let this small town slowly chip away at our freedom to be studs?  

James Shimamoto  

P.S. We're wondering if that's your goal.  

ASSOCIATE EDITOR  

ASI posters rooking the election is quite amusing  

Within the cluster of the ASI vote for one flyer, I happened to come across a few that were a little different. The first one proclaimed "This is the Pole for ASI President because nobody really cares." This is great that someone is mocking these ASI elections.  

Unlike presidential elections where each candidate is in it to win it, jacked and jered at this person didn't pick on one candidate but summed up the ASI candidates (represented by the Pole) and said what a lot of us were probably thinking. The only people who are running for the positions is the art of being the ASI president.  

I'm going to say that statement holds water, and will be proven when the statistics of how many Cal Poly students actually voted is published.

I'll be eager to see what, if anything, this is accomplished with those $10 million that ASI is chillin' on. In future elections I hope to see more of these humoristic and ridicu­ lous posters plastered around campus.

They get people thinking. Do you really care who gets voted into the position of ASI president?  

Matt Tarlecki  

Civil engineering sophomore  

Bikes save money; campus should be bicycle-friendly  

Recently, I was further promoted bicycle use across campus. With the rising parking problem and campus police's great efforts to get cars to get off campus, bike-biking has become the go-to option. I've seen an increase of bike ridership across campus. To indicate encourage bicycle use, the campus core is labeled a no-bike zone. Perimeter Road and Via Carta are the only accessible ways through campus. Recently, I was removed from the Crooks for President Polyview Drive near Fisher Science. Do you know how severe of a fine U.P.I.F. gave for a bike parked on Polyview Drive near Fisher Science? $120. I was let off with my first and last warning.  

A college campus dining truck or maintenance vehicle is allowed to drive, but I've never seen one. With a bit of consideration for the wheeled drive, it would take minimal effort to separate pedestrians from bicy­ clists. Why not apply them throughout the campus.  

Now maybe my math is wrong, but what about the signs posted across campus? "Bicycle Walk . Zone." Nearly every bit of the campus core is labeled a no-bike zone. Perimeter Road and Via Carta are the only accessible ways through campus. Recently, I was removed from the Crooks for President Polyview Drive near Fisher Science. Do you know how severe of a fine U.P.I.F. gave for a bike parked on Polyview Drive near Fisher Science? $120. I was let off with my first and last warning.  

A college campus dining truck or maintenance vehicle is allowed to drive, but I've never seen one. With a bit of consideration for the wheeled drive, it would take minimal effort to separate pedestrians from bicyc­lists. Why not apply them throughout the campus?

Track and field sprints for the top three

The Big West Championship begins today for Cal Poly, which had the second place men's team and third place women's squad last year.

Emily Rancer

Cal Poly's track and field team will bring 44 of its members to compete in the Big West Championship Friday and Saturday at UC Irvine with hopes of earning a spot in the top three.

The men's team took second last year and finished just 12 points out of first place. The women's team finished third. CSU Northridge claimed both the men's and women's conference titles.

"I don't think we're in a position to challenge Northridge," track and field coach Terry Wagner said of this year's team. "But if we have a really good day and the other teams don't perform as well, we could be anywhere from second to fourth."

Battling Cal Poly for the top spots in the Big West will be Idaho and Utah State.

Wagner noted that while this year's team is not as deep as it has been in the past, the quality of the individuals may be enough to carry the Mustangs to the leading spots.

"We're going to have to count on the quality points as opposed to lots of bodies," Wagner said. "So, we're counting on our top performers to go out and really control their event and hopefully gain us big points in first or second place."

One of those top performers is distance runner Ben Bruce, a senior who is currently ranked first in the nation in the 3,000-meter steeplechase and eighth in the 5,000.

"He's going to be one of several people that we'll count on to win big points in their own specialty," Wagner said.

As the top distance runner in the Big West, Bruce faces pressure from both his team and himself to remain No. 1, but he's trying not to let it effect his performance.

"You have to get used to that," Bruce said. "You've got to learn to put the pressure aside and trust your fitness."

Other top athletes include junior Kayleene Wagner (No. 3, high jump), sophomore Sharon Day (No. 5, high jump), senior Maggie Vesiwy (No. 16, 800m) and senior Cortney Stafford (No. 4, triple jump).

Men's golf makes NCAA West Regional

MUSTANGS DAILY STAFF REPORT

For the first time since reinstating men's golf at Cal Poly five years ago, the Mustangs have qualified for the NCAA Regionals.

Having finished second in the Big West Championships two weeks ago, the Mustangs will compete in the West Regional at the Stanford Golf Course on May 15 and 16.

Cal Poly is seeded 19th in the nation and will bring the scoring of three regionals.

One of those top performers is distance runner Ben Bruce, a senior who is currently ranked first in the nation in the 3,000-meter steeplechase and eighth in the 5,000.

"He's going to be one of several people that we'll count on to win big points in their own specialty," Wagner said.

As the top distance runner in the Big West, Bruce faces pressure from both his team and himself to remain No. 1, but he's trying not to let it affect his performance.

"You have to get used to that," Bruce said. "You've got to learn to put the pressure aside and trust your fitness."

Other top athletes include junior Kayleene Wagner (No. 3, high jump), sophomore Sharon Day (No. 5, high jump), senior Maggie Vesiwy (No. 16, 800m) and senior Cortney Stafford (No. 4, triple jump).

Baseball continues climb

MUSTANGS DAILY STAFF REPORT

Nick Hoover

Taking one-of-three games from the national champion Cal State Fullerton Titans, the Mustangs moved up to No. 19 in the standings.

49ers this weekend. Cal Poly is in second place in the Big West Conference with a 9-3 record, and just barely ahead of the third place 49ers, who are 11-4 in conference.

The Mustangs are coming off a rough last weekend as they fell twice to UC Santa Barbara last weekend before salvaging a win in the finale. However, Long Beach strikes a menacing pose next to Cal Poly in many respects.

The 49ers have a Big West-leading 2-30 ERA, are hitting .288 as a team and feature three All-Americans — shortstop Troy Tulowitzki, pitcher Cesar Ramos and closer Neil Laimon. Long Beach has also swept the Mustangs the past two years and has won 27 of the last 33 match-ups.

But this Cal Poly team could be seen Baseball, page 15
